Hafa Adai, my name is Michelle Voacolo and I am here today to speak on behalf of Micronesia Climate Change Alliance (MCCA). MCCA is a grassroots non-profit organization dedicated to creating community centered solutions to the climate crisis. We focus on a wide spectrum of issues pertaining to sustainability including food sovereignty, waste management and energy democracy. Our goal has and always will be to advocate for a just, equitable society throughout Micronesia. Today, I am here to speak about **Bill 219-35**.

Bill 219-25 makes it possible for schools to get rooftop solar and could potentially save them \$6 million dollars in energy costs which means more funding for our schools, teachers and resources for students. This bill also includes local preference which means that local solar energy companies on Guam would have the opportunity to do this work. With over 30,000 people currently COVID-19 impacted and out of work, this is an opportunity to put Guam residents back into work and stimulate our local economy.

Fossil fuel-based systems and multinational companies have perpetuated inequities and promoted widespread injustices within communities throughout the world. Distributed solar aims to decentralize our energy systems while empowering citizens to become prosumers, create green jobs and support local economic development. Distributed solar is energy democracy and a way to put the power back into the community's hands. It is one step of many in the great fight for climate justice.

Micronesia Climate Change Alliance is in support of Bill 219-35 and would like to thank the Senators and Legislature who have developed and supported it.

Michelle Voacolo
Resident of Guam
