REF: Resolution No. 83-32 (COR)

Dear Governor Calvo,

Transmitted herewith is Resolution No. 83-32 (COR) “Relative to recognizing the many advantages of using alternative, sustainable, and green building materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly homes, and encouraging local insurers to provide home insurance coverage for housing structures built with such materials.” which was duly and regularly adopted by I Mina‘trentai Dos Na Lihesluran Guåhan on May 28, 2013.

Sincerely,

TINA ROSE MUNA BARNES
Legislative Secretary

Enclosure
Relative to recognizing the many advantages of using alternative, sustainable and green building materials, including timber, both soft and hardwood, thatched plant products, and recycled materials, both natural and commercially manufactured, to construct sustainable and family-friendly homes; and to further encouraging local insurers to provide home insurance coverage for housing structures built with such materials.

BE IT RESOLVED BY I MINA'TRENTAI DOS NA LIHESLATURAN GUÀHAN:

1
WHEREAS, Liheslaturan Guåhan finds that there is a critical shortage of sustainable and family-friendly housing on Guam, and that the demand for sustainable and family-friendly housing has grown exponentially in light of the projected population increase brought on by the military buildup. Moreover, even in its scaled-back form, the military buildup has already overwhelmed the housing market, placing moderate-priced sustainable and family-friendly homes beyond the reach of most working families; and

WHEREAS, according to the Guam Housing and Urban Renewal Authority (GHURA) forecasts, even without the military buildup Guam would need about 6,000 new affordable homes by the year 2020, and another 7,000 affordable homes by 2030; and

WHEREAS, as of April 2012, there were more than 5,000 working families on the waiting list for GHURA’s Section 8 and public housing programs, with many of these families having remained on these lists for several years; and

WHEREAS, GHURA, together with other partners in the public and private sectors, continues to work collaboratively to entice the construction of additional and enhanced sustainable and family-friendly housing, and to pursue local tax incentives for such construction projects; and

WHEREAS, as stated in Public Law 6-135, GHURA’s purpose is to “promote the health, safety and welfare of Guam’s people by the elimination of slum and blight conditions, by the orderly redevelopment and renewal of communities, by proper planning of community development and by provision of safe, decent and sanitary dwellings for low to moderate-income families, through all available federal and local governmental programs and through encouragement of Guam’s private enterprises to participate in the common task of improving our island community, while upholding family values”; and
WHEREAS, I Liheslaturan Guåhan finds that the use of alternative green building materials, such as soft and hardwood timber in the vernacular architecture of Guam, as exemplified in the five-block Inalahan Historic District, that was placed on the local and federal Registries of Historic Places in 1976, would go a long way toward fulfilling GHURA’s mission of providing truly sustainable and family-friendly housing for our working families, supporting economically renewable and sustainable green building initiatives of the local and federal government by building environmentally sensitive, renewable resources and energy efficient structures, showcasing the passive cooling comfort of indigenous building styles reflective of traditional and cultural values, and eliminating a culture of blight among island residents, while renewing the community of families; and

WHEREAS, as exemplified by the homes in the pre-1900s historic district, whose joinery methods and tropical hardwoods have stood the test of time, the traditional architecture of Guam and the wider Malay belt consists of a wooden pole-frame house with a raised floor to allow for ventilation, a steep gable or hip roof that evolved from thatching materials to corrugated metal, and windows to catch the breezes, closed with wooden hinged or sliding shutters; and

WHEREAS, these are but a few examples of how the use of alternative green building materials, including timber, both soft and hardwood, thatched plant products, and recycled materials, both natural and commercially manufactured, to construct sustainable and family-friendly housing might contribute to fulfilling GHURA’s mission, where working families would be able to take advantage of new sustainable homes, which range from very inexpensive to moderately expensive, e.g., $35,000 to $85,000; and

WHEREAS, cost estimates projected in the construction of such structures provide that the average monthly mortgage payment for the higher-end homes may
be as little as $500 per month, a monthly payment arguably within the reach of
many working families; and

WHEREAS, the affordability of housing on Guam not only comes from the
lower end costs of green materials and labor, but also in the greatly reduced
utilities cost to users; and

WHEREAS, building with materials, including timber, both soft and
hardwood, thatched plant products, recycled materials, both natural and
commercially manufactured, to construct sustainable and family-friendly homes
may allow families living in areas lacking wastewater infrastructure the option of
sewer service by eliminating the need for the separate construction of cesspools
and leaching fields, and providing off-grid wastewater and tertiary treatment
technologies; and

WHEREAS, building with materials, including timber, both soft and
hardwood, thatched plant products, recycled materials, both natural and
commercially manufactured, to construct sustainable and family-friendly homes,
may also support local efforts to promote the use, enjoyment and perpetuation of
indigenous flora and fauna by signifying the need to replant the island’s ifit forests;
and

WHEREAS, building with materials, including timber, both soft and
hardwood, thatched plant products, recycled materials, both natural and
commercially manufactured, to construct sustainable and family-friendly homes
may further support the Guam Visitors Bureau’s efforts to recalibrate the island’s
tourism industry by highlighting more authentic elements of Guam culture.
Villages featuring coordinated culturally, aesthetically and environmentally
responsive homes may plausibly become features of attraction that support the
island’s tourism sector; and
WHEREAS, building with materials, including timber, both soft and hardwood, thatched plant products, recycled materials, both natural and commercially manufactured, to construct sustainable and family-friendly buildings not only provides for the reintegration of the extended family living model into local building practices, but also represents an architectural style that honors the heritage of traditional building practices and supports wider cultural regeneration efforts to celebrate the vernacular architecture of this island;

WHEREAS, I Liheslaturan Guåhan finds that the use of alternative green building materials, including timber, both soft and hardwood, thatched plant products, recycled materials, both natural and commercially manufactured, to construct sustainable and family-friendly homes has many conceivable benefits and should be explored by stakeholders in both the public and private sectors with a sense of exigency given the dire need for affordable housing on Guam; now therefore, be it

RESOLVED, that I Mina'Trentai Dos Na Liheslaturan Guåhan does hereby, on behalf of the people of Guam, encourage local insurance companies, who carry lines of hazard or homeowners insurance, to extend the same to sustainable and family-friendly homes and structures, which are constructed with alternative green building materials, including timber, both soft and hardwood, thatched plant products, and recycled materials, both natural and commercially manufactured; and be it further

RESOLVED, that the Speaker certify, and the Legislative Secretary attest to, the adoption hereof, and that copies of the same be thereafter transmitted to the Honorable Madeleine Z. Bordallo, Guam Delegate to the U.S. Congress; to the Guam Housing Corporation; to the Guam Housing and Urban Renewal Authority; to the Guam Association of Realtors; to the Guam Association of Insurance and Financial Advisors; to the Guam Banking and Insurance Board; to Artemio B.
Ilagan, the Guam Insurance Commissioner; to the Guam Environmental Protection Agency; to the Department of Public Works; to the Department of Land Management; to the Guam Contractors License Board; to the Affordable Housing Coordinating Council; and to the Honorable Edward J.B. Calvo, I Maga’lahen Guåhan.

DULY AND REGULARLY ADOPTED BY I MINA’TRENTAI DOS NA LIHESLATURAN GUÅHAN ON THE 28TH DAY OF MAY 2013.

JUDITH T. WON PAT, Ed.D.
Speaker

TINA ROSE MUÑA BARNES

SPONSOR REPORT DIGEST

I. OVERVIEW
Resolution No. 83-32 (COR) was introduced on March 21, 2013 by Senator Tina Rose Muña Barnes, and was subsequently referred by the Committee on Rules to the Sponsor on April 18, 2013.

The Sponsor convened a public hearing on Resolution No. 83-32(COR) on Tuesday, May 14, 2013 at 9:00 AM in the Legislature’s Public Hearing Room in Hagåtña.

Public Notice Requirements
Public Hearing notices were disseminated via e-mail to all Senators and all main media broadcasting outlets on Monday, May 6, 2013 (5-Day Notice), and again on Thursday, May 9, 2013 (48-Hour Notice).

Senators Present
Senator Tina Rose Muña Barnes, Chairperson
Senator Vicente (ben) C. Pangelinan
Senator Rory J. Respicio
Senator Frank B. Aguon, Jr.
Speaker Judith T. Won Pat, Ed.D.
Senator Tommy Morrison
Senator Chris M. Duenas
Senator V. Tony Ada
Senator Michael Limtiaco

II. INTRODUCTION, SUMMARY OF TESTIMONY & DISCUSSION

Senator Muna Barnes: Next on the Agenda is Resolution No. 83-32 (COR) Relative to recognizing the many advantages of using alternative, sustainable, and green building materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly homes, and encouraging local insurers to provide home insurance coverage for housing structures built with such materials. We did have the Chairperson of the Affordable Housing Coordinating Council, Mr. Martin Benavente here to testify. We also have Mr. Vic Rama here in support of the resolution. Mr. Rama did you want to provide oral testimony in support of the resolution? (Mr. Rama speaking from audience seating - response inaudible). Mr. Rama who is a resident will provide written testimony, will that be in support of the resolution? I will await your
I Mina ’Trentai Dos Na Liheslaturan Guåhan
Office of The Legislative Secretary
Tina Rose Muña Barnes

testimony, Saina Ma’așe. At this time we will call the Director of the Guam Housing Corporation, Mr. Martin Benavente to say a few words regarding the Resolution 83-32. Just for the record if you would just state your name and where you’re from.

**Martin Benavente:** My name is Martin Benavente, President of the Guam Housing Corporation. I didn’t come here to testify for or against the resolution, I just didn’t really think there was a need for the resolution to encourage this type of building, I think that I’ve talked to the company before and encouraged them to build a model home so people could see it for themselves and take it if they want it. I support the fact that it becomes one more option that the people have... one more building option and that’s the part that I like about this system is that if they can meet the threshold of getting their structure insurable, then Guam Housing Corporation would be able to finance these buildings... just like any other building.

**Senator Muna Barnes:** For the record, the introduction of this Resolution 83-32 was simply to... as we look at our traditional homes, how our elders lived and how their buildings were built, going back to basics, going back to looking at wood, and how our houses were made and the infrastructure of that and I felt that we live here in the tropics, to look at energy efficiency, going green and making sure that we tap into the basics that were utilized before that would be an opportunity to revisit it again and that’s the introduction for this resolution.

**Martin Benavente:** Yes... and I think it’s a good thing, but I think that as Guam Housing, I can only support the fact that it’s another option that we have... and I think it’s a good option if they can get it to the point where it’s insurable because that’s the point where financing can kick in if they can assure that. I’ve seen a couple of models on Guam already and they’re still here From where a lot of people are at today, that is and could be more than one hundred percent (100%) improvement because a lot of people in Guam are living in tents, tin 2x4 houses, and no floors, so this can become a good option to built where in the eyes of Guam Housing we can only touch it if it’s insurable and I think that I’ve made that point already.

**Senator Muna Barnes:** Do you have any questions? Speaker Ben.

**Senator Pangelinan:** Mr. Benavente you said you’ve met with the company, what company?

**Martin Benavente:** These people that are building the wooden structure. We put an RFI out for different types of building structures, alternate building structures and response to the RFI we’ve got so many different types of homes being offered... metal-to-metal, metal with concrete, Styrofoam with concrete, so we’re looking at all of that and then hopefully we can put an RFP out... but for the purpose of everyday loans that we provide at Guam Housing we don’t
need to RFP that, it’s just a matter of choice by the customers to say I want to borrow $150,000 and this is the contractor I want to deal with... that’s strictly their choice, we don’t involve ourselves with that. All we want to make sure is that they meet that... the fact that they’re licensed, that they’re registered in Guam, and that the homes they’re building are insurable... and that’s our concern. That’s why I’m trying to get it from the perspective of how Guam Housing looks at it. Most today... if you’re comparing $150,000 wooden home with a $150,000 concrete home, it’s almost automatic what they would choose. So if they’re building alternate building systems you need to start with the low end if you can get something there, which some of the other companies are... I think are proposing.

Senator Pangelinan: Thank you... thank you very much Madam Chair.

Senator Muna Barnes: Speaker Won Pat.

Speaker Won Pat: Thank you very much Madam Chair. I understand of course Mr. Benavente when you said that there’s no need for this because you’re moving towards that end. I think it’s also important to basically stress that this will be or... it passes of course the policy of the legislature and we’d like to be able to start to see this happening. I’m hoping that with this resolution... and I know you indicated that you’ve spoken to one contractor, but I think there needs to be a discussion with engineers and architects and contractors... not one, but several. Because I know that there are many different alternatives that are available out there, but the idea of course that we trying to promote going local, we’re trying to build the fact that this will be a place where... for tourist would want to come here, and provide something totally different from city life and that when they start to see again buildings representative of who we are as a people and as an island, that just adds to the island, but I’d like to encourage yourself to... and anyone as well to really start this conversation to be able to come up with homes that are affordable and of course insurable because I think that would be critical with all this modern technology and new ideas anything is possible... I know it says thatched roof and other things, but still... you can still be able to see and I know with science and technology, I know that these engineers and architects, contractors and whomever is involved in this would be able to come up with ideas of how these homes can be built. That’s I think the position of the legislature that as a policy, I’d like to be able to see more of these... actually more of these homes being built and because they become affordable other than these square concrete box homes. We’ve been building since after Typhoon Pamela and Typhoon Karen.

Martin Benavente: It’s also a better alternative to container homes and other things... you know, aesthetically they’re beautiful homes. From where I stand or sit in Guam Housing, I don’t endorse just one structure, one building structure... I challenged the contractors and
builders to come out and show the people and commit these to people that these are viable. We have started those conversations Madam Speaker... we’ve met with almost all these insurance companies in Guam and we’re telling them that there are other building structures that are coming in and asking them to look at it and endorse it. We had a pretty good response to our first meeting with the insurance companies and we’re encouraged by it. Inclusive of wooden homes, they’d be willing to insure that also, but it has to meet certain standards and their engineers would have to certify by wind capacity that these buildings will withstand, then they would insure it. There are certain plateaus to meet before we get endorsements from these people. But then again you know, if it’s below the average mortgage amount, you don’t have to borrow money for mortgage nowadays, you can borrow up to $45,000 for an SUV I’m sure that you can borrow up to $45,000 for a nice that doesn’t need to be insured because it’s not a mortgage... money that you borrowed it’s a personal loan. So some of these things we’re still exploring and within the next few months we’ll coming to you showing you that a lot of the metal buildings are also a very good option but a lot of those decisions have got to be made by the buyers themselves. So all I do with these companies is encourage them to print brochures, do model homes and invite people to come and see either structure and see if it’s viable, because whenever you’re talking about a typical $200,000 metal home versus a $200,000 concrete home, which would you choose? Unless you go down in your pricing, people won’t look at you because everybody in Guam knows that concrete is it... but if you go down low enough you can convince a lot of people to go metal, wood, tin... it’s not a new concept. I just saw a quonset hut that still exist in Tamuning just the other day behind ITC. So if these things can survive that long then you know almost every warehouse that is being built today is being built with metal. You have a lot of new restaurants that are being built with metal... so it’s not just something that... actually in most cases it’s been proven so they just have to show the people their product and each and every person needs to make that decision on their own as to which one they want. So, they’re not selling it to Guam Housing, they’re selling it to the buyers. The concept of the resolution... of course I’m okay with that, I’m just not saying that there’s a... we can do without the resolution, we’re still okay with it... but the resolution helps better understand the new concepts that are in town, but we’ll coming up, our symposium is next month... we’ll be talking about other concepts, everybody from the wood companies to the metal companies would be there and I invite everyone to join us at the Housing Symposium on June 5th and 6th.

**Speaker Won Pat:** I’m just thinking of the resolution because Directors and Presidents come and go, but policy basically looking forward would always be there and sometimes we’re making this full circle because like you say, technology and science have proven and are beginning to show that some of these structures can withstand the typhoons and the earthquakes... we’re hearing now that some of these solar panels can withstand up to 100 to 200
wind velocity. We know from the ancient days that when you build a home that from flat to A-frame that unit would consider the wind velocity as well that they don't break down those old homes because we had a home like that survived since... it was built in the 50s and until finally in 2006 was when finally after all these storms were hitting that it finally only a small portion of the roof... so and I think that's why it is important these discussions happen because ultimately they're going to be the ones to convince those insurance companies that they are structurally safe and sound and that they can withstand earthquakes and typhoons. I'd like to see more of that discussion actually... and thank you very much for doing that, doing your part. Maybe you can set the tone for everyone.

**Martin Benavente:** I think it would help but we're very close to the beginning of building alternate homes other than concrete or a mixture.

**Speaker Won Pat:** And of course you're saying you've some of these metal homes... there's a bill I'm working on and I understand that DPW's giving companies and even homeowners who would like to use containers as homes and offices and they're just giving them a hard time because of the fact that they are using containers and they are not thinking outside the box in terms of what you're providing, so I'm hoping through your Housing Symposium that maybe there might be some samples of it.

**Martin Benavente:** That's the first I've heard of it.

**Speaker Won Pat:** I've heard this from contractors and so we're doing the research.

**Martin Benavente:** I'll talk to Carl and see what we can do to move some of those obstacles. Our purpose is if it's not a safety or health hazard, we'll try to move these things to get it done. If all you can build is a container, we prefer seeing you with a container starter home than some of the structures that are out there and we're also looking bringing in some of these stand-alone sewer/septic tanks things that are approved by EPA so that we can get these homes built on Chamorro Land Trust properties that are not currently serviced by water, power and sewer. So as we do that, we're looking at other ways to make sure that... like the Gil Breeze problem... that's a major problem 100 people up in Yigo and no water and some of them with septic and some of them without. Government needs to go in there and show them how to do it.

**Senator Muna Barnes:** Any other questions? Thank you Mr. Benavente. I was hoping that you'd come in with both hats... also as the Chair of the Affordable Housing Coordinating Council. Do you want to go ahead and state that for the record?
Martin Benavente: I'm here with both hats and I'll be here this afternoon again for the other public hearing with both hats.

Senator Muna Barnes: Thank you... Saina Ma'ase. With that being said, this Resolution 83-32 (COR) is publicly heard anyone else wishing to present testimony may do so by sending it to 155 Hesler Place, Hagåtña Guam. This Committee on Municipal Affairs, Tourism, Housing and Hagåtña Restoration & Redevelopment Authority is now called adjourned at 11:01 AM Saina Ma'ase.

III. FINDINGS & RECOMMENDATIONS
The Sponsor hereby reports out Resolution No. 83-32 (COR), with the recommendation TO PASS.
Relative to recognizing the many advantages of using alternative, sustainable, and green building materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly homes, and encouraging local insurers to provide home insurance coverage for housing structures built with such materials.

BE IT RESOLVED BY THE COMMITTEE ON RULES OF I MINA' TRENTAI DOS NA LIHESLATURAN GUÅHAN:

WHEREAS, I Liheslaturan Guåhan finds that there is a critical shortage of sustainable and family-friendly housing on Guam and that the demand for sustainable and family-friendly housing has grown exponentially in light of the projected population increase brought on by the military buildup. Moreover, even in its scaled-back form, the buildup has already overwhelmed the housing market, placing moderate-priced sustainable and family-friendly homes beyond reach of most working families; and

WHEREAS, according to Guam Housing and Urban Renewal Authority ("GHURA") forecasts, even without the buildup, Guam would need about 6,000 new affordable homes by the year 2020, and another 7,000 affordable homes by 2030; and

WHEREAS, as of April 2012, there were more than 5,000 working families on the waiting list for GHURA's Section 8 and public housing programs, with many of these families having remained on these lists for several years; and
WHEREAS, GHURA, together with other partners in the public and private sectors, continues to work collaboratively to entice the construction of additional and enhanced sustainable and family-friendly housing and to pursue local tax incentives for such construction projects; and

WHEREAS, as stated in Public Law 6-135, GHURA's purpose is to "promote the health, safety and welfare of Guam's people by the elimination of slum and blight conditions, by the orderly redevelopment and renewal of communities, by proper planning of community development and by provision of safe, decent and sanitary dwellings for low to moderate-income families, through all available federal and local governmental programs and through encouragement of Guam's private enterprises to participate in the common task of improving our island community, while upholding family values"; and

WHEREAS, I Lihešlaturan Guåhan finds that the use of alternative green building materials such as soft and hardwood timber in the vernacular architecture of Guam, as exemplified in the five-block Inalahan Historic district, that was in 1976 placed on the local and federal registries of historic places, would go a long way toward fulfilling GHURA's mission of providing truly sustainable and family-friendly housing for our working families, supporting economically renewable and sustainable green building initiatives of the local and federal government by building environmentally sensitive, renewable resources and energy efficient structures, showcasing the passive cooling comfort of indigenous building styles reflective of traditional and cultural values, and eliminating a culture of blight among island residents while renewing the community of families; and

WHEREAS, As exemplified by the homes in the pre-1900s historic district, whose joinery methods and tropical hardwoods have stood the test of time, the traditional architecture of Guam and the wider Malay belt consists of a wooden pole-frame house with a raised floor to allow for ventilation, a steep gable or hip roof that evolved from thatching materials to corrugated metal, and windows to catch the breezes, closed with wooden hinged or sliding shutters; and
WHEREAS, Taking but a few examples of how the use of alternative green building materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured to construct sustainable and family-friendly housing might contribute to fulfilling GHURA’s mission, where working families would be able to take advantage of new sustainable homes, which range from very inexpensive to moderately expensive, e.g., $35,000.00 to $85,000.00; and

WHEREAS, Cost estimates projected in the construction of such structures provide that the average monthly mortgage payment for the higher-end homes may be as little as $500 per month, a monthly payment arguably within the reach of many working families; and

WHEREAS, The affordability of housing on Guam not only comes from lower end costs of green materials and labor but also in greatly reduced utilities cost to users; and

WHEREAS, Building with materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured to construct sustainable and family-friendly homes, may allow families living in areas lacking wastewater infrastructure the option of sewer service by eliminating the need for separate construction of cesspools and leaching fields and providing off-grid wastewater and tertiary treatment technologies; and

WHEREAS, Building with materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly homes, may also support local efforts to promote the use, enjoyment and perpetuation of indigenous flora and fauna by signifying the need to replant the island’s Ifit forests; and

WHEREAS, Building with materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly homes may further support the Guam Visitors Bureau’s efforts to recalibrate the island’s tourism industry by highlighting more authentic
elements of Guam culture. Villages featuring coordinated culturally and aesthetically and environmentally responsive homes may plausibly become features of attraction that support the island’s tourism sector; and

WHEREAS, Building with materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly buildings not only provides for the reintegration of the extended family living model into local building practices but also represents an architectural style that honors the heritage of traditional building practices and supports wider cultural regeneration efforts to celebrate the vernacular architecture of this island;

WHEREAS, I Liheslaturan Guåhan finds that the use of alternative green building materials, namely materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly homes, has many conceivable benefits and should be explored by stakeholders in both the public and private sectors with a sense of exigency given the dire need for affordable housing on Guam; now, therefore be it

RESOLVED, that I Mina Treintai Dos Na Liheslaturan Guåhan encourages insurance companies who carry lines of hazard or homeowners insurance to extend the same to structures constructed with alternative green building materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly homes; and be it further

RESOLVED, that the Speaker and the Chairperson of the Committee on Rules certify, and the Legislative Secretary attest to the adoption hereof, and that copies of the same be
thereafter transmitted to the Honorable Edward J.B. Calvo, I Maga’lahen Guåhan.

DULY AND REGULARLY ADOPTED BY THE COMMITTEE ON RULES OF I MINA’ TRENTAI DOS NA LIHESLATURAN GUÅHAN ON THIS DAY OF ______
________________________2013.

MEMORANDUM

To: Rennae Meno  
Clerk of the Legislature

Attorney Therese M. Terlaje  
Legislative Legal Counsel

From: Senator Rory J. Respicio  
Majority Leader & Rules Chair

Subject: Referral of Resolution No. 83-32 (COR)

As Chairperson of the Committee on Rules, I am forwarding my referral of Resolution No. 83-32 (COR). Please ensure that the subject resolution is referred, in my name, to the respective sponsor, as shown on the attachment.

I also request that the same be forwarded to all Senators of I Mina’trentai Dos na Liheslaturan Guahan.

Should you have any questions, please feel free to contact our office at 472-7679.

Si Yu’os ma’ase!

First Notice of Public Hearing

Jean Cordero <jean@tinamunabarnes.com>  
Mon, May 6, 2013 at 10:12 AM

To: phnotice@guamlegislature.org  
Cc: Stephanie Flores <sgflores@tinamunabarnes.com>, John Blas <jblas@tinamunabarnes.com>, David Bell <David@tinamunabarnes.com>, Jean Cordero <jean@tinamunabarnes.com>

Hafa adai! Please see attached notice of memorandum.

May 6, 2013

Memorandum

TO: All Members/All Senators  
FROM: Senator Tina Rose Muña Barnes  
SUBJECT: First Notice of Public Hearing

Tuesday, May 14, 2013

Hafa Adai! The Committee on Municipal Affairs, Tourism, Housing and Hagåtña Restoration and Redevelopment Authority will be conducting a public hearing on Tuesday, May 14, 2013 at the Public Hearing Room beginning at 9:00 a.m. This hearing is scheduled to receive public testimony on the following:

- Bill 84-32 (COR) - An act to add a new subsection (f) to Section 2, Part III, Chapter II of Public Law 32-233, relative to the appropriation to the Guam Community College Apprenticeship - Sponsors: V. C. Pangelinan, T. R. Muña Barnes

- Bill No. 96-32 (COR) – An act relative to expanding the representation on the Hagåtña Restoration & Redevelopment Authority, to include the Mayor of Hagåtña and a Legislative Representative, amending §§79301 of Article 3, Chapter 70, Title 21, GCA - Sponsor: F. B. Aguon, Jr., T. R. Muña Barnes

- Resolution No. 83-32 (COR) - Relative to recognizing the many advantages of using alternative, sustainable, and green building materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly homes, and encouraging local insurers to provide home insurance coverage for housing structures built with such materials – sponsor: T.R. Muña Barnes

- Resolution No. 106-32 (COR) - Relative to supporting the development of a public policy, investment and operational frame work for establishing a sustainable and green cruise industry in Micronesia with Guam serving as the Regional Hub – sponsor: T.R. Muña Barnes, J.T. Won Pat, Ed. D.

Pursuant to 5 GCA, Chapter 8, Subsection 8107, public hearing notices should be sent on Monday, May 6,
2013, which is five (5) working days prior and a second public notice on **Thursday, May 9, 2013**, which is forty-eight (48) hours prior.

Written testimonies may be submitted on the day of, prior to, or up to ten days after the public hearing to the Office of Senator Tina Rose Muña Barnes, 155 Hesler Place, Hagatña Guam 96910, via facsimile to 472-3400 or via email to senator@tinamunabarnes.com. We comply with Title II of the Americans with Disabilities Act (ADA). Should you require assistance or accommodations please contact Jeanenne Cordero or John Blas from our office at 472-3455/6 or via email at jean@tinamunabarnes.com or jblas@tinamunabarnes.com. I look forward to your attendance and participation.

**Si Yu’os Ma’åse’!**

Memorandum

TO: All Members/All Senators
FROM: Senator Tina Rose Muña Barnes
SUBJECT: First Notice of Public Hearing
Tuesday, May 14, 2013

Hafa Adai! The Committee on Municipal Affairs, Tourism, Housing and Hagåtña Restoration and Redevelopment Authority will be conducting a public hearing on Tuesday, May 14, 2013 at the Public Hearing Room beginning at 9:00 a.m. This hearing is scheduled to receive public testimony on the following:

- Bill 84-32 (COR) - An act to add a new subsection (f) to Section 2, Part III, Chapter II of Public Law 32-233, relative to the appropriation to the Guam Community College Apprenticeship - Sponsors: V. C. Pangelinan, T. R. Muña Barnes

- Bill No. 96-32 (COR) – An act relative to expanding the representation on the Hagåtña Restoration & Redevelopment Authority, to include the Mayor of Hagåtña and a Legislative Representative, amending §§79301 of Article 3, Chapter 70, Title 21, GCA - Sponsor: F. B. Aguon, Jr., T. R. Muña Barnes

- Resolution No. 83-32 (COR) - Relative to recognizing the many advantages of using alternative, sustainable, and green building materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly homes, and encouraging local insurers to provide home insurance coverage for housing structures built with such materials – sponsor: T.R. Muña Barnes
Resolution No. 106-32 (COR) - Relative to supporting the development of a public policy, investment and operational framework for establishing a sustainable and green cruise industry in Micronesia with Guam serving as the Regional Hub – sponsor: T.R. Muña Barnes, J.T. Won Pat, Ed. D.

Pursuant to 5 GCA, Chapter 8, Subsection 8107, public hearing notices should be sent on Monday, May 6, 2013, which is five (5) working days prior and a second public notice on Thursday, May 9, 2013, which is forty-eight (48) hours prior.

Written testimonies may be submitted on the day of, prior to, or up to ten days after the public hearing to the Office of Senator Tina Rose Muña Barnes, 155 Hesler Place, Hagatña Guam 96910, via facsimile to 472-3400 or via email to senator@tinamunabarnes.com. We comply with Title II of the Americans with Disabilities Act (ADA). Should you require assistance or accommodations please contact Jeanenne Cordero or John Blas from our office at 472-3455/6 or via email at jeann@tinamunabarnes.com or jblas@tinamunabarnes.com. I look forward to your attendance and participation.

Memorandum

TO: Mr. Joseph A. Cameron, President
Department of Chamorro Affairs

FROM: Senator Tina Rose Muña Barnes

SUBJECT: Second Notice of Public Hearing
Tuesday, May 14, 2013

Hafa Adai! The Committee on Municipal Affairs, Tourism, Housing and Hagåtña Restoration and Redevelopment Authority will be conducting a public hearing on Tuesday, May 14, 2013 at the Public Hearing Room beginning at 9:00 a.m. This hearing is scheduled to receive public testimony on the following:

• Bill No. 96-32 (COR) – An act relative to expanding the representation on the Hagåtña Restoration & Redevelopment Authority, to include the Mayor of Hagåtña and a Legislative Representative, amending §§79301 of Article 3, Chapter 70, Title 21, GCA - Sponsor: F. B. Aguon, Jr., T. R. Muña Barnes, B.J.F. Cruz

Pursuant to 5 GCA, Chapter 8, Subsection 8107, public hearing notices should be sent on Monday, May 6, 2013, which is five (5) working days prior and a second public notice on Thursday, May 9, 2013, which is forty-eight (48) hours prior.

Written testimonies may be submitted on the day of, prior to, or up to ten days after the public hearing to the Office of Senator Tina Barnes.
Committee on Municipal Affairs, Tourism, Housing and Hagåtña Restoration and Redevelopment Authority
Public Hearing
9:00 a.m. Tuesday, May 14, 2013

AGENDA

1. **BILL NO. 84-32 (COR)** – An act to add a new subsection (f) to Section 2, Part III, Chapter II of Public Law 31-233, relative to the appropriation to the Guam Community College Apprenticeship – *sponsors: V.C. Pangelinan, T.R. Muña Barnes*

2. **Bill No. 96-32 (COR)** – An act relative to expanding the representation on the Hagåtña Restoration & Redevelopment Authority, to include the Mayor of Hagåtña and a Legislative Representative, amending §§79301 of Article 3, Chapter 70, Title 21, GCA - *Sponsors: F. B. Aguon, Jr., T. R. Muña Barnes, B.J.F. Cruz*

3. **Resolution No. 83-32 (COR)** - Relative to recognizing the many advantages of using alternative, sustainable, and green building materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly homes, and encouraging local insurers to provide home insurance coverage for housing coverage for housing structures built with such materials – *sponsor: T.R. Muña Barnes*

MEMORANDUM

To: Rennae Meno
   Clerk of the Legislature

   Attorney Therese M. Terlaje
   Legislative Legal Counsel

From: Senator Rory J. Respicio
       Majority Leader & Rules Chair

Subject: Referral of Resolution No. 83-32 (COR)

As Chairperson of the Committee on Rules, I am forwarding my referral of Resolution No. 83-32 (COR). Please ensure that the subject resolution is referred, in my name, to the respective sponsor, as shown on the attachment.

I also request that the same be forwarded to all Senators of I Mina’trentai Dos na Liheslaturan Guåhan.

Should you have any questions, please feel free to contact our office at 472-7679.

Si Yu’os ma’åse!

(1) Attachments
Relative to recognizing the many advantages of using alternative, sustainable, and green building materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly homes, and encouraging local insurers to provide home insurance coverage for housing structures built with such materials.

BE IT RESOLVED BY THE COMMITTEE ON RULES OF I MINA' TRENTAI DOS NA LIHESLATURAN GUÂHAN:

WHEREAS, I Liheslaturan Guåhan finds that there is a critical shortage of sustainable and family-friendly housing on Guam and that the demand for sustainable and family-friendly housing has grown exponentially in light of the projected population increase brought on by the military buildup. Moreover, even in its scaled-back form, the buildup has already overwhelmed the housing market, placing moderate-priced sustainable and family-friendly homes beyond reach of most working families; and

WHEREAS, according to Guam Housing and Urban Renewal Authority ("GHURA") forecasts, even without the buildup, Guam would need about 6,000 new affordable homes by the year 2020, and another 7,000 affordable homes by 2030; and

WHEREAS, as of April 2012, there were more than 5,000 working families on the waiting list for GHURA’s Section 8 and public housing programs, with many of these families having remained on these lists for several years; and
WHEREAS, GHURA, together with other partners in the public and private sectors, continues to work collaboratively to entice the construction of additional and enhanced sustainable and family-friendly housing and to pursue local tax incentives for such construction projects; and

WHEREAS, as stated in Public Law 6-135, GHURA’s purpose is to “promote the health, safety and welfare of Guam’s people by the elimination of slum and blight conditions, by the orderly redevelopment and renewal of communities, by proper planning of community development and by provision of safe, decent and sanitary dwellings for low to moderate-income families, through all available federal and local governmental programs and through encouragement of Guam’s private enterprises to participate in the common task of improving our island community, while upholding family values”; and

WHEREAS, I Liheslaturan Guåhan finds that the use of alternative green building materials such as soft and hardwood timber in the vernacular architecture of Guam, as exemplified in the five-block Inalahan Historic district, that was in 1976 placed on the local and federal registries of historic places, would go a long way toward fulfilling GHURA’s mission of providing truly sustainable and family-friendly housing for our working families, supporting economically renewable and sustainable green building initiatives of the local and federal government by building environmentally sensitive, renewable resources and energy efficient structures, showcasing the passive cooling comfort of indigenous building styles reflective of traditional and cultural values, and eliminating a culture of blight among island residents while renewing the community of families; and

WHEREAS, As exemplified by the homes in the pre-1900s historic district, whose joinery methods and tropical hardwoods have stood the test of time, the traditional architecture of Guam and the wider Malay belt consists of a wooden pole-frame house with a raised floor to allow for ventilation, a steep gable or hip roof that evolved from thatching materials to corrugated metal, and windows to catch the breezes, closed with wooden hinged or sliding shutters; and
WHEREAS, Taking but a few examples of how the use of alternative green building materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured to construct sustainable and family-friendly housing might contribute to fulfilling GHURA’s mission, where working families would be able to take advantage of new sustainable homes, which range from very inexpensive to moderately expensive, e.g., $35,000.00 to $85,000.00; and

WHEREAS, Cost estimates projected in the construction of such structures provide that the average monthly mortgage payment for the higher-end homes may be as little as $500 per month, a monthly payment arguably within the reach of many working families; and

WHEREAS, The affordability of housing on Guam not only comes from lower end costs of green materials and labor but also in greatly reduced utilities cost to users; and

WHEREAS, Building with materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured to construct sustainable and family-friendly homes, may allow families living in areas lacking wastewater infrastructure the option of sewer service by eliminating the need for separate construction of cesspools and leaching fields and providing off-grid wastewater and tertiary treatment technologies; and

WHEREAS, Building with materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly homes, may also support local efforts to promote the use, enjoyment and perpetuation of indigenous flora and fauna by signifying the need to replant the island’s lfit forests; and

WHEREAS, Building with materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly homes may further support the Guam Visitors Bureau’s efforts to recalibrate the island’s tourism industry by highlighting more authentic
elements of Guam culture. Villages featuring coordinated culturally and aesthetically and environmentally responsive homes may plausibly become features of attraction that support the island’s tourism sector; and

WHEREAS, Building with materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly buildings not only provides for the reintegration of the extended family living model into local building practices but also represents an architectural style that honors the heritage of traditional building practices and supports wider cultural regeneration efforts to celebrate the vernacular architecture of this island;

WHEREAS, I Liheslaturan Guåhan finds that the use of alternative green building materials, namely materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly homes, has many conceivable benefits and should be explored by stakeholders in both the public and private sectors with a sense of exigency given the dire need for affordable housing on Guam; now, therefore be it

RESOLVED, that I Mina’Trentai Dos Na Liheslaturan Guåhan encourages local insurance companies who carry lines of hazard or homeowners insurance to extend the same to structures constructed with alternative green building materials including timber, both soft and hardwood, thatched plant products, recycled materials both natural and commercially manufactured, to construct sustainable and family-friendly homes; and be it further

RESOLVED, that the Speaker and the Chairperson of the Committee on Rules certify, and the Legislative Secretary attest to the adoption hereof, and that copies of the same be
thereafter transmitted to the Honorable Edward J.B. Calvo, I Mga'lahen Guåhan.

DULY AND REGULARLY ADOPTED BY THE COMMITTEE ON RULES OF I MINA' TRENTAI DOS NA LIHESLATURAN GUÅHAN ON THIS ______ DAY OF ______

________________________ 2013.
