The Honorable Antonio R. Unpingco  
Speaker  
Mina'Bente Kuåttro na Lihesluran Guåhan  
Twenty-Fourth Guam Legislature  
Guam Legislature Temporary Building  
155 Hesler Street  
Hagåtña, Guam 96910

Dear Speaker Unpingco:

Enclosed please find Substitute Bill No. 784 (COR), "AN ACT TO ESTABLISH RULES AND REGULATIONS FOR THE GUAM ENVIRONMENTAL PROTECTION AGENCY ("GEDA") AIR POLLUTION CONTROL STANDARDS AND REGULATIONS", which I have signed into law today as Public Law No. 24-322.

This legislation provides needed amendments to the current air pollution control standards for Guam, as required by federal law.

Very truly yours,

Carl T. C. Gutierrez  
Governor of Guam

Attachment:   copy attached for signed bill  
original attached for vetoed bill

cc:  The Honorable Joanne M. S. Brown  
Legislative Secretary

Office of the Speaker  
ANTEIO R. UNPINGCO

CERTIFICATION OF PASSAGE OF AN ACT TO IMAGA'LAHEN GU AHAN

This is to certify that Substitute Bill No. 784 (COR) "AN ACT TO ESTABLISH RULES AND REGULATIONS FOR THE GEPA AIR POLLUTION CONTROL STANDARDS AND REGULATIONS," was on the 3rd day of December, 1998, duly and regularly passed.

ANTONIO R. UNPINGCO
Speaker

Attested:

JOANNE M.S. BROWN
Senator and Legislative Secretary

This Act was received by I Maga’lahen Guahan this 17 day of December, 1998, at 3:50 o’clock P.M.

Maei F. Delga
Assistant Staff Officer
Maga’lahi’s Office

APPROVED:

CARL T. C. GUTIERREZ
I Maga’lahen Guahan

Date: 12-29-98

Public Law No. 24-322
AN ACT TO ESTABLISH RULES AND REGULATIONS FOR THE GEPA AIR POLLUTION CONTROL STANDARDS AND REGULATIONS.
BE IT ENACTED BY THE PEOPLE OF GUAM:

Section 1. Findings and Intent. In accordance with the Administrative Adjudication Law, §9303 of Title 5 of the Guam Code Annotated, as amended by Public Law Number 24-27, on November 17, 1998 the Guam Environmental Protection Agency transmitted to I Liheslaturan Guahan, “Rules and Regulations for the Guam Environmental Protection Agency (‘GEPA’) Air Pollution Control Standards and Regulations.” I Liheslaturan Guahan agrees with these regulations as presented and seeks to approve said regulations, attached hereto as Exhibit A.

Section 2. Five (5) additional Full Time Employees (“FTE’s”) for the Air Pollution Control Program are hereby created to effectuate the purpose and intent of the Air Pollution Control Act and these regulations promulgated herein. The following additional FTE’s will be comprised of the following positions:

- Two (2) Environmental Health Specialist I;
- One (1) Environmental Health Specialist II;
- One (1) Environmental Health Specialist III; and
- One (1) Environmental Engineer I.

These positions will be funded contingent on the availability of funds in the Air Pollution Control Special Fund.

Section 3. Severability. If any provision of this Law or its application to any person or circumstance is found to be invalid or contrary to law, such invalidity shall not affect other provisions or applications of this law which can be given effect without the invalid provisions or applications, and to this end the provisions of this law are severable.
EXHIBIT A
"GUAM AIR POLLUTION CONTROL
STANDARDS AND REGULATIONS.

Section 1107.2. List of Hazardous Air Pollutants.

Section 1107.3. Applicability.

Section 1101. Definitions.

Section 1101.1. Definitions. As used in these Standards and Regulations:

(a) "Administrator" means the Administrator of the Guam Environmental Protection Agency ("GEPA") or an authorized agent, officer or inspector.

(b) "Agricultural burning" means the use of open outdoor fires in agricultural operations, forest management or range improvements.

(c) "Agricultural operation" means a bona fide agricultural activity with the primary purpose of providing agricultural instruction by an educational institution, and includes the growing and harvesting of crops or the raising of fowl or animals.

(d) "Air pollutant" means any air pollution agent or combination of such agents, including any physical, chemical, biological, radioactive, inclusive of source material, special nuclear material and by product material; substance; or matter which is emitted into or otherwise enters the ambient air. Such term includes any precursors to the formation of any pollutant, to the extent that the agent or combination of such agents is identified in any Federal or local rules as precursors.

(e) "Air pollution" means the presence in the outdoor atmosphere
of one (1) or more substances in such quantities and duration as is or tends to be injurious to human health or welfare, plant life, animal life or property, or would unreasonably interfere with the enjoyment of life or property.

(f) "Air Pollution Control Act" means Air Pollution Control Act, Chapter 49, Part 2, Division 2, Part 1 of Title 10 of the Guam Code Annotated.

(g) "Air pollution control equipment" means equipment or a facility of a type intended to eliminate, prevent, reduce, or control the emissions of any regulated or hazardous air pollutant to the atmosphere.

(h) "Air pollution control permit" means written authorization from the Administrator to construct, modify, relocate or operate an air pollution emission source. A permit authorizes the permittee to cause or allow the emission of a regulated air pollutant in a specified manner or amount, or to do any act, not forbidden by these Standards and Regulations, but requiring review by GEPA.

(i) "Air pollution emission source" means any piece of equipment or any activity at a building, structure, facility or installation that emits, or may emit, any air pollutant. For this definition, "building, structure, facility, or installation" means all of the air pollutant emitting activities which belong to the same industrial grouping, are located on one (1) or more contiguous or adjacent properties, and are under the control of the same person, or persons under common control, except the activities of any vessel. Air pollutant emitting activities shall be considered as part of the same industrial grouping if they belong to the same major group," i.e.
which have the same first two (2) digit code, as described in the Standard Industrial Classification Manual, 1987, or approved equivalent standard industrial classification.

(j) "Allowable emissions" means the emissions of an air pollution emission source calculated using the maximum rated capacity of the source, unless the source is subject to Federally enforceable limits which restrict the operating rate, capacity or hours of operations, or any combination of these, and the most stringent of the following:

(1) the applicable standards set forth in 40 CFR Parts 60, 61 and 63, as amended;

(2) any Guam implementation plan emission limitation, including those with future compliance dates; and

(3) the emission rates specified in a Federally enforceable permit condition, including those with future compliance dates.

(k) "Ambient Air" means the general outdoor atmosphere to which the public has access.

(l) "Annual capacity factor" means the ratio of the actual annual heat input divided by the potential annual heat input of fuel burning equipment.

(m) "Applicant" means any person who submits an application for a permit.

(n) "Best available control technology" means an emissions limitation, including a visible emission standard based on the maximum degree of reduction for each pollutant, subject to regulation approved pursuant to the Clean Air Act which would be emitted from any proposed
air pollution emission source or modification which the Administrator, on a case-by-case basis, taking into account energy, environmental, and economic impacts and other costs, determines is achievable for such source or modification through application of production processes or available methods, systems and techniques, including fuel cleaning or treatment, or innovative fuel combustion techniques for control of such pollutant. In no event shall application of best available control technology result in emissions of any pollutant which would exceed the emissions allowed by any applicable standard promulgated pursuant to 40 CFR Parts 60, 61 and 63, as amended. If the Administrator determines that technological or economic limitations on the application of measurement methodology to a particular emissions unit would make the imposition of an emissions standard infeasible, a design, equipment, work practice, operational standard, or combination thereof, may be prescribed instead to satisfy the requirement for the application of best available control technology. Such standard shall, to the degree possible, set forth the emissions reduction achievable by implementation of such design, equipment, work practice or operation, and shall provide for compliance by means which achieve equivalent results.

(o) "Biomass fuel burning boilers" means fuel burning equipment with an annual capacity factor greater than fifty percent (50%) for biomass fuel.

(p) "Board" means the GEPA Board of Directors.

(q) "BTU" means British Thermal Unit.

(r) "CFR" means the Code of Federal Regulations.
(s) "Clean Air Act" means the Clean Air Act, as amended, Title 42 United States Code §7401, et seq. and all subsequent amendments.

(t) "Commenced" as applied to construction of or modification to an air pollution emission source, means that the owner or operator has all necessary preconstruction approvals or permits and either has:

(1) begun, or caused to begin a continuous program of actual operation or on-site construction of the source; or

(2) entered into binding agreements or contractual obligations, which cannot be canceled or modified without substantial loss to the owner or operator, to undertake a program of actual operation or construction of the source.

(u) "Complete" means, in reference to an application for a permit, that the application contains all of the information necessary for processing the application.

(v) "Compliance Plan" means a plan which includes a description of how an owner or operator proposes to comply with all applicable requirements of these Standards and Regulations, and includes a schedule of compliance and a schedule under which the owner or operator will submit progress reports to GEPA.

(w) "Construction" means a physical change or change in the method of operation including fabrication, erection, installation, demolition, or modification of an emissions unit which would result in a change in actual emissions.

(x) "Day" unless otherwise specified, means calendar day.

(y) "Director" means the Director of Department of Customs and
Quarantine or his designee.

(z) "Draft permit" means the version of a permit for which the Administrator offers public notice, including the method by which a public hearing can be requested, and an opportunity for public comment pursuant to §1104.19.

(aa) "Emission" means the act of releasing or discharging air pollutants into the ambient air from any source or an air pollutant which is released or discharged into the ambient air from any source.

(bb) "Emission limitation" means a requirement established by the Administrator or USEPA Administrator which limits the quantity, rate, or concentration of emissions of air pollutants on a continuous basis, including any requirements which limit the level of opacity, prescribe equipment, set fuel specifications, or prescribe operation or maintenance procedures for a source to assure continuous emission reduction.

(cc) "Emissions unit" means any part or activity of an air pollution emission source that emits or has the potential to emit any regulated or hazardous air pollutant.

(dd) "Existing air pollution emission source" means an air pollution emission source that has received an air pollution control permit, commenced construction or a modification, or was in operation prior to the effective date of these Standards and Regulations.

(ee) "Federally enforceable" means all limitations and conditions which are enforceable by the USEPA Administrator, including those requirements developed pursuant to 40 CFR Parts 60, 61 and 63, as amended; requirements within the Guam implementation plan; or any
permit requirements established pursuant to 40 CFR Part 52.21, as amended; or all permit terms and conditions in all air pollution control permit except those specifically designated as not Federally enforceable as described in §1104.14; or regulations approved pursuant to 40 CFR Part 51, Subpart I, as amended, including operating permits issued under an EPA approved program that is incorporated into these Standards and Regulations, and expressly requires adherence to any permit issued under such program.

(ff) "Forest management" means wildland vegetation management using prescribed burning procedures conducted by a public agency or through a cooperative agreement involving a public agency.

(gg) "Fuel burning equipment" means a furnace, boiler, apparatus, stack and all appurtenances thereto, used in the process of burning fuel for the primary purpose of producing heat or power by heat transfer.

(hh) "Fugitive dust" means the emission of solid airborne particulate matter from any source other than combustion.

(ii) "Fugitive emissions" means those emissions which could not reasonably pass through a stack, chimney, vent or other functionally equivalent opening.

(jj) "GEPA" means the Guam Environmental Protection Agency.

(kk) "Hazardous air pollutants" means those hazardous air pollutants listed in §112(b) of the Clean Air Act, and any other hazardous air pollutants listed in §1107.2.

(ll) "Heavy-duty vehicle" means any motor vehicle designed primarily for transportation of property and rated at more than six
thousand (6000) pounds gross vehicle weight or designed primarily for transportation of persons having a capacity of more than twelve (12) persons.

(mm) "Light-duty vehicle" means any motor vehicle designed primarily for transportation of property and rated at less than six thousand (6000) pounds gross vehicle weight or designed primarily for transportation of persons and having a capacity of less than twelve (12) persons.

(nn) "mg/m³" means milligrams per cubic meter.

(oo) "Mobile source" means any vehicular air pollutant source, including, but not limited to, automobiles, trucks, buses, other motor vehicles, aircraft, ships, boats and other waterborne craft.

(pp) "Month" means a calendar month.

(qq) "Motor vehicle" means a self-propelled vehicle capable of transporting a person or any material or any permanently or temporarily affixed apparatus.

(rr) "Motor vehicle engine" means engines powered by petroleum-based fuels used to provide power to motor vehicles.

(ss) "NAAQS" means the National Ambient Air Quality Standards contained in 40 CFR Part 50, as amended.

(tt) "National Emission Standards for Hazardous Air Pollutants" means the Federal emission standards contained in 40 CFR Parts 61 and 63, as amended.

(uu) "New air pollution emission source" means an air pollution emission source that commenced construction or modification on or after
the effective date of these Standards and Regulations.

(vv) "Opacity" means a condition which renders material partially or wholly impervious to rays of visible light and causes obstruction of an observer's view.

(ww) "Open Burning" means the burning of trees, brush, grass and other vegetative matter in such a manner that the products of combustion resulting from the burning are emitted directly into the ambient air without passing through an adequate stack or flare.

(xx) "Owner or operator" means a person who owns, leases, operates, controls, or supervises an air pollution emission source.

(yy) "Particulate matter" means any material, except water in uncombined form, that is or has been airborne and exists as a liquid or a solid at standard conditions.

(zz) "Permit" means written authorization from the Administrator to construct, modify, relocate, or operate any regulated or hazardous air pollutant source. A permit authorizes the owner or operator to proceed with the construction, modification, relocation, or operation of a regulated or hazardous air pollutant source, and to cause or allow the emission of such air pollutants in a specified manner or amount, or to do any act not forbidden by the Clean Air Act or regulations promulgated pursuant to the Clean Air Act, the Guam Air Pollution Control Act and regulations promulgated pursuant to the local statute.

(aaa) "Permit renewal" means the process by which a permit is reissued at the end of its term.

(bbb) "Person" means any individual, partnership, firm,
association, municipality, public or private corporation, subdivision, or
agency of Guam, trust, estate or any other legal entity. Legal entity
includes any agency, department or instrumentality of the United States
and any officer, agent, or employee of such entities.

(ccc) "PM_{10}\) means particulate matter with an aerodynamic
diameter less than or equal to a nominal ten micrometers.

(ddd) "Potential annual heat input" means the product of the
maximum rated heat input capacity (megawatts or million BTU per hour)
times 8760 hours per year.

(eee) "Potential to emit" means the maximum capacity of an air
pollution emission source to emit any air pollutant under its physical and
operational design. Any physical or operational limitation on the capacity
of a source to emit an air pollutant, including air pollution control
equipment and restrictions on hours of operation or on the type or amount
of material combusted, stored, or processed, shall be treated as part of its
design if the limitation is enforceable by the Administrator and the USEPA
Administrator.

(fff) "PSD" means prevention of significant deterioration.

(ggg) "Range improvement" means the removal of vegetation for
a wildlife, game or livestock habitat.

(hhh) "Reconstruction" means the replacement of components at
an existing air pollution emission source to such an extent that the fixed
capital cost of the new components exceeds fifty per cent (50\%) of the fixed
capital cost that would be required to construct a comparable entirely new
air pollution emission source.
"Regulated air pollutant" means:

1. Nitrogen oxides or any volatile organic compound;
2. Any air pollutant for which a national or Guam ambient air quality standard has been promulgated;
3. Any air pollutant that is subject to any standard promulgated under §111 of the Clean Air Act;
4. Any Class I or II substance subject to a standard promulgated under or established by Title VI of the Clean Air Act;
5. Any pollutant subject to a standard promulgated under §112 or other requirements established under §112 of the Clean Air Act, including §§ 112(g), (j), and (r) of the Clean Air Act, including the following:
   - Any pollutant subject to requirements under §112(j) of the Clean Air Act. If the USEPA Administrator fails to promulgate a standard by the date established pursuant to §112(e) of the Clean Air Act, any pollutant for which a subject source would be major shall be considered to be regulated on the date eighteen (18) months after the applicable date established pursuant to §112(e) of the Clean Air Act; and
   - Any pollutant for which the requirements of §112(g)(2) of the Clean Air Act have been met, but only with respect to the individual source subject §112(g)(2) requirement; or
6. Any other pollutant subject to a standard or requirement in these Standards and Regulations.
"Responsible official" means:

(1) For a corporation: a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or an authorized representative of such person if the representative is responsible for the overall operation of one (1) or more manufacturing, production, or operating facilities applying for or subject to a permit and either:

   (A) The facilities employ more than two hundred fifty (250) persons or have gross annual sales or expenditures exceeding Twenty Five Million Dollars ($25,000,000) (in second quarter 1980 dollars); or

   (B) The delegation of authority to such representative is approved in advance by the Administrator;

(2) For a partnership or sole proprietorship: a general partner or the proprietor, respectively; or

(3) For a municipality, state, federal, or other public agency: a principal executive officer, ranking elected official, or an authorized representative as approved by the Administrator. For the purposes of these Standards and Regulations, a principal executive officer of a federal agency includes the chief executive officer, commanding officer, or equivalent rank or position, having responsibility for the overall operations of a principal geographic unit of the agency.

"Risk assessment" means the process of determining the
potential adverse health effects of human exposure to environmental hazards. The process includes hazard identification, dose-response assessment, exposure assessment and risk characterization by quantifying the magnitude of the public health problem that results from the hazard.

(l) "SICC" means Standard Industrial Classification Code.

(m) "Significant" means, in reference to a net emissions increase or the potential of a source to emit:

(1) A rate of emissions that would equal or exceed any of the following pollutant and emission rates:

(A) Carbon monoxide: 100 tpy;
(B) Nitrogen oxides: 40 tpy;
(C) Sulfur dioxide: 40 tpy;
(D) Particulate matter: a total of 25 tpy of particulate matter of all sizes or 15 tpy of \( \text{PM}_{10} \);
(E) Ozone: 40 tpy of volatile organic compounds;
(F) Lead: 0.6 tpy;
(G) Asbestos: 0.007 tpy;
(H) Beryllium: 0.0004 tpy;
(I) Mercury: 0.1 tpy;
(J) Vinyl chloride: 1 tpy;
(K) Fluorides: 3 tpy;
(L) Sulfuric acid mist: 7 tpy;
(M) Hydrogen sulfide (\( \text{H}_2\text{S} \)): 10 tpy;
(N) Total reduced sulfur (\( \text{H}_2\text{S} \)): methyl mercaptan, dimethyl sulfide, and dimethyl disulfide: 10 tpy;
(O) Reduced sulfur compounds (H$_2$S, carbon disulfide and carbonyl sulfide): 10 tpy; 

(P) Municipal waste combustor organics: 3.2 grams per year ($3.5 \times 10^6$ tpy) measured as total tetra- through octa-chlorinated dibenzo-p-dioxins and dibenzofurans; 

(Q) Municipal waste combustor metals: 14 megagrams per year (15 tpy) measured as particulate matter; or 

(R) Municipal waste combustor acid gases: 36 megagrams per year (40 tpy) measured as sulfur dioxide and hydrogen chloride; 

(2) Any net emissions increase of a pollutant or the potential of a source to emit a pollutant subject to regulation pursuant to the Clean Air Act that Paragraph (1) does not list; and 

(3) Notwithstanding paragraph (1), any emissions increase associated with a major air pollution emission source or major modification, which would be constructed within ten (10) kilometers of a national park, wilderness area or memorial park designated as a Class I area by the federal government or GEPA, and will have an impact on such area equal to or greater than one ug/m$^3$ (twenty-four-hour average). 

(nn) "Smoke" means the gaseous products of burning carbonaceous materials made visible by the presence of small particles of carbon. 

(oo) "Source" means property, real or personal, which emits or may emit any air pollutant.
"Stack" means a point in a source designed to emit solids, liquids, or gases into the air, including a pipe or duct but not including flares.

"Standard Industrial Classification Code" means Major Group Number, Industry Group Number, or Industry Number as described in the most recent edition, supplements, and appendices of the Standard Industrial Classification Manual.

"Standards of Performance for New Stationary Sources" means the federal emission standards contained in 40 CFR Part 60, as amended.

"Tpy" means tons per year.

"ug/m^3" means micrograms per cubic meter.

"Upon program approval" means the date the Guam air pollution control permit program is granted full or interim approval by the USEPA Administrator pursuant to 40 CFR Part 70, as amended, and thereafter.

"USEPA" means the United States Environmental Protection Agency.

"USEPA Administrator" means the Administrator of the USEPA or his or her designee.

"VOC" means volatile organic compound.

"Volatile organic compound" means a compound of carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate, which participates in atmospheric photochemical reactions. This includes any such organic
compound other than methane; ethane; methylene chloride (dichloromethane); 1,1,1 trichloroethane (methyl chloroform); 1,1,1-trichloro-2,2,2-trifluoroethane (CFC-113); trichlorofluoromethane (CFC-11); dichlorodifluoromethane (CFC-12); chlorodifluoromethane (CFC-22); trifluoromethane (FC-23); 1,2-dichloro-1,1,2,2-tetrafluoroethane (CFC-114); chloropentafluoroethane (CFC-115); 1,1,1-trifluoro-2,2-dichloroethane (HCFC-123); 1,1,1,2-tetrafluoroethane (HFC-134a); 1,1-dichloro-1-fluoroethane (HCFC-141b); 1-chloro 1,1-difluoroethane (HCFC-142B); 2-chloro-1,1,1,2-tetrafluoroethane (HCFC-124); pentafluoroethane (HFC-125); 1,1,2,2-tetrafluoroethane (HFC-134); 1,1,1-trifluoroethane (HFC-143a); 1,1-difluoroethane (HFC-152a); and perfluorocarbon compounds which fall into these classes:

(1) Cyclic, branched, or linear, completely fluorinated alkanes;

(2) Cyclic, branched, or linear, completely fluorinated ethers with no unsaturations;

(3) Cyclic, branched, or linear, completely fluorinated tertiary amines with no unsaturations; and

(4) Sulfur containing perfluorocarbons with no unsaturations and with sulfur bonds only to carbon and fluorine.

"Volatile organic compound water separator" means a tank, box, sump, or other container which is primarily designed to separate and recover volatile organic compounds from water. Petroleum storage tanks from which water incidental to the process is periodically removed are not considered volatile organic compound water separators.
Section 1102 - General Requirements:

Section 1102.1. Prohibition of air pollution. No person, including any public body, shall engage in any activity which causes air pollution or causes or allows the emission of any regulated or hazardous air pollutant without first securing an approval in writing from the Administrator when required by these Standards and Regulations.

Section 1102.2. Conflicts in Rules. In the event any federal or local laws, rules, or regulations are in conflict with the provisions of these Standards and Regulations, the most stringent requirement shall apply.

Section 1102.3 Certification. Every application form, report, compliance plan, or compliance certification submitted pursuant to these Standards and Regulations shall contain certification by a responsible official. This certification and any other certification required pursuant to these Standards and Regulations shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

Section 1102.4 Sampling, Testing and Reporting Methods.

(a) All sampling and testing shall be made and the results calculated in accordance with the reference methods specified by USEPA, or by test procedures approved by the Administrator. All tests shall be made under the direction of persons knowledgeable in the field of air pollution control.

(b) GEPA may conduct tests of emissions of air pollutants from any source. Upon request of the Administrator, an owner or operator of an air pollution emission source may be required to conduct tests of emissions
of air pollutants at the owner or operator's expense. The owner or operator of the air pollution emission source to be tested shall provide necessary ports in stacks or ducts and such other safe and proper sampling and testing facilities, exclusive of instruments and sensing devices, as may be necessary for proper determination of the emissions of air pollutants.

(c) The Administrator may require the owner or operator of any air pollution emission source to maintain files on information concerning pertinent processes, material flow, fuels used, nature and amount and time periods or durations of emissions, or any other information as may be deemed necessary by the Administrator to determine whether the air pollution emission source complies with applicable emission limitations, NAAQS, Guam ambient air quality standards, or other provisions of these Standards and Regulations in a permanent form suitable for inspection or in a manner authorized by the Administrator.

(d) The information recorded shall be summarized and reported to the Administrator as specified in the permit and in accordance with any requirement of these Standards and Regulations. Recording periods shall be January 1 to June 30 and July 1 to December 31, or any other period specified by the Administrator, except the initial recording period shall commence on the date the Administrator issues the notification of the record keeping requirements. The Administrator may require the owner or operator to submit any reported summary to the USEPA Administrator.

(e) Information recorded by the owner or operator of an air pollution emission source and copies of the summarizing reports submitted to the Administrator shall be retained by the owner or operator for a
specified time period from the date on which the information is recorded or the pertinent report is submitted. The specified time period shall be as required in §1104.12(7)(H) or identified within an applicable requirement of the air pollution emission source.

(f) Owners or operators of air pollution emission sources shall correlate applicable emission limitations and other requirements within the report.

Section 1102.5. Air Quality Models. (a) All required estimates of ambient concentrations shall be based on the applicable air quality models, data bases, and other requirements specified in 40 CFR Part 51, Appendix W, as amended.

(b) Where an air quality impact model specified in 40 CFR Part 51 Appendix A of Appendix W, as amended, is inappropriate, the model may be modified or another model substituted on written request to the Administrator. The Administrator shall provide for publish notice, including the method by which a public hearing can be requested, and an opportunity for public comment, on all proposed modifications or substitutions of an air quality impact model. Written approval from the Administrator shall be obtained for any modification or substitution. Methods such as those outlined in the "Workbook for the Comparison of Air Quality Models" (U.S. Environmental Protection Agency, Office of Air Quality Planning and Standards, Research Triangle Park, N.C. 27711, May 1978) may be used to determine the comparability of air quality models.

Air Quality Surveillance," shall be met at a minimum during the operation of any monitoring stations required by the Administrator or these Standards and Regulations.

Section 1102.7. Public Access to Information. (a) Except as provided in Subsection (b), the following information shall be considered public records and as such shall be available for public inspection pursuant to §49114 of Chapter 49, Part 2, Division 2, Part 1 of Title 10 of the Guam Code Annotated unless access is restricted or closed by law:

1. All permit applications;
2. All supporting information for permit applications;
3. Compliance plans and schedules;
4. Reports and results associated with performance tests and continuous emission monitors;
5. Ambient air monitoring data and emissions inventory data;
6. Certifications;
7. Any other information submitted to GEPA pursuant to the air pollution control permit program;
8. Permits; and
9. Public comments or testimonies received during any public comment period or public hearing.

(b) Any owner or operator of an existing or proposed air pollution emission source may request confidential treatment of specific information, including information concerning secret processes or methods of manufacture, by submitting a written request to the Administrator at the
time of submission, and clearly identifying the specific information (requests) that is to be accorded confidential treatment. With respect to each item of confidential information, the owner or operator requesting that it be designated as confidential shall provide documentation concerning:

(1) How each item of information concerns secret processes, secret methods of manufacture, or is determined to be confidential pursuant to §49114 of Chapter 49, Part 2, Division 2, Part 1 of Title 10 of the Guam Code Annotated;

(2) Who has access to each item of information;

(3) What steps have been taken to protect the secrecy of each item of information; and

(4) Why it is believed each item of information must be accorded confidential treatment and the anticipated prejudice should disclosure be made.

(c) Any information submitted to GEPA without a request for confidentiality in accordance with this section shall be considered a public record.

(d) Upon a satisfactory showing to the Administrator by any owner or operator that any records, reports, or information, or particular part thereof, other than emission data, to which the Administrator has access pursuant to these Standards and Regulations, contain information of a confidential nature, including information concerning secret processes or methods of manufacture, these records, reports, or information shall be kept confidential except that such records, reports, or information may be
disclosed to other local and federal representatives concerned with carrying out these Standards and Regulations or when relevant in any proceeding pursuant to these Standards and Regulations. The contents of an air pollution control permit itself shall not be entitled to confidentiality protection.

(e) Any person who has claimed confidentiality for records, reports, or other information and whose claim was denied by the Administrator may obtain administrative review and subsequent judicial review of the denial pursuant to the Administrative Adjudication Law. Records which are the subject of a judicial review shall not be released until the judicial review is complete and only if the court authorizes such release.

(f) All requests for public records shall be in writing, shall be addressed to the Administrator, and shall identify or describe the character of the requested record. Upon approval by the Administrator, the requested public record shall be available to the requester for inspection and copying during established office hours. The Administrator shall charge the requester a reasonable cost for reproduction of any public record, but not less than Twenty-five Cents ($0.25) per page, sheet or fraction thereof.

Section 1102.8. Reporting of Equipment Shutdown. (a) In the case of shutdown of required air pollution control equipment for necessary scheduled maintenance, the intent to shut down such equipment shall be reported to the Administrator at least twenty-four (24) hours prior to the planned shutdown. The prior notice shall include:

(1) Identification of the specific equipment to be taken out of
service as well as its location and permit number;

(2) The expected length of time that the air pollution control equipment will be out of service;

(3) The nature and quantity of emissions of air pollutants likely to be emitted during the shutdown period;

(4) Measures such as the use of off-shift labor and equipment that will be taken to minimize the length of the shutdown period; and

(5) The reasons why it would be impossible or impractical to shut down the source operation during the maintenance period.

(b) The submittal of the notice shall not be a defense to an enforcement action.

Section 1102.9. Prompt Reporting of Deviations. (a) Except for emergencies which result in noncompliance with any technology-based emission limitation pursuant to §1104.17 for air pollution emission sources, in the event any emission unit, air pollution control equipment, or related equipment breaks down in such a manner as to cause the emission of air pollutants in violation of these Standards and Regulations or a permit, the owner or operator shall immediately notify GEPA of the failure or breakdown, unless the protection of personnel or public health or safety demands immediate attention to the failure or breakdown and makes such notification infeasible. In the latter case, the notice shall be provided as soon as practicable.

(b) The owner or operator shall provide the following information in writing within five (5) working days of the notification:
(1) Identification of emission points;
(2) Magnitude of the excess emissions;
(3) Time and duration of the excess emissions;
(4) Identity of the process or control equipment causing the excess emissions;
(5) Cause and nature of the excess emissions;
(6) Description of the steps taken to remedy the situation, prevent a recurrence, limit the excessive emissions, and assure that the breakdown does not interfere with the attainment and maintenance of the NAAQS and Guam ambient air quality standards;
(7) Documentation that the equipment or process was at all times maintained and operated in a manner consistent with good practice for minimizing emissions; and
(8) A statement that the excess emissions are not part of a recurring pattern indicative of inadequate design, operation, or maintenance.

(c) The submittal of the notice shall not be a defense to an enforcement action.

Section 1102.10. Prevention of Air Pollution Emergency Episodes. (a) This section is designed to prevent the excessive buildup of air pollutants during air pollution episodes, thereby preventing the occurrence of any emergency due to the effects of these pollutants on the public health.

(b) Conditions justifying the proclamation of an air pollution alert, air pollution warning, or air pollution emergency shall be deemed to exist
whenever the Administrator determines that the accumulation of air pollutants in any place is attaining or has attained levels which could, if such levels are sustained or exceeded, lead to a threat to the health of the public. In making this determination, the Administrator shall be guided by the criteria set forth in Subsections (c) to (g).

(c) If the national weather service issues an atmospheric stagnation advisory or if an equivalent local forecast of stagnant atmospheric conditions is issued, GEPA shall survey its monitoring stations to determine whether alert, warning, or emergency levels have occurred or are likely to occur.

(d) The alert level is that concentration of pollutants at which first stage control action is to begin. An alert shall be declared, health advisories issued, and source activities curtailed as ordered by the Administrator when any one of the following levels is reached:

1. \( \text{SO}_2 \) - 800 \( \mu g/m^3 \) (0.3 ppm), twenty-four (24) hour average;
2. \( \text{PM}_{10} \) - 350 \( \mu g/m^3 \), twenty-four (24) hour average;
3. \( \text{SO}_2 \) and particulate matter combined - product of \( \text{SO}_2 \) in \( \mu g/m^3 \), twenty-four (24) hour average and \( \text{PM}_{10} \) in \( \mu g/m^3 \), twenty-four hour (24) average equal to 65,000;
4. \( \text{CO} \) - 17 \( \text{mg/m}^3 \) (15 ppm), eight (8) hour average;
5. Ozone - 400 \( \mu g/m^3 \) (0.2 ppm), one (1) hour average; or
6. \( \text{NO}_2 \) - 1130 \( \mu g/m^3 \) (0.6 ppm), one (1) hour average; 282 \( \mu g/m^3 \) (0.15 ppm), twenty-four (24) hour average;

and meteorological conditions are such that this condition can be
expected to continue for twelve (12) or more hours.

(e) The warning level indicates that air quality is continuing to degrade and that additional abatement actions are necessary. A warning shall be declared, health advisories issued, and source activities curtailed or terminated as ordered by the Administrator when any one of the following levels is reached:

1. \( \text{SO}_2 \) - 1,600 ug/m\(^3\) (0.6 ppm), twenty-four (24) hour average;
2. \( \text{PM}_{10} \) - 420 ug/m\(^3\), twenty-four (24) hour average;
3. \( \text{SO}_2 \) and particulate matter combined - product of \( \text{SO}_2 \) in ug/m\(^3\), twenty-four-hour average and \( \text{PM}_{10} \) ug/m\(^3\), twenty-four (24) hour average equal to 261,000;
4. \( \text{CO} \) - 34 mg/m\(^3\) (30 ppm), eight (8) hour average;
5. Ozone - 800 ug/m\(^3\) (0.4 ppm), one (1) hour average; or
6. \( \text{NO}_2 \) - 2,260 ug/m\(^3\) (1.2 ppm), one (1) hour average; 565 ug/m\(^3\) (0.3 ppm), twenty-four-hour average;

and meteorological conditions are such that this condition can be expected to continue for twelve (12) or more hours.

(f) The emergency level indicates that air quality may have an impact on public health. An emergency shall be declared, health advisories issued, source activities terminated as ordered by the Administrator, and the public evacuated from the affected area if so recommended by the Administrator, civil defense, or the police department when the warning level for a pollutant has been exceeded and:

1. The concentrations of the pollutant are continuing to
increase;

(2) The Administrator determines that, because of meteorological conditions or other facts, the concentrations will continue to increase; or

(3) When one of the following levels is reached:

(A) \( \text{SO}_2 - 2,100 \text{ ug/m}^3 \) (0.8 ppm), twenty-four-hour average;

(B) \( \text{PM}_{10} - 500 \text{ ug/m}^3 \), twenty-four hour average;

(C) \( \text{SO}_2 \) and \( \text{PM}_{10} \) combined - product of \( \text{SO}_2 \), ug/m\(^3\), twenty-four-hour average and \( \text{PM}_{10} \), ug/m\(^3\), twenty-four-hour average equal to 393,000;

(D) \( \text{CO} - 46 \text{ mg/m}^3 \) (40 ppm), eight-hour average;

(E) \( \text{Ozone} - 1,000 \text{ ug/m}^3 \) (0.5 ppm), one-hour average;

or

(F) \( \text{NO}_2 - 3,000 \text{ ug/m}^3 \) (1.6 ppm), one-hour average; 750 ug/m\(^3\) (0.4 ppm), twenty-four-hour average.

(g) Once declared, any episode level reached by application of these criteria shall remain in effect until the criteria for that level are no longer met. At that time, the next lower episode level shall be assumed.

**Section 1102.11. Variances.** (a) Variances and variance applications shall comply with §49110 of Chapter 49, Part 2, Division 2, Part 1 of Title 10 of the Guam Code Annotated, except that no variance shall prevent or interfere with the maintenance or attainment of NAAQS. Any application for a variance shall include a calculation and description of any change in emissions and the expected ambient air quality concentrations.
motor vehicle engine intended solely for export provided the motor vehicle or motor vehicle engine is not allowed to leave the premises of the Port Authority of Guam.

(i) The following are not subject to the requirements of this Section:

(1) Motor vehicles manufactured before 1968;

(2) Non-chassis mounted engines to be used in light-duty vehicles;

(3) The motor vehicles, or motor vehicle engines manufactured before January 1, 1970 for use in heavy-duty vehicles;

(4) Light-duty vehicles not powered by gasoline (if diesel fueled, only for 1974 and earlier models);

(5) Motorcycles manufactured before January 1, 1978;

(6) Racing vehicles not to be operated on public streets or highways;

(7) Motor vehicles which exhibit one of these features conflicting with safe highway use:

(i) No reverse gear (except motorcycles);

(ii) No differential gear;

(iii) Tracks instead of tires;

(iv) Of an inordinate size;

(v) Cannot exceed a speed of twenty five (25) miles per hour over level paved surfaces, or

(vi) Has armor or weaponry associated with military combat;
(8) Vehicle eligible for one-time personal exemption provided the vehicle is:

   (i) The first nonconforming motor vehicle imported by the individual;

   (ii) Fully owned by the importer or consignee (not a business);

   (iii) Not for resale for two (2) years; and

   (iv) Five (5) year old or older.

Individuals immigrating to Guam are eligible for the one time personal exemption under the same conditions except no limit on age of the vehicle.

(j) The Administrator shall notify the Department of Revenue and Taxation in writing of any motor vehicle imported under the one-time personal exemption. The Department of Revenue and Taxation shall maintain a listing of vehicles imported under the provision of one-time personal exemption and not allow transfer of registration for two (2) years.

(k) The Director shall conditionally allow the importation of a motor vehicle or motor vehicle engine under bond for which an application for certification of conformity is pending before the USEPA Administrator provided that the importer or consignee submits a written request to the Administrator, stating:

   (1) Identification of the test motor vehicle or motor vehicle engine;

   (2) Identification of the location such vehicle will be stored (not on the premises of any dealer), and
(3) The name of the person responsible for custody of the motor vehicle or motor vehicle engine.

(l) The Director shall allow the importation of a motor vehicle or motor vehicle engine, for which a certificate for conformity has been issued by USEPA, but the certification label is not mounted, provided that the importer or consignee submits documentation to the Administrator stating that the motor vehicle or motor vehicle engine year model belongs to a family of motor vehicles certified by USEPA and that the motor vehicle or motor vehicle engines equipped with the equipment required in the certification as verified by the Administrator.

(m) The Director shall conditionally allow the importation of a motor vehicle or motor vehicle engine for which a certificate of conformity has been issued by USEPA, but the motor vehicle is being imported from areas outside North America, (U.S., Mexico, and Canada) or from a country where unleaded gasoline is not widely distributed, under bond for the purpose of replacing the oxygen sensing device and the catalytic converter.

(n) The Director shall conditionally allow the importation of a motor vehicle or motor vehicle engine for which a certificate of conformity has not been issued by USEPA under bond for the purpose of making repairs to the motor vehicle or motor vehicle engine.

(o) The Director shall conditionally allow the importation of a motor vehicle or motor vehicle engine under bond, for which a certificate of conformity has been issued by USEPA but the equipment and certification label has not yet been installed, for the purpose of retrofitting the equipment required in certification, if the importer or consignee:
(1) Submits a written request to the Administrator stating:

(i) Identification of the location such vehicle will be stored (not on the premises of any dealer); and

(ii) The name of the person responsible for custody of the motor vehicle or motor vehicle engine; and

(2) Certifies the person will retrofit the motor vehicle or motor vehicle engine according to the instructions obtained from the manufacturer's U.S. representative.

(p) For conditional entry of motor vehicles under bond, the importer or consignee shall give a bond equal to but not less than one-half (1/2) the value of the motor vehicle or motor vehicle engine and that bond shall not be released to the importer or consignee until such time that the provisions of this Section are fulfilled and a written recommendation from the Administrator or his designee is obtained stating that the Director may release the bond.

(q) **Release under bond.** If entry is being made under bond, the entry shall be accepted only if the importer or consignee gives a bond equal to not less than one-half the value of the motor vehicle, containing the bond conditions set forth in this Section, for the production of a declaration from the Administrator that the vehicle is in conformity with Federal emission standards. Within ninety (90) days after such entry, or such additional period as the Director may allow for good cause shown, the importer or consignee shall deliver to the Director the prescribed declaration. If the declaration is not delivered within ninety (90) days of the date of entry or such additional period as may be allowed by the Director, for good cause
shown, the importer or consignee shall deliver or cause to be delivered to
the Director those motor vehicles or motor vehicle engines which were
released in accordance with this paragraph. In the event that any such
motor vehicle or motor vehicle engine is not redelivered within five (5)
working days following the date specified in the preceding sentence,
liquidated damages shall be assessed in the full amount of the bond and the
vehicle will be subject to confiscation by the Director.

(r) Merchandise refused entry. If a motor vehicle is denied entry
under the provision of this Section, the Director shall refuse to release the
merchandise for entry into Guam and shall give notice of such refusal to
the importer.

(s) Disposition of merchandise refused entry into Guam.

Motor vehicles or motor vehicle engines denied entry under this
Section or which are redelivered in accordance and which are not exported
under supervision of the Director within ninety (90) days from the date of
notice of refusal of admission or date of redelivery shall be disposed of
under the Director, provided that any such disposition shall not result in
an introduction to Guam of a motor vehicle or motor vehicle engine not
covered by a certificate of conformity with Federal motor vehicle emission
standards.

(a) No person shall intentionally remove, alter or otherwise render
ineffective or inoperative, exhaust emission control, crank case ventilation
or any other air pollution control device or system which has been installed
on a motor vehicle or stationary internal combustion engine as a
requirement of any federal law or regulation.

(b) No person shall operate a motor vehicle or other internal combustion engine originally equipped with air pollution devices or systems as required by federal law or regulation, unless such devices or systems are in place and in operating condition.

(c) No person shall cause or permit the emission of visible air pollutants from gasoline-powered motor vehicles for longer than five (5) consecutive seconds.

(d) No person shall cause or permit the emission of visible air pollutants for diesel powered light-duty vehicles of a density equal to or darker than twenty per cent (20%) opacity for longer than five (5) consecutive seconds.

(e) Diesel powered heavy-duty vehicle emission requirements.

(1) No 1974 or subsequent model year diesel powered heavy-duty vehicle with a Federal peak smoke engine certification level of thirty five percent (35%) peak opacity or less operating on any roadway on Guam shall exceed forty percent (40%) peak smoke opacity when tested in accordance with this Section unless its engine is exempted under Subsections (3) or (4).

(2) No other diesel powered heavy duty vehicle operating on any roadway on Guam, including pre-1974 model-year vehicles shall exceed fifty five percent (55%) peak smoke opacity when tested in accordance with this Section unless its engine is exempted under Subsections (3) or (4).

(3) The Administrator shall exempt from the requirements
(b) Under no circumstances shall a variance from any federal
regulations or federally enforceable air pollution control permit terms or
conditions be granted.

Section 1102.12. Penalties and Remedies. Any person who
violates any provision of these Standards and Regulations, any term or
condition of a permit shall be subject to the penalties and remedies
provided for in §49116 of Chapter 49, Part 2, Division 2, Part 1 of Title 10 of
the Guam Code Annotated

Section 1102.13. Severability. If any provision of these
Standards and Regulations or their application to any person or
circumstance is held invalid, the application of such provision to other
persons or circumstances and the remainder of these Standards and
Regulations shall not be affected thereby.

Section 1102.14. Hearings. Any person who received an order from
the Administrator as authorized by the Air Pollution Control Act, or whose
permit application is disapproved or denied by the Administrator, or is
adversely affected by a decision of GEPA may have appeal or judicial
review rights as provided for in §49111 of Chapter 49, Part 2, Division 2,
Part 1 of Title 10 of the Guam Code Annotated.

Section 1103 - General Prohibitions and Standards

Section 1103.1. Applicability. (a) All owners or operators of
an air pollution emission sources and mobile sources are subject to the
requirements of this Section, whether or not the source is required to obtain
an air pollution control permit.

Section 1103.2. Guam Ambient Air Quality Standards.
(a) The following air quality standards are the maximum desirable levels of ambient air quality for Guam. The Guam primary ambient air quality standards define levels of air quality which the Administrators judges are necessary, with an adequate margin of safety, to protect the public health. Guam secondary ambient air quality standards define levels of air quality which the Administrator judges necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant.

(1) Sulfur dioxide.

(A) The Guam primary ambient air quality standards for sulfur dioxide are:

(i) \( 80 \text{ ug/m}^3 \ (0.03 \text{ ppm}) \) - annual arithmetic mean; and

(ii) \( 365 \text{ ug/m}^3 \ (0.14 \text{ ppm}) \) - maximum twenty four (24) hour average concentration not to be exceeded more than once per year.

(B) The Guam secondary ambient air quality standard for sulfur dioxide is:

(i) \( 1300 \text{ ug/m}^3 \ (0.5 \text{ ppm}) \) - maximum three (3) hour average concentration not to be exceeded more than once per year.

(2) Particulate Matter. The Guam primary and secondary ambient air quality standards for particulate matter, measured as \( \text{PM}_{10} \) are:

(A) \( 150 \text{ ug/m}^3 \) - maximum twenty four (24) hour
average concentration not to be exceeded more than once per year; and

(B) 50 ug/m$^3$ - annual arithmetic mean concentration.

(3) Carbon Monoxide. The Guam primary ambient air quality standards for carbon monoxide are:

(A) 10 mg/m$^3$ (9 ppm) - maximum eight (8) hour average concentration not to be exceeded more than once per year;

(B) 40 mg/m$^3$ (35 ppm) - maximum one (1) hour average concentration not to be exceeded more than once per year.

(4) Ozone. The Guam primary and secondary ambient air quality standards for Ozone is:

235 ug/m$^3$ (0.12 ppm) - maximum 1-hour average concentration not to be exceeded more than once per year.

(5) Nitrogen Dioxide. The Guam primary and secondary ambient air quality standard for nitrogen dioxide is:

100 ug/m$^3$ (0.053 ppm) - annual arithmetic mean concentration.

(6) Lead. The Guam primary and secondary ambient air quality standard for lead is:

1.5 ug/m$^3$ - maximum arithmetic mean averaged over a calendar quarter.

(b) The promulgation of these ambient air quality standards shall not be considered in any manner to allow significant deterioration of
existing air quality in any portion of Guam.

(c) All measurements of air quality are corrected to a reference temperature of 25 °C and to a reference pressure of 760 millimeters of mercury (1013.2 millibars).

(d) Measurements for Guam ambient air quality standards shall be determined using methods presented in 40 CFR Part 50, as amended, including the appropriate appendices, or any other method approved by the Administrator.

Section 1103.3. Visible emissions. (a) No person shall cause or permit the continuous emission of visible air pollutants of a density equal to or darker than twenty (20%) per cent opacity, except as provided in Subsections (b) and (c).

(b) Except as provided in Subsection (c), no person shall cause or permit the discharge into the atmosphere from any single source of emission, for a period aggregating not more than three (3) minutes in any sixty (60) minutes period, air pollutants of a density darker than sixty (60%) per cent opacity, except for operations specifically authorized by GEPA through a variance as provided in §1102.11.

(c) Emissions of uncombined water, such as water vapor, are exempt from the provisions of Subsections (a) and (b), and do not constitute a violation of this Section.

Section 1103.4. Fugitive Dust. (a) No person shall cause or permit visible fugitive dust to become airborne without taking reasonable precautions. Examples of reasonable precautions are:

(1) Use of water or suitable chemicals for control of fugitive
dust in the demolition of existing buildings or structures, construction and retrofitting operations, the grading of roads, or the clearing of land;

(2) Application of asphalt, water, or suitable chemicals on roads, material stockpiles, and other surfaces which may allow release of fugitive dust;

(3) Installation of appurtenances that provide an enclosure and ventilation for all crushing, aggregate screening, and conveying of material likely to become airborne;

(4) Installation and use of hoods, fans, and fabric filters to enclose and vent the handling of dusty materials. Reasonable containment methods shall be employed during sandblasting, spray painting, or other similar operations;

(5) Covering all moving, open-bodied trucks transporting materials which may release fugitive dust;

(6) Conducting agricultural operations, such as tilling of land and the application of fertilizers, in such manner as to reasonably minimize fugitive dust;

(7) Maintenance and sealing of road-ways and parking lots so as to prevent the exposure of such surfaces to wind, water, or vehicular travel erosion; and

(8) Prompt removal of earth or other materials from paved streets which have been transported there by trucking, earth-moving equipment, erosion, or other means.

(b) Except for persons engaged in agricultural operations or
persons who can demonstrate to the Administrator that the best practical
operation or treatment is being implemented, no person shall cause or
permit the discharge of visible fugitive dust beyond the property lot line on
which the fugitive dust originates.

Section 1103.5. Motor Vehicles - Importation. (a) No person
shall import any motor vehicle or motor vehicle engine into Guam, unless
such motor vehicle or motor vehicle engine is in accordance with the Air
Pollution Control Act as amended or is granted an exception under
Subsection (i) or (n).

(b) The importer or consignee shall declare to the Director in
duplicate on EPA Form 3520-1, and submit a copy to GEPA and the
Director, the following information:

   (1) The name and address of the importer and the consignee;
   (2) The make, model, and model year of the vehicle or
       engine;
   (3) The vehicle identification numbers of such vehicle or the
       serial number of such engine (if not chassis mounted);
   (4) The date of entry, the vessel or carrier of importation, the
       port or point of entry, and the entry number (where applicable); and
   (5) A statement that the motor vehicle belongs to one of the
categories of EPA Form 3520-1 or furnish to the Director a written
exception under Subsections(i) or (n).

(c) No person shall import a 1968, 1969, or 1970 model year motor
vehicle or motor vehicle engine without a certificate of conformity issued
by the United States Department of Health, Education and Welfare, or by
the USEPA or be granted an exception under Subsection (i) or (n).

(d) No person shall import a 1971 or subsequent year motor vehicle or motor vehicle engine without a certificate of conformity issued by USEPA and a certification label or be granted an exception under Subsection (i) or (n).

(e) The Director shall allow the importation of a motor vehicle or motor vehicle engine not covered by a certificate of conformity, if the motor vehicle or motor vehicle engine is being imported solely for the purpose of display and will not be sold or operated on Guam public streets or roads.

(f) The Director shall allow the importation of a motor vehicle or motor vehicle engine not covered by a certificate of conformity if the importer or consignee is a member of the armed forces of a foreign country, a member of the secretariat of a public international organization or a member of the personnel of a foreign government on assignment in Guam who come within a class of persons or whom free entry of motor vehicles has been authorized by the Department of State and the motor vehicle will not be sold.

(g) The Director shall allow the importation of a motor vehicle or motor vehicle engine not covered by a certificate of conformity if the importer or consignee is a nonresident of the United States importing such motor vehicle or motor vehicle engine for personal use for not more than one (1) year from date of entry, the motor vehicle or motor vehicle engine will not be sold and the motor vehicle or motor vehicle engine will be deported one year from date of entry.

(h) The Director shall allow the importation of a motor vehicle or
of Subsections (1) and (2) any engine family that he determines exhibits idle test results greater than forty percent (40%) under Subsection (1) or fifty-five percent (55%) under Subsection (2) when in good operating condition and adjusted to manufacturer's specifications. Such engine family(s) must comply with the technologically appropriate higher opacity standard determined by the Administrator from a review of the data obtained from engines in good operating condition and adjusted to manufacturer's specifications.

(4) The Administrator shall exempt from the requirements of Subsections (1) and (2) any 1991 and earlier model year diesel powered heavy duty vehicles equipped with carryover add-on after market turbocharger kits approved by GEPA, that he determines exhibit snap-idle test results greater than forty percent (40%) under Subsection (1) or Fifty-five (55%) percent under Subsection (2) when in good operating condition and adjusted to manufacturer's specifications. Such vehicles must comply with the technologically appropriate higher opacity standard determined by the Administrator from a review of the data obtained from engines in good operating condition and adjusted to manufacturer's specifications.

(5) In the event that a 1974 or later model-year diesel powered heavy-duty vehicle engine identification cannot be obtained by the inspector in order to determine the Federal smoke certification level, the owner, within thirty (30) days of the inspection, shall
provide GEPA with the engine identification information. If the owner fails to comply with this requirement, it is conclusively presumed for the purpose of compliance with this Section that the vehicle has a Federal peak smoke certification level equal to or less than thirty five percent (35%) peak smoke opacity and that the peak smoke opacity standard is forty percent (40%).

(6) The test procedures and smoke opacity measurement equipment shall comply with the standards and specifications of the Society of Automotive Engineers procedure J1667 "Snap-Acceleration Smoke Test Procedure for Heavy-Duty Diesel Powered Vehicles," Issued 1996-02, as updated, which is incorporated herein by reference.

(f) Responsibilities of drivers during test procedures.

(1) The driver of a diesel powered heavy-duty vehicle selected to undergo the inspection procedure shall do all of the following:

(A) Drive the vehicle to the inspection site upon direction of an officer;

(B) Perform the test procedure upon request by an inspector;

(C) Open the vehicle door so that the inspector can observe the driver depress the accelerator pedal;

(D) Permit an emission control system inspection upon the request of the inspector; and

(E) Sign the citation to acknowledge its receipt and the
smoke test results to acknowledge performance of the test procedure.

(2) The inspector in performing the inspection procedure shall do all of the following:

(A) If the driver refuses to submit to the inspection procedure, advise the driver that such refusal is a violation of these Standards and Regulations;

(B) Obtain engine identification information from a vehicle when tested pursuant to Subsection (e) to determine which opacity standard specified in Subsections (e)(1) and (e)(2) would apply;

(3) Issue a copy of the citation to the driver of a vehicle that fails the test procedure or the emission control system inspection; and

(4) Issue a warning to the owner of a diesel powered heavy-duty vehicle missing its emission control label that the engine serial or identification number must be provided to GEPA within thirty (30) days or it will be conclusively presumed that the vehicle has a certification level equal to or less than thirty five percent (35%) peak smoke opacity.

(g) For the purposes of Subsections (e) and (f), "inspector" and "officer" shall mean any authorized agent of the Administrator, including representatives of other government of Guam agencies, when an agreement is established between GEPA and the other agency which allows such authorizations.

(h) No person shall cause or permit the use of any motor vehicle
which becomes mechanically deficient so as to cause the emission of visible air pollutants greater than allowed in this Section.

(i) Penalties.

(1) Penalties shall not exceed One Thousand Dollars ($1,000.00) per day of violation.

(2) Failure to comply with this Section shall subject the owner to suspension or cancellation of the registration and inspection sticker for the vehicle by the Department of Revenue and Taxation.

(j) The violator can apply for waiver of prosecution by the Administrator, not to exceed forty five (45) days in duration. To be considered for a waiver, the violator shall immediately notify the Administrator of the deficiency, and provide a statement giving all pertinent facts, including the reason for the violation, the attempts made to correct the deficiency, any difficulties encountered when correcting the situation, and the estimated date of the correction of the deficiency.

Section 1103.7. Incineration. (a) No person shall cause or permit the emissions of particulate matter to exceed 0.20 pounds per one hundred pounds (two grams per kilogram) of refuse charged from any incinerator.

(b) All required emission tests shall be conducted at the maximum burning capacity of the incinerator or at other capacities, as approved by the Administrator.

(c) The burning capacity of an incinerator shall be the manufacturer's or designer's guaranteed maximum rate or such other rate as may be determined by the Administrator.
(d) For the purposes of this Section, the total of the capacities of all furnaces within one system shall be considered as the incineration capacity.

Section 1103.8. **Biomass Fuel Burning Boilers.** No person shall cause or permit the emissions of particulate matter from each biomass burning boiler and its drier or driers in excess of 0.40 pounds per one hundred pounds of biomass as burned.

Section 1103.9. **Process industries.** (a) No person shall cause or permit the emission of particulate matter in any one hour from any stack or stacks, except for incinerators and biomass fuel burning boilers, in excess of the amount determined by the equation \( E = 4.10 p^{0.67} \), where

\[ E = \text{rate of emission in pounds per hour, and} \]
\[ p = \text{process weight rate in tons per hour,} \]

except that no rate of emissions shall exceed forty pounds per hour regardless of the process weight rate.

(b) Process weight per hour is the total weight of all materials introduced into any specific process that may cause any emission of particulate matter through any stack or stacks. Solid fuels charged shall be considered as part of the process weight, but liquid and gaseous fuels and combustion air shall not. For a cyclical or batch operation, the process weight per hour shall be derived by dividing the total process weight by the number of hours in one complete operation from the beginning of any given process to the completion thereof, including any time during which the equipment is idle. For a continuous operation, the process weight per hour shall be derived for a typical period of time by the number of hours of the period.
(c) Where the nature of any process or operation or the design of any equipment is such as to permit more than one interpretation, the interpretation that results in the minimum value for the allowable emission shall apply.

(d) For purposes of this Section, a process is any method, reaction, or operation whereby materials introduced into the process undergo physical or chemical change. A specific process is one which includes all of the equipment and facilities necessary for the completion of the transformation of the materials to produce a physical or chemical change. There may be several specific processes in series necessary to the manufacture of a product. However, where there are parallel series of specific processes, the similar parallel specific processes shall be considered as a single specific process.

Section 1103.10. Sulfur Oxides from Fuel Combustion. (a) No person shall burn any fossil fuel containing in excess of two (2%) percent sulfur by weight, except for fuel used in ocean-going vessels.

(b) If there is an air quality violation attributable to a source(s) of sulfur dioxide (SO2) in a current or prior SO2 nonattainment area, the source(s) must permanently reduce either its/their fuel sulfur content or output capacity by the same percentage as the violation, (i.e. by the same percentage as the measured violation is in excess of an applicable federal SO2 ambient air quality standard). Accordingly, the reduced fuel, output, or emission limitation will become part of the modified operating permit.

(c) Power Plants within the Cabras/Piti area must comply with the Cabras/Piti Area Intermittent Control Strategy (CPAICS) as required by
the 69.11 (a)(3)(i) of 40 CFR Part 69 Subpart A, as amended, and any modification to the CPAICS approved by USEPA as defined in 69.11(a)(3)(ii).

(d) If compliance with these standards is to be accomplished by means of removal of sulfur dioxide from the flue gases, the owner or operator of the source must provide for the necessary monitoring equipment, and sample such emissions in accordance with methods specified by the Administrator.

Section 1103.11. Open Burning. (a) No person shall dispose of combustible material by open burning, or cause, suffer, allow, or permit open burning of combustible material within Guam, except as provided in Subsections (b) through (e).

(b) In areas where no public or commercial refuse collection service is available on the effective date of this regulation, open burning of refuse on residential premises, or refuse originating from dwelling units on premises, shall be allowed provided such burning does not violate any existing laws, standards, or regulations of Guam, until refuse collection becomes available.

(c) Exceptions herein may be allowed upon application and approval by the Administrator provided the burning is not prohibited by, or is conducted in compliance with, other applicable laws, Standards and Regulations. Exception to conduct open burning under the provision of this regulation does not excuse a person from the consequences, damages, or injuries which may result therefrom. The following are exceptions for which application may be make:
(1) Fires purposely set for the purpose of prevention of a fire hazard which cannot be abated by any other means;

(2) Fires set for instruction in the method of fighting fires;

(3) Fires for decorative, ceremonial and recreational purposes;

(4) The burning of hydrocarbons which must be wasted through the use of atmospheric flares or open burning;

(5) Fires for prevention or control of disease or pests;

(6) Fires for the disposal of dangerous material, where there is no alternate method of disposal; and

(7) Fires for the burning of leaves, grass, weeds, wood, paper, and similar material on one's own premises, not exceeding four (4) family units and twenty-five (25) pounds per day, per unit, provided such burning is:

   (A) Not within fifty (50) feet of any habitable building;

   (B) Attended or supervised by an adult;

   (C) Started and completed between 9:00 a.m. and 6:00 p.m. (and hour before sunset);

   (D) Not in violation of the rules of other fire control agencies;

   (E) Oils, rubber or other similar material which produce unreasonable amount of air pollutants may not be burned;

   (F) Meteorological conditions within the vicinity of the burning will allow good and proper diffusion and dispersion
of air pollutants;

(G) The piles of material to be burned shall be of such size that the burning will be completed within the time designated in §1103.11(c)(7)(C);

(H) The moisture content and composition of the material to be burned shall be favorable to good burning which will minimize air pollution; and

(I) The starter fuel and materials to be ignited shall not emit excessive visible emissions when burned.

(8) Fires for agricultural operations, forest management, range improvements. (Not in the violation of Forestry Division of the Department of Agriculture and any other affected Agencies.)

(d) Nothing in this Section shall be construed to prohibit or make unlawful the construction and use of barbecue pits, grills, or outdoor fire places for the preparation of food for human consumption, nor shall any permit from the Administrator be required therefor.

Section 1103.12. Control of Odors in Ambient Air. (a) No person shall discharge or cause to be discharged into the atmosphere from any source whatsoever, such quantities of odorous emissions which is injurious to health, or is indecent or offensive to the senses, which affects at the same time an entire community or neighborhood, or any considerable number of persons, so as to unduly interfere with the comfortable enjoyment of life or property of such community, neighborhood or persons. It is a creation of a condition which causes injury to the public welfare.
(b) An odor occurrence shall be deemed a violation when a complaint is received by the Administrator and the Administrator is able to detect the odor. This detection must be verified by the Department of Public Health, Environmental Health Section for a person to be found in violation of Subsection (a).

(c) The odor of growing vegetation, and chemical fertilizers and insecticides when used properly, or when persons can demonstrate to the Administrator that the best practical operation or treatment is being implemented, shall not be considered objectionable for the purposes of this Section.

Section 1103.13. Asbestos. (a) The national emission standard for asbestos, 40 CFR Part 61 Subpart M, as amended, is hereby incorporated by reference as amended in Subsections (b) through (d).

(b) Word and phrase substitutions:

(i) "Administrator" means the Administrator of the Guam Environmental Protection Agency or an authorized agent, officer, or inspector, except in 40 CFR Part 61 §§ 150(a)(4), 152(b)(3), and 154(d), as amended.

(ii) "Local, state or EPA Regional Office" means GEPA.

(iii) "Local, state or EPA Regional Office responsible for administering the asbestos NESHAP program" means GEPA.

(c) 40 CFR §61.145 shall be amended as follows:

(1) 40 CFR §61.145(a) shall read: "In a facility being demolished or renovated on Guam (except for facilities as described in (a)(3) of this Section, regardless of type (nonfriable or friable) or
quantity of the asbestos containing material, all of the requirements
of paragraphs (b) and (c) of this Section, and as amended, shall
apply."

(2) 40 CFR §61.145(a)(4)(v) shall be added and read: "For a
facility being renovated and the total amount of RACM is less than
paragraph (a)(4)(i) through (iv) of this Section, only the notification
requirements of paragraph (b) of §61.145 as amended shall apply."

(3) 40 CFR §61.145(a)(4)(vi) shall be added and read: "For
any renovation or demolition of asbestos not defined as RACM,
including any nonfriable asbestos, the Administrator should be
notified informed at least five (5) working days before the start date
of the abatement work, and the notification should be followed by a
written notification which should include all of the requirements of
§ 61.145(b)(4) and (5), and the estimated amount and type of asbestos
that is determined not to be RACM."

(4) 40 CFR §61.145(b)(6) shall be added and read: "An
Asbestos Removal and Control Procedure Plan must be prepared and
submitted to GEPA to show compliance with 40 CFR §61.145(c)."

(5) 40 CFR §61.145(b)(7) shall be added and read: "The
Asbestos Notification and Renovation required in paragraph (b)(5)
and the Control Procedure Plan required in paragraph (b)(6) of this
Section must be prepared and submitted to GEPA. A copy of the
Notification and the Control Procedure Plan must also be submitted
concurrently to the Department of Labor, Guam Occupational Safety
and Health Office (Guam OSH) for all asbestos removal projects
involving Government of Guam agencies.

(6) 40 CFR §61.145(b)(8) shall be added and read: "GEPA will not approve any Asbestos Removal or Demolition Notification and Control Procedure Plan submitted as required in Subsection (b)(7) for any government of Guam project or building without Guam OSH's concurrence."

(d) 40 CFR §61.150 shall be amended as follows:

(1) 40 CFR §61.150(d)(2) shall read "For all off-site disposal, provide a copy of the ACWM shipment record described in paragraph (d)(1) of this Section, to the disposal site owner or operators and to GEPA upon shipment by the contractor to an USEPA-approved landfill. In addition, a signed waste shipment record acknowledging receipt of the asbestos waste by the designated disposal facility must be furnished to GEPA within ten (10) working days of receipt of acknowledgment."

(2) 40 CFR §61.150(d)(3) shall read "Whenever a copy of the asbestos waste shipment record, signed by the owner or operator of the designated disposal facility, is not received by the waste generator within forty-five (45) days of the date the waste was accepted by the initial transporter, the asbestos waste generator must contact the initial transporter and/or the owner or operator of the designated disposal facility to determine the status of the waste shipment."

(e) The Asbestos Hazard Emergency Response Act. The regulations for asbestos containing material in schools, 40 CFR §763.80
through §763.99, as amended, and all accompanying appendices and references are hereby incorporated by reference as amended in this Subsection (f).

(f) In 40 CFR §763.85, asbestos containing material shall include friable and nonfriable asbestos containing building material.

(g) Asbestos Training:

(1) No person shall conduct any training on Guam under the Asbestos Hazard Emergency Response Act (AHERA) Model Accreditation Plan (MAP) unless the training is an approved AHERA Certified Training Provider in accordance to 40 CFR Part 763, Subpart E, Appendix C.

(2) Any person proposing to conduct any AHERA training on Guam must notify GEPA and provide adequate documentation verifying qualifications to conduct training under the AHERA program and the MAP Plan.

Section 1104. Permit Program Regulations.

Section 1104.1. Definitions. As used in this Section:

(a) "Administrative Permit Amendment" is a permit revision that:

(1) Corrects typographical errors;

(2) Identifies a change in the name, address, or phone number of any person identified in the permit, or provides a similar minor administrative change at the source;

(3) Requires more frequent monitoring or reporting by the permittee;

(4) Consolidates the terms and conditions of two (2) or more
air pollution control permits into one (1) air pollution control permit
for a facility;

(5) Allows for a change in ownership or operational control
of a source where GEPA determines that no other change in the
permit is necessary, provided that a written agreement containing a
specific date for transfer of permit responsibility, coverage, and
liability between the current and new permittees has been submitted
to the Administrator.

(b) "AP-42" means the most recent edition, supplements, and
appendices of USEPA's Compilation of Air Pollutant Emission Factors,
Volume 1: Stationary Point and Area Sources.

(c) "Applicable requirement" is defined as follows.

(a) If an air pollution emission source is a federal oversight source,
"applicable requirement" means all of the following as they apply to
emissions units in the air pollution emission source (including
requirements that have been promulgated or approved by USEPA through
rulemaking at the time of issuance but have future-effective compliance
dates):

(1) Any standard or other requirement provided for in the
applicable state implementation plan approved or promulgated by
USEPA, including any revision to that plan promulgated in 40 CFR
Part 52, as amended;

(2) Any term or conditions of any preconstruction permits
issued pursuant to regulations approved or promulgated through
rulemaking under Title I, including Parts C or D, of the Clean Air
(3) Any standard or other requirement under §111 of the Clean Air Act, including §111(d);

(4) Any standard or other requirement under §112 of the Clean Air Act, including any requirement concerning accident prevention under §112(r)(7) of the Act;

(5) Any requirements established pursuant to §504(b) or §114(a)(3) of the Clean Air Act;

(6) Any standard or other requirement governing solid waste incineration, under §129 of the Clean Air Act;

(7) Any standard or other requirement for consumer and commercial products, under §183(e) of the Clean Air Act;

(8) Any standard or other requirement for tank vessels under §183(f) of the Clean Air Act;

(9) Any standard or other requirement of the program to control air pollution from outer continental shelf sources, under §328 of the Clean Air Act;

(10) Any standard or other requirement of the regulations promulgated to protect stratospheric ozone under Title VI of the Clean Air Act, unless the USEPA Administrator has determined that such requirements need not be contained in an air pollution control permit; and

(11) Any national ambient air quality standard or increment or visibility requirement under part C of Title I of the Clean Air Act, but only as it would apply to temporary sources pursuant to §504(e)
of the Clean Air Act.

(b) For all other air pollution emission sources, "applicable requirement" shall mean all of the following as they apply to emissions units in the air pollution emission source:

(1) Any NAAQS or Guam ambient air quality standard;

(2) The application of best available control technology to control those pollutants subject to any NAAQS or Guam ambient air quality standard, but only as best available control technology would apply to new or proposed air pollution emission sources and modifications to air pollution emission sources that have the potential to emit or increase emissions above significant amounts considering any limitations, enforceable by the Administrator, on the air pollution emission source to emit a pollutant; and

(3) Any standard or other requirement provided in these Standards and Regulations.

(d) "Federal oversight source" means an air pollution emission source that is:

(1) A major source;

(2) Subject to standards of performance for air pollution emission sources as established in §1106; or

(3) Subject to an emission standard or other requirement for hazardous air pollutants pursuant to §112 of the Clean Air Act or §1107, with the exception of those sources solely subject to regulations or requirements pursuant to §112(r) of the Clean Air Act.

(e) "Insignificant source" means any air pollution emission
sources that can be classified as insignificant sources - Type I or
insignificant sources - Type II.

(f) "Insignificant Sources - Type I" means any air pollution
emission sources that include only the following sources of air pollutants:

(1) Any storage tank, reservoir, or other container of capacity
equal to or less than forty (40,000) thousand gallons storing volatile
organic compounds, except those storage tanks, reservoirs, or other
containers subject to any standard or other requirement pursuant to
§§111 and 112 of the Clean Air Act;

(2) Other than smoke house generators, fuel burning
equipment with a heat input capacity less than one (1,000,000)
million BTU per hour, except where the total heat input capacity of
all individually exempted equipment exceeds five (5,000,000) million
BTU per hour when operated within the facility and controlled by a
single owner or operator;

(3) Steam generators, steam superheaters, water boilers, or
water heaters, which have a heat input capacity of less than five
million BTU per hour, and are fired exclusively with natural,
synthetic, or liquefied petroleum gas, or any combination of these;

(4) Kilns used for firing ceramic ware heated exclusively by
natural gas, electricity, liquid petroleum gas, or any combination of
these and have a heat input capacity of five million BTU per hour or
less;

(5) Standby generators used by non-federal oversight
sources, that are used exclusively to provide electricity, standby
sewage pump drives, and other emergency equipment all of which are used only during power outages, emergency equipment maintenance and testing, and are fired exclusively by natural or synthetic gas; or liquefied petroleum gas; or fuel oil No. 1 or No. 2; or diesel fuel oil No. 1D or No. 2D, with a heat input capacity not exceeding 350,000 BTU/hr;

(6) Paint spray booths;

(7) Welding booths (if there are more than five (5) at the facility); and

(8) Portable diesel or gasoline fired industrial equipment less than two hundred horsepower in size which are used during power outages or intermittently for maintenance and repair purposes (if there are more than five at the facility).

(g) "Insignificant Sources - Type II" means any air pollution emission sources that include only the following sources of air pollutants:

(1) Welding booths (if there are five or less at the facility);

(2) Portable diesel or gasoline fired industrial equipment less than two hundred horsepower in size which are used during power outages or intermittently for maintenance and repair purposes (if there are five (5) or less at the facility);

(3) Hand held equipment used for buffing, polishing, carving, cutting, drilling, machining, routing, sanding, sawing, surface grinding, or turning of ceramic art work, precision parts, leather, metals, plastics, fiber board, masonry, carbon, glass, or work, provided reasonable precautions are taken to prevent particulate
matter from becoming airborne. Reasonable precautions include the use of dust collection systems, dust barriers, or containment systems;

(4) Laboratory equipment used exclusively for chemical and physical analyses;

(5) Containers, reservoirs, or tanks used exclusively for dipping operations for coating objects with oils, waxes, or greases where no organic solvents, diluents, or thinners are used; or dipping operations for applying coatings of natural or synthetic resins which contain no organic solvents;

(6) Closed tumblers used for cleaning or deburring metal products without abrasive blasting, and pen tumblers with batch capacity of one thousand pounds or less;

(7) Ocean-going vessels, except for ocean-going vessels subject to any standard or other requirement for the control of air pollution from outer continental shelf sources pursuant to 40 CFR Part 55, as amended;

(8) Fire water system pumps dedicated for fire-fighting and to maintain fire water system pressure, and fired exclusively by natural or synthetic; or liquefied petroleum gas; or fuel oil No. 1 or No. 2; or diesel fuel No. 1D or No. 2D;

(9) Smoke generating systems used exclusively for training in government or certified fire fighting training facilities;

(10) Mobile internal combustion engines;

(11) Diesel fired portable ground support equipment exclusively to start aircraft or provide temporary power to aircraft
prior to start-up;

(12) Fuel burning equipment which is used in a private
dwelling or for space heating, other than boilers or hot furnaces;

(13) Ovens, stoves, or grills used solely for the purpose of
preparing food for human consumption operated in private
dwellings, restaurants, or stores;

(14) Stacks or vents to prevent escape of sewer gasses through
plumbing traps into the interiors of structures;

(15) Air conditioning or ventilation systems not designed to
remove air pollutants generated by or released from equipment, and
that do not involve the open release or venting of CFC's into the
atmosphere; and

(16) Woodworking shops with a sawdust collection system.

(h) "Major Source" means an air pollution emission source, or a
group of air pollution emission sources that are located on one or more
contiguous properties or adjacent properties, and are under common
control or command of the same person or persons under common control,
belonging to a single major industrial grouping (i.e., all have the same two-
digit Standard Industrial Classification Code or other nationally recognized
and approved standard industrial classification code) and that emits or has
the potential to emit, considering controls:

(1) Any hazardous air pollutant, except radionuclides, in the
aggregate of ten tons per year or more including fugitive emissions,
or twenty-five tons per year or more of any combination including
fugitive emissions;
(2) One hundred tons per year or more of any air pollutant subject to regulation under the Clean Air Act or these Standards and Regulations. Fugitive emissions from the air pollution emission source shall be considered in determining whether the source is major, if it belongs to one of the following categories of air pollution emission sources:

(A) Coal cleaning plants (with thermal dryers);
(B) Kraft pulp mills;
(C) Portland cement plants;
(D) Primary zinc smelters;
(E) Iron and steel mills;
(F) Primary aluminum ore reduction plants;
(G) Primary copper smelters;
(H) Municipal incinerators capable of charging more than 250 tons of refuse per day;
(I) Hydrofluoric, sulfuric or nitric acid plants;
(J) Petroleum refineries;
(K) Lime plants;
(L) Phosphate rock processing plants;
(M) Coke oven batteries;
(N) Sulfur recovery plants;
(O) Carbon black plants (furnace process);
(P) Primary lead smelters;
(Q) Fuel conversion plants;
(R) Sintering plants;
(S) Secondary metal production plants;
(T) Chemical process plants;
(U) Fossil fuel boilers (or combination thereof) totaling more than 250 million BTU per hour heat input;
(V) Petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels;
(W) Taconite ore processing plants;
(X) Glass fiber processing plants;
(Y) Charcoal production plants;
(Z) Fossil fuel fired steam electric plants of more than 250 million BTU per hour heat input; and
(AA) All other air pollution emission source categories regulated by a standard promulgated pursuant to Section 111 or 112 of the Clean Air Act, but only with respect to those air pollutants that have been regulated for that category; or
(3) For radionuclides, major source shall have the meaning specified by the USEPA Administrator by rule.

(i) "Minor Source" means any air pollution emission source that exceed the parameters of Insignificant Sources - Type I or Type II.

(j) "Modification" means a physical change in or change in the method of operation of an air pollution emission source which requires a change to a permit. Routine maintenance, repair and replacement shall not be considered a modification.

(k) "Pollution prevention" means the reduction or elimination, through any measures, of the amount of pollutants produced or created at
"Significant modification" means a modification of a federal oversight source which:

1. Increases the emissions of any air pollutant above the permitted emission limits;
2. Results in significant increase in emissions of any air pollutant;
3. Violates an applicable requirement;
4. Involves significant changes to existing monitoring requirements or a relaxation or significant change to existing reporting or record keeping requirements in the permit. Any change to the existing monitoring, reporting, or record keeping requirements that reduces the enforceability of the permit is considered a significant change;
5. Requires or changes a case-by-case determination of an emission limitation or other standard, or a visibility or increment analysis;
6. Is a modification pursuant to any provision of Title I of the Clean Air Act.

"Transition period" means the three years following the effective date of these Standards and Regulations.

Section 1104.2. Applicability. (a) Except as provided in §1104.10, and Subsections (b) and (c) of this Section, no person may begin or continue construction, reconstruction, modification, relocation, or operation of an air pollution emission source without first obtaining a valid
air pollution control permit from the Administrator.

(b) An air pollution emission source is exempt from the requirements of Subsection (a) if it is not a federal oversight source or a minor source is included in at least two of the following categories:

(1) Sources with potential emissions of less than 1.0 tpy of each air pollutant and less than 1.0 tpy of each hazardous air pollutant;

(2) Kilns used for firing ceramic ware heated exclusively by natural gas, electricity, liquid petroleum gas, or any combination of these and have a heat input capacity of ten million BTU per hour or less;

(3) Gasoline service stations;

(4) Insignificant sources - type I; and

(5) Insignificant sources - type II.

(c) All sources and source categories that would be required to obtain an air pollution control permit solely because they are subject to the "Standards for Demolition and Renovation" pursuant to the "National Emission Standard for Asbestos," 40 CFR §61.145, as amended, must comply with the requirements of §1103.13.

(d) The air pollution control permit shall remain valid past the expiration date and the air pollution emission source shall not be in violation for failing to have an air pollution control permit, until the Administrator has issued or denied the renewal of the air pollution control permit, provided:

(1) A complete renewal application has been submitted and
the owner or operator acts consistently with the permit previously
granted, and the application on which it was based, and all plans,
specifications, and other information submitted as part of the
application; and

(2) The owner or operator has submitted to the
Administrator within the specified deadlines, all requested
additional information deemed necessary to evaluate or take final
action on the renewal application as described in §1104.6.

(e) The air pollution control permit shall not constitute, nor be
construed an approval of the design of the air pollution emission source.
The permit shall be issued in accordance with these Standards and
Regulations and it is the responsibility of the applicant to ensure
compliance with all applicable requirements in the construction and
operation of any air pollution emission source.

Section 1104.3. General conditions for considering applications.

(a) The Administrator shall approve an application for an air
pollution control permit if the applicant can show to the satisfaction of the
Administrator that all applicable provisions of these Standards and
Regulations will be complied with, including, as applicable:

(1) The maintenance and attainment of any NAAQS and any
Guam ambient air quality standard;

(2) General prohibitions and standards pursuant to §1103;

(3) Requirements for air pollution emission sources pursuant
to §1104;

(4) Applicable Standards of Performance for New Stationary
Sources (40 CFR Part 60, as amended), National Emission Standards for Hazardous Air Pollutants (40 CFR Part 61, as amended), or any other federal standard or other requirement established pursuant to the Clean Air Act.

(5) Special preconstruction requirements pursuant to §1105;

(6) Applicable standards of performance for air pollution emission sources pursuant to §1106; and

(7) Requirements for hazardous air pollutant sources pursuant to §1107.

(b) Any air pollution control permit, including permit renewals, and permit amendments for modifications may be issued only if all of the following conditions are met:

(1) The owner or operator has submitted a complete air pollution control permit application and has submitted all additional information requested by the Administrator;

(2) The Administrator has provided an opportunity for all applicable public participation requirements pursuant to §1104.19;

(3) The permit provides for compliance with all applicable requirements and contains applicable terms and conditions pursuant to §1104.12; and

(4) All applicable requirements for transmission of information to USEPA and USEPA oversight have been satisfied pursuant to §1104.15 and §1104.16.

Section 1104.4. Holding and Transfer of Permit. (a) Each air pollution control permit, or a copy thereof, shall be maintained at or near
the air pollution emission source for which the permit was issued and shall be made available for inspection upon the Administrator's request.

(b) No person shall willfully deface, alter, forge, counterfeit, or falsify an air pollution control permit.

(c) All air pollution control permits issued pursuant to these Standards and Regulations shall not be transferable, whether by operation of law or otherwise, either from one location to another or from one piece of equipment to another.

(d) All air pollution control permits issued pursuant to these Standards and Regulations shall not be transferable, whether by operation of law or otherwise, from one person to another without the approval of the Administrator.

Section 1104.5. Cancellation of an Air Pollution Control Permit.

(a) Within thirty (30) days of permanent discontinuance of the construction, modification, relocation, or operation of any permitted air pollution emission source, the discontinuance shall be reported in writing to the Administrator by a responsible official of the source.

(b) If construction authorized by an air pollution control permit is not commenced within eighteen (18) months after the air pollution control permit takes effect, is discontinued for a period of eighteen (18) months or more, or is not completed within a reasonable time, the air pollution control permit shall become invalid with respect to the authorized construction.

(c) Subsection (b) shall not apply to phased construction projects. Instead, each phase shall commence construction within eighteen (18) months of the projected and approved commencement dates in the permit.
(d) The Administrator may extend the specified periods upon a satisfactory showing that and extension is justified.

Section 1104.6. Air Pollution Control Permit Application.

(a) Except as stated in Subsection (b), applications for air pollution control permits shall be submitted to the Administrator on forms or format furnished or approved by the Administrator. The applicant shall submit sufficient information to enable the Administrator to make a decision on the application and to determine the fee requirements specified in §1104.21 through §1104.24.

(b) For air pollution emission sources required to obtain a federal operating permit under the provisions of 40 CFR Part 71, as amended, owners and operators may submit a copy of the federal permit application to the Administrator in place of forms furnished by the Administrator. The owner or operator must include with the application a form to calculate annual fees pursuant to §1104.23(l). All signatures required on the application forms must be original signatures.

(c) Applications for initial air pollution control permits shall include the following information:

(1) Identifying information about the air pollution emission source, including name, address, and phone number of:

(A) The company (or plant if different than the company),

(B) The owner and owner’s agent,

(C) The plant site manager or other contact, and

(D) The person responsible for record keeping, and the
(2) A description of the nature, location, design capacity, production capacity, production rates, fuels, fuel use, raw materials, and typical operating schedules to the extent needed to determine or regulate emissions; specifications and drawings showing the design of the source and plant layout; and a description of all processes and products by Standard Industrial Classification Code;

(3) Maximum emission rates, including fugitive emissions, of all regulated and hazardous air pollutants and all air pollutants for which the source is major from each emissions unit. Emission rates shall be reported in pounds per hour and tons per year and in such terms necessary to establish compliance consistent with the applicable requirements and standard reference test methods. All supporting emission calculations and assumptions shall also be provided;

(4) Identification and description of all points of emissions as required in (e) of this Section, in sufficient detail to establish the applicability of requirements of these Standards and Regulations, the Air Pollution Control Act, and the Clean Air Act. Information on stack parameters and any stack height limitations developed pursuant to §123 of the Clean Air Act shall also be provided;

(5) Identification and detailed description of air pollution control equipment and compliance monitoring devices or activities as planned by the owner or operator of the source, and to the extent of available information, an estimate of emissions before and after
controls;

(6) Current operational limitations or work practices, or for air pollution emission sources that have not yet begun operations, such limitations or practices which the owner or operator of the source plans to implement that affect emissions of any regulated or hazardous air pollutants at the source;

(7) All calculations and assumptions on which the information in paragraphs (2), (4), (5), and (6) is based;

(8) A copy of all current air pollution permits issued by GEPA or USEPA;

(9) A compliance plan pursuant to §1104.8 and compliance certification in accordance with §1104.9;

(10) Citation and description of all applicable requirements, a description of or reference to any applicable test method for determining compliance with each applicable requirement, and an explanation of all proposed exemptions from any applicable requirement;

(11) For new air pollution emission sources or significant modifications subject to the requirements of §1105, all analyses, assessments, monitoring, and other application requirements of §1105;

(12) For proposed or new major sources or significant modifications:

(i) A detailed schedule for construction of the source or modification;
(ii) For existing sources, an assessment of the ambient air quality impact of the air pollution emission source. The assessment shall include all supporting data, calculations and assumptions, and a comparison with the NAAQS;

(iii) For new sources and significant modifications which increase the emissions of any air pollutant or result in the emission of any air pollutant not previously emitted, an assessment of the ambient air quality impact of the new source or significant modification, with the inclusion of any available background air quality data. The assessment shall include all supporting data, calculations and assumptions, and a comparison with the NAAQS; and

(iv) An explanation of all proposed exemptions from any applicable requirement;

(13) At the request of the Administrator, the following information must also be submitted:

(i) A risk assessment of the air quality related impacts caused by the source or significant modification to the surrounding environment;

(ii) Results of source emission testing, ambient air quality monitoring, or both;

(iii) Information on other available control technologies; and

(iv) Other information deemed necessary to make a decision on the application or needed to implement and
enforce other applicable requirements of the Clean Air Act or
these Standards and Regulations, or to determine the
applicability of such requirements; and

(14) A certification by a responsible official of truth, accuracy,
and completeness of all submitted documents.

(d) Applications for renewals of air pollution control permits are
subject to the same requirements as an initial application including all
requirements of Subsection (c). If the source is a federal oversight source,
applications for renewal shall be submitted six (6) to eighteen (18) months
prior to permit expiration. For all other air pollution emission sources,
applications are due sixty (60) days prior to permit expiration. Late
applications shall be subject to penalties pursuant to §1104.25. Applicants
shall submit a statement certifying whether any changes have been made
in the design or operation of the source as proposed in the initial and any
subsequent permit applications. If changes have occurred or are being
proposed, the applicant shall provide a description of those changes such
as work practices, operations, equipment design, and monitoring
procedures, including the affected applicable requirements associated with
the changes and the corresponding information to determine the
applicability of all applicable requirements. If the application for renewal
has not been approved or denied in the time specified in Subsection (j), the
air pollution control permit and all its terms and conditions shall remain in
effect and not expire until the application for renewal has been approved
or denied, provided the applicant has submitted any additional
information within the reasonable deadline specified by the Administrator.
Identification of air pollution emission sources:

(1) Minor sources and Insignificant sources - Type I shall be identified in the air pollution control permit application. Insignificant sources - Type II need not be identified in the air pollution control permit application.

(2) The Administrator may request additional information on any minor or insignificant source to determine the applicability of, or to impose any applicable requirement, or to determine the fee requirements specified in §1104.24.

Applications for modifications of air pollution control permits are subject to the same requirements as an initial application including all requirements of Subsection (c). Applicants shall submit a description of the modification, identifying all proposed changes, including any changes to the source operations, work practices, equipment design, source emissions, or any monitoring, record keeping, and reporting procedures. Each change from the permit application for the existing air pollution control permit shall be identified on the application for the permit modification.

The Administrator shall not continue to act upon or consider an incomplete application. An application shall be determined to be complete only when all of the following have been complied with:

(1) All information required or requested pursuant to Subsections (a) through (f) have been submitted;

(2) All documents requiring certification have been certified pursuant to §1102.3;

(3) All applicable fees pursuant to §1104.21 through §1104.24
have been submitted; and

(4) The Administrator has certified that the application is complete.

(h) The Administrator shall notify the applicant in writing whether the application is complete within sixty (60) days of receipt of the application. Unless the Administrator requests additional information or notifies the applicant of incompleteness within sixty (60) days after receipt of an application, the application shall be deemed complete.

(i) During the processing of an application that has been determined or deemed complete, if the Administrator determines that additional information is necessary to evaluate or take final action on the application, the Administrator may request such information in writing and set a reasonable deadline for a response.

(j) Timeline for approval:

(1) For federal oversight sources, unless issuance is objected to by USEPA pursuant to §1104.16, the Administrator shall approve, or deny an application for an air pollution control permit within Twelve (12) months after receipt of a complete application for a new source or significant modification; within six (6) months after receipt of a complete application for an existing source; and within ninety (90) days after receipt of a complete application for a non-significant modification.

(2) For all other air pollution emission sources, the Administrator shall approve, conditionally approve, or deny an application for a air pollution control permit within six (6) months
after receipt of a complete application for a new source, and within
sixty (60) days after receipt of a complete application for an existing
source or modification.

(k) An air pollution control permit for a new source or a significant
modification shall be approved only if the Administrator determines that
the construction and operation of the new source or significant
modification will be in compliance with all applicable requirements.

Section 1104.7. Duty to Supplement or Correct Permit
Applications. Any applicant for an air pollution control permit who
fails to submit any relevant facts or who has submitted incorrect
information in any permit application shall, upon becoming aware of such
failure or incorrect submittal, promptly submit such supplementary facts
or corrected information. In addition, an applicant shall provide additional
information as necessary to address any requirements that become
applicable to the source after the date it filed a complete application but
prior to the release of the draft permit.

Section 1104.8. Compliance Plan. (a) A compliance plan
shall be submitted with each permit application, and at such other times as
requested by the Administrator.

(b) The owner or operator of an air pollution emission source shall
submit to the Administrator for approval a compliance plan which includes
at a minimum the following information:

(1) A description of the compliance status of the existing air
pollution emission source or proposed source with respect to all the
applicable requirements; and
(2) The following statement or description and compliance schedule, as applicable:

(A) For applicable requirements with which the source is in compliance, a statement that the source is in compliance and will continue to comply with such requirements;

(B) For applicable requirements which become applicable during the permit term, a statement that the source on a timely basis will meet all such applicable requirements. The statement shall include documentation on the proposed method the owner or operator plans to initiate to obtain compliance; and a compliance schedule demonstrating that the source will meet such applicable requirement by the date specified in the applicable requirement. A detailed schedule shall be provided if required by the applicable requirement; or

(C) For applicable requirements with which the source is not in compliance, a narrative description of how the source will expeditiously achieve compliance with all such applicable requirements; and a detailed compliance schedule containing specific milestones of remedial measures to obtain compliance, allowing for an enforceable sequence of actions. The schedule shall supplement and shall not sanction noncompliance with the applicable requirements on which the schedule is based.

(c) A progress report certified pursuant to §1102.3 shall be submitted to the Administrator no less frequently than annually and shall include:
(1) Dates for achieving the activities, milestones, or compliance, and dates when such activities, milestones, or compliance were achieved; and

(2) An explanation of why any dates in the schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.

Section 1104.9. Compliance Certification of Air Pollution Emission Sources. (a) A compliance certification shall be submitted with each initial permit application, and at such other times as requested by the Administrator. The responsible official of an emissions source shall submit to the Administrator a compliance certification which includes at a minimum the following information:

(1) A detailed description of the methods to be used in determining compliance with all applicable requirements, including any monitoring, record keeping, and reporting requirement and test methods;

(2) A schedule for submission of compliance certifications during the permit term; and

(3) A statement indicating the source’s compliance status with any applicable enhanced monitoring and compliance certification requirements, including the requirements of §114 (a)(3) of the Clean Air Act or any applicable monitoring and analysis provisions of §504 (b) of the Clean Air Act.

(4) Certified in accordance with §1102.3

(5) A compliance plan as described in §1104.8.
(b) During the permit term, the responsible official of an air pollution emission source shall also submit to the Administrator annually, or more frequently as set by any applicable requirement or permit condition, a compliance certification which includes at a minimum the following information:

1. The identification of each term or condition of the permit that is the basis of the certification;
2. The compliance status;
3. Whether compliance was continuous or intermittent;
4. The methods used for determining the compliance status of the source currently and over the reporting period;
5. Any additional information indicating the source's compliance status with any applicable enhanced monitoring and compliance certification including the requirements of §114(a)(3) of the Clean Air Act or any applicable monitoring and analysis provisions of §504(b) of the Clean Air Act;
6. A revised compliance plan; and
7. Any additional information as required by the administrator including information to determine compliance.

(c) The compliance certification may reference information contained in a previous compliance certification submittal to the Administrator, provided such referenced information has been certified as being current and still applicable.

Section 1104.10. Transition Period and Deadlines to Submit First Applications. (a) During the transition period, all owners or
operators of existing air pollution emission sources shall submit to the Administrator a complete initial air pollution control permit application according to the submission schedule in Appendix A.

(1) During the transition period, all existing air pollution emission sources with air pollution control permits shall remain valid past the expiration date until a new air pollution control permit is issued.

(2) During the transition period, all owners or operators of air pollution emission sources who have been operating, or has begun construction of an air pollution source without a valid air pollution control permit, shall submit to the Administrator a request to continue construction, modification, relocation, or operation within One Hundred Twenty (120) days from the effective date of these Standards and Regulations. The request must include initial start date of construction, modification, relocation, or operation, and justification for continuance, and show good faith effort to comply with (a) of this Section. The request must be submitted and signed by a Responsible Official and certified in accordance to §1102.3. Such approval shall not be construed as an approval for an air pollution control permit.

(3) During the transition period, all owners or operators who have applied for air pollution control permits before the effective date of these Standards and Regulations, but have not received air pollution control permits shall submit to the Administrator a request to continue construction, modification, relocation, or operation
within sixty (60) days from the effective date of these Standards and Regulations. The request must include initial start date of construction, modification, relocation, or operation, and justification for continuance, and show good faith effort to comply with (a) of this Section. The request must be submitted and signed by a Responsible Official and certified in accordance to §1102.3. Such approval shall not be construed as an approval for an air pollution control permit.

(4) During the transition period, all owners or operators of new or proposed air pollution emission sources who have not previously applied for an air pollution control permit shall submit to the Administrator a complete and timely air pollution control permit application. An air pollution control permit must be obtained prior to commencement of construction, modification, relocation, or operation.

(b) The written request for an extension shall be submitted at least thirty (30) days prior to the required submission date and shall include the following information:

(1) Justification for the extension, including a showing that reasonable effort and resources have been and are being utilized in the preparation of the application;

(2) Description of the problems being encountered and the reasons for any delays in meeting the application submittal deadline;

(3) The current status of the air pollution control permit application; and

(4) The projected completion date of the air pollution control
permit application.

(c) If the Administrator disapproves an extension for initial application submittal, the owner or operator shall meet the scheduled submission date. Under no circumstances shall the deadline for submitting an initial air pollution control permit application be extended twelve months from the effective date of these Standards and Regulations.

(d) All air pollution control permit applications, compliance plans, compliance certifications, and filing fees shall be submitted in accordance with §§1104.6, 1104.8, 1104.9 and 1104.21 through 1104.24.

Section 1104.11. Permit Term. An air pollution control permit shall be issued or renewed for a fixed term of five years unless the owner or operator of the air pollution emission source requests a shorter term, or the Administrator determines that a shorter term is warranted.

Section 1104.12. Permit Content. The Administrator shall consider and incorporate the following elements in air all pollution control permits, as applicable:

(1) Emission limitations and standards, including operational requirements and limitations to assure compliance with all applicable requirements at the time of permit issuance;

(2) Requirements regarding fugitive emissions regardless of whether the source category in question is included in the list of sources contained in the definition of "major source";

(3) The origin of and authority for each term or condition and any differences in form as compared to the applicable requirement upon which the term or condition is based;
(4) Permit term pursuant to §1104.11;

(5) Requirements for the installation of devices, at the expense of the owner or operator, for the measurement or analysis of source emissions or ambient concentration of air pollutants;

(6) The requirement for source emissions tests or alternative methodology to determine compliance with the terms and conditions of the air pollution control permit, and applicable requirements. Source emission tests conducted or alternative methodology used shall be at the expense of the owner or operator; and

(7) All monitoring and related record keeping and reporting requirements to assure compliance with all terms and conditions of the permit. Each air pollution control permit shall address the following with respect to monitoring, record keeping, and reporting:

(A) All reporting, emissions monitoring and analysis procedures, or test methods, required pursuant to the applicable requirements, including any procedures or methods promulgated pursuant to §114(a)(3) or §504(b) of the Clean Air Act;

(B) If the applicable requirement does not require periodic testing or instrumental or non-instrumental monitoring, periodic monitoring or record keeping sufficient to yield reliable data from the relevant time period that is representative of the source's compliance with the permit. Use of terms, test methods, units, statistical conventions used for these requirements shall be consistent with applicable
requirements;

(C) Monitoring results expressed in units, averaging periods, and other statistical conventions consistent with the applicable requirements;

(D) Requirements concerning the use, maintenance, and installation of monitoring equipment. The installation, operation, and maintenance of the monitoring equipment shall be at the expense of the owner or operator;

(E) Appropriate monitoring methods;

(F) Monitoring records including:

(i) Place as defined in the permit, date, and time of sampling or measurement;

(ii) Dates the analyses were performed;

(iii) The name and address of the company or entity that performed the analyses;

(iv) Analytical techniques or methods used;

(v) Analyses results; and

(vi) Operating conditions during the time of sampling or measurement;

(G) Other records including support information, such as calibration and maintenance record, original strip chart recordings or computer printouts for continuous monitoring instrumentation, and all other reports required by the Administrator;

(H) A requirement for the retention of records of all
required monitoring data and support information for a period of at least five (5) years from the date of the monitoring sample, measurement, report, or application. Support information includes all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation and copies of all reports required by the permit;

(I) A requirement for submission of reports of any required monitoring at least every six (6) months. Deviations from the permit requirements shall be clearly identified and addressed in these reports;

(J) A requirement for prompt reporting of deviations from permit requirements, including those attributable to upset conditions as defined in the permit, the probable cause of such deviations, and any corrective actions or preventive measures taken. The term "prompt" shall be delineated on a permit-by-permit basis in relation to the degree and type of deviation likely to occur and the applicable requirements; and

(K) Provisions for the owner or operator to annually report in writing, emissions of hazardous air pollutants;

(8) Pollution prevention audits and the implementation of pollution prevention measures to ensure that emissions are reduced or eliminated when feasible;

(9) General provisions including:

(A) A statement that the owner or operator shall
comply with all the terms and conditions of the air pollution control permit and that any permit noncompliance constitutes a violation of these Standards and Regulations and, for all federally enforceable terms or conditions, the Clean Air Act, and is grounds for enforcement action, permit termination, suspension, reopening, or amendment, or for denial of a permit renewal application;

(B) A Severability clause to ensure the continued validity of the various permit requirements in the event of a challenge to any portion of the permit;

(C) A statement that it shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity to maintain compliance with the terms and conditions of the permit;

(D) A statement that the permit may be terminated, suspended, reopened, or amended for cause pursuant to §1104.18. The filing of a request by the permittee for a permit termination, suspension, reopening, or amendment, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition;

(E) A statement that the permit does not convey any property rights of any sort, or any exclusive privilege;

(F) A provision that, if construction is not commenced, continued or completed in accordance with §1104.5 the air pollution control permit for the subject emission unit shall
become invalid;

(G) A provision that the owner or operator shall notify
the Administrator in writing of the anticipated date of initial
start-up for each emission unit of a new air pollution emission
source or significant modification not more than sixty (60) days
or less than thirty (30) days prior to such date. The
Administrator shall also be notified in writing of the actual
date of construction commencement and start-up within fifteen
(15) days after these dates;

(H) A statement that the owner or operator shall
furnish in a timely manner any information or record
requested in writing by GEPA to determine whether cause
exists for terminating, suspending, reopening, or amending the
permit, or to determine compliance with the permit. Upon
request, the permittee shall also furnish to the department
copies of records required to be kept by the permit. For
information claimed to be confidential, the Administrator may
require the permittee to furnish such records not only to GEPA
but also directly to USEPA with a claim of confidentiality;

(I) A requirement that a copy of applicable
correspondence or records submitted to GEPA be provided to
USEPA pursuant to §1104.15,

(J) A provision for the designation of confidentiality
of any records pursuant to §1102.7;

(K) A requirement that the owner or operator shall
submit fees in accordance with §1104.21 through §1104.24;

(L) Certification requirements pursuant to §1102.3;

(M) A requirement that the owner or operator allow the Administrator or an authorized representative, upon presentation of credentials or other documents required by law:

(i) To enter the owner or operator's premises where a source is located or emission-related activity is conducted, or where records must be kept under the conditions of the permit and inspect at reasonable times all facilities, equipment, including monitoring and air pollution control equipment, practices, operations, or records covered under the terms and conditions of the permit and request copies of records or copy records required by the permit; and

(ii) To sample or monitor at reasonable times substances or parameters to assure compliance with the permit or applicable requirements;

(10) Compliance plan and compliance certification submittal requirements pursuant to §§1104.8 and 1104.9;

(11) Any other provision to assure compliance with all applicable requirements; and

(12) Any other provision the Administrator imposes to further limit the construction and operation of the source. These conditions may include restrictions, control requirements,
performance standards normally reserved for air pollution emission sources with larger capacities than the air pollution emission source being permitted. In determining whether to impose more restrictive conditions, the Administrator shall consider the relevant circumstances of each individual case, including the availability of a reasonable control technology, cleaner fuels, or a less polluting operating process; the consideration of the existing air quality and the resulting degradation; the protection of the public health, welfare and safety; and any information, assumptions, limitations, or statements made in conjunction with a permit application.

Section 1104.13. Inspections.  (a) Every source required to obtain a permit pursuant to these Standards and Regulations shall be subject to regular inspections for compliance with all applicable requirements, these rules, and the terms and conditions of an emissions permit. Such inspections shall be conducted by any duly authorized officer, employee or representative of GEPA and shall take place at any reasonable time. No person shall refuse entry or access to any authorized representatives of GEPA who requests entry for purposes of inspection, and who presents appropriate credentials, nor shall any person obstruct, hamper or interfere with any such inspection.

(b) Inspections may include emission testing, monitoring, sampling and on-site inspections of facilities, equipment, practices, operations, or records required to be maintained according to the terms and conditions of an owner or operator's permit. Emission sources found to be in violation of an applicable requirement, these Standards and Regulations,
on any terms and conditions of a stationary air pollution source permit shall immediately take all appropriate actions to achieve compliance and shall be subject to all enforcement penalties and remedies provided by these Standards and Regulations.

Section 1104.14. Federally-Enforceable Permit Terms and Conditions. Terms and conditions included in an air pollution control permit, including any provision designed to limit a source’s potential to emit, are federally enforceable unless such terms, conditions, or requirements are specifically designated as not federally enforceable. Those terms and conditions left undesignated shall become federally enforceable upon permit issuance provided the USEPA Administrator does not object during the forty-five (45) day review pursuant to §1104.16. The permittee can petition USEPA to consider undesignated terms and conditions as not federally enforceable.

Section 1104.15. Transmission of Information to the USEPA.
(a) If the air pollution emission source is a federal oversight source:
   (1) The Administrator shall submit to the USEPA Administrator a copy of each proposed air pollution control permit and each final air pollution control permit, including administrative permit amendments,
   (2) The owner or operator shall simultaneously submit to the USEPA Administrator a copy of all air pollution control permit applications, including any application for renewal and amendments reflecting modifications submitted to the Administrator,
   (3) By agreement with the USEPA Administrator or
pursuant to federal regulation, the Administrator may waive the
requirements of this Section, or submit summaries for specific
categories of non-major air pollution emission sources.

(b) For all other air pollution emission sources, the Administrator
may at any time require the owner or operator to submit to the USEPA
Administrator a copy of any permit applications, including applications for
permit renewal and permit amendment, compliance plan, compliance
certification, or records required to be kept under the permit.

(c) GEPA shall maintain records on all air pollution control permit
applications, compliance plans, proposed and final permits, and other
relevant information for a minimum of five (5) years.

Section 1104.16. USEPA Oversight. (a) This Section applies
if the air pollution emission source is a federal oversight source;

(1) The Administrator shall not issue an air pollution control
permit, permit renewal, or permit amendment for a significant
modification, if the USEPA Administrator objects to its issuance in
writing within forty-five (45) days of receipt of the proposed air
pollution control permit and all necessary supporting information.

(2) The Administrator shall submit to the USEPA
Administrator an amended proposed air pollution control permit
within one hundred eighty (180) days after receipt of any written
objection from the USEPA Administrator. If objections are not
resolved within the one hundred eighty (180) days, USEPA shall
issue the air pollution control permit under 40 CFR Part 71.

Section 1104.17. Emergency Provision. (a) An emergency
constitutes an affirmative defense to any action brought for noncompliance
with any technology-based emission limitation, if it can be demonstrated
to the Administrator through properly signed, contemporaneous operating
logs, or other relevant evidence that:

(1) An emergency occurred and the owner or operator of the
    air pollution emission source can identify the cause or causes of the
    emergency;

(2) The permitted facility was at the time being properly
    operated;

(3) During the period of the emergency, the owner or
    operator of the air pollution emission source took all reasonable
    steps to minimize levels of emission that exceeded the emission
    limitations or other requirements in the air pollution control permit;
    and

(4) The owner or operator of the air pollution emission
    source submitted notice of the emergency to the Administrator
    within two (2) working days of the time when emission limitations
    were exceeded due to the emergency. This notice must contain a
    description of the emergency, any steps taken to mitigate emission,
    and corrective actions taken. Such notice shall satisfy the prompt
    reporting of deviations pursuant to §1102.9.

(b) In any proceedings for enforcement action, the owner or
    operator of the air pollution emission source seeking to establish the
    occurrence of an emergency has the burden of proof.

(c) This emergency provision is in addition to any emergency or
upset provision in any applicable requirement.

Section 1104.18. Permit Termination, Suspension, Reopening, and Amendment. (a) The Administrator, on the Administrator’s own motion or on the petition of any person for cause, may terminate, suspend, reopen, or amend any permit if, after affording the permittee an opportunity for a hearing in accordance with §1102.14 or §49111 of Chapter 49, Part 2, Division 2, Part 1 of Title 10 of the Guam Code Annotated the Administrator determines that:

(1) The permit contains a material mistake made in establishing the emissions limitations or other requirements of the permit;

(2) Permit action is required to assure compliance with the requirements of the Clean Air Act; the Air Pollution Control Act, or these Standards and Regulations;

(3) Permit action is required to address additional requirements of the Clean Air Act; the Air Pollution Control Act, or these Standards and Regulations;

(4) There is a violation of any condition of the permit;

(5) The permit was obtained by misrepresentation or failure to disclose fully all relevant facts;

(6) The source is not constructed or operated in accordance with the application for the air pollution control permit and any information submitted as part of the application;

(7) There is a change in any condition that requires either a temporary or permanent reduction or elimination of the permitted
(8) More frequent monitoring or reporting by the permittee is required; or

(9) Such is in the public interest, as determined pursuant to §49107(d) of Chapter 49, Part 2, Division 2, Part 1 of Title 10 of the Guam Code Annotated.

(b) The Administrator shall reopen and amend an air pollution control permit if the Administrator determines that any one of the following circumstances exists:

(1) Additional applicable requirements pursuant to the Clean Air Act or these Standards and Regulations become applicable to a major air pollution emission source with a remaining permit term of three (3) or more years. Such permit reopening shall be completed not later than eighteen (18) months after promulgation or adoption of the applicable requirement. No such permit reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the expiration date of the original permit or any of its terms and conditions has been extended pursuant to §1104.6;

(2) The permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit; or

(3) The permit must be terminated, suspended, or amended to assure compliance with the applicable requirements.

(c) Procedures to reopen and amend an air pollution control
permit shall be the same as procedures which apply to initial permit issuance in accordance with §1104.6 and shall affect only those parts of the permit for which cause to reopen exists. Such reopening shall be made as expeditiously as practicable.

(d) The Administrator shall provide written notification to the permittee on the reopening of the permit indicating the basis for reopening at least thirty (30) days prior to the reopening date, except that the Administrator may provide a shorter time period if it is determined that immediate action on the reopening of the permit is required to prevent an imminent peril to public health and safety or the environment.

(e) If requested by the Administrator, the owner or operator of an air pollution emission source shall submit a permit application or information related to the basis of the permit reopening or those provisions affected by the reopening within thirty (30) days of receipt of the permit reopening notice. An extension for the application submittal may be granted by the Administrator if the owner or operator can provide adequate written justification for such an extension.

(f) Upon program approval, if the USEPA Administrator notifies the Administrator of any cause to terminate, suspend, reopen, or amend a permit issued to a federal oversight source, the Administrator shall submit to USEPA Administrator within one hundred eighty (180) days of receipt of such written notification, or within such other times as required by the USEPA, a proposed determination of termination, suspension, reopening, or amendment as appropriate.

(g) Upon program approval, if the USEPA Administrator objects
to the Administrator's proposed determination referenced in Subsection (f), the Administrator shall terminate, suspend, reopen, or amend the permit in accordance with the USEPA Administrator's objection within one hundred eighty (180) days from receipt of a written objection.

Section 1104.19. Public Participation. (a) If the air pollution emission source is a federal oversight source, the Administrator shall provide for public notice, an opportunity for public comment on all draft permits except administrative permit amendments and amendments reflecting non-significant modifications, and the method by which a public hearing can be requested. Any person requesting a public hearing shall do so during the public comment period. Any request from a person for a public hearing shall indicate the interest of the person filing the request and the reasons why a public hearing is warranted. Such hearings shall be held in accordance with the Administrative Adjudication Law.

(b) For all other air pollution emission sources, when considering the issuance of any air pollution control permit, the Administrator shall provide for public notice and an opportunity for public comment on all draft permits except administrative permit amendments. If substantial comments are received, the Board will determine whether a public hearing should be scheduled. The Board will take into consideration the interest of the person making the comments. Such hearings shall be held in accordance with the Administrative Adjudication Law.

(c) Procedures for public notice, public comment periods, and public hearings shall be as follows:

(1) The Administrator shall make available for public
inspection in at least one location:

(A) Information on the subject matter;
(B) Information submitted by the applicant, except for confidential information pursuant to §1102.7;
(C) GEPA’s analysis and proposed action; and
(D) Other information and documents determined to be appropriate by GEPA;

(2) Notification of a public hearing shall be given at least thirty (30) days in advance of the hearing date;

(3) A public comment period shall be no less than thirty (30) days following the date of the public notice for federal oversight sources and seven (7) working days following the date of the public notice for all other sources. During the public comment period, interested persons may submit to GEPA written comments on:

(A) The subject matter;
(B) The application;
(C) GEPA’s analysis
(D) The proposed actions; and
(E) Other considerations as determined to be appropriate by GEPA;

(4) Notification of a public comment period or a public hearing shall be made:

(A) By publication in a newspaper of general circulation which is printed and issued at least twice weekly;
(B) To persons on a mailing list developed by the
Administrator, including those who request in writing to be on
the list; and

(C) If necessary by other means to assure adequate
notice to the affected public;

(5) Notice of public comment and public hearing shall
identify:

(A) The affected facility;
(B) The name and address of the permittee;
(C) The name and address of the agency of the
permitting authority processing the permit;
(D) The activities involved in the permit action;
(E) The emissions change involved in any permit
modification;

(F) The name, address, and telephone number of a
person from whom interested persons may obtain additional
information, including copies of the draft permit, the
application, all relevant supporting materials including any
compliance plan, and monitoring and compliance certification
reports, and all other material available to GEPA that are
relevant to the permit decision, except for information that is
determined to be confidential;

(G) A brief description of the comment procedures;

(H) The time and place of any hearing that may be
held, including a statement of procedures to request a hearing
if one has not already been scheduled; and
(I) The availability of the information listed in Paragraph (1), and the location and times the information will be available for inspection; and

(6) The Administrator shall maintain a record of the commentors and the issues raised during the public participation process and shall provide this information to USEPA upon request.

Section 1104.20. Administrative Permit Amendment. (a) The Administrator, on the Administrator's sole motion or upon written request from the owner or operator of an air pollution emission source, may issue an administrative permit amendment.

(b) Except for a request to consolidate two (2) or more air pollution control permits into one or to change ownership or operation control, an owner or operator requesting an administrative permit amendment may make the requested change immediately upon submittal of the request.

(c) Within sixty (60) days of receipt of a written request for an administrative permit amendment, the Administrator shall take final action on the request and may amend the permit without providing notice to the public provided the Administrator designates any such permit amendments as having been made pursuant to this Section.

(d) For federal oversight sources, GEPA shall submit a copy of the administrative permit amendment to USEPA.

Section 1104.21. General Fee Provisions. (a) Every applicant for an air pollution control permit shall pay application fees as set forth in §1104.23

(b) Every owner or operator of an air pollution emission source
shall pay annual fees as set forth in §1104.24.

(c) All application and annual fees collected pursuant to these Standards and Regulations shall be used to supplement the Air Pollution Control Special Fund pursuant to §1104.22.

(d) All application and annual fees for air pollution emission sources required by this Section shall be submitted by check or money order made payable to Treasurer of Guam c/o Air Pollution Control Special Fund, and are not refundable.

(e) Checks returned for any reason shall be considered a failure to pay. Returned checks are subject to an additional Fifty Dollars ($50.00) handling charge. If a returned check results in a late payment, the owner or operator shall be assessed a late payment penalty in accordance with §1104.25.

Section 1104.22. Air Pollution Control Special Fund. (a) All permit application fees, annual emission fees, fines, penalties, bail forfeitures, and other funds collected or received into the Air Pollution Control Special Fund shall be used solely for the costs of administration and implementation of the Act; for providing staff and resources to: assist permit applicants with the application process, review and act upon permit applications, write permits, implement and enforce permit conditions including legal support, prepare guidance and rules, prepare emission inventories, monitor air quality, inspect facilities to ensure compliance and offer assistance with pollution prevention alternatives, provide technical assistance to permittees, administer the fund, and any other duties needed to administer the Act.
(b) The Administrator shall maintain independent records and accounts of all revenues and expenditures of the Air Pollution Control Special Fund.

(c) By July 1 of each year the Administrator shall determine what base rate shall be used to calculate annual fees for the following calendar year pursuant to §1104.24(f). The base rate shall be set such that projected revenues generated from annual fees shall equal the total projected program cost minus the total projected revenues from all revenue sources except for annual fees (i.e., application fees, penalties, etc.) for that year. The base rate shall be calculated in dollars per ton of pollutant and shall be rounded up to the next whole dollar.

(d) If the Administrator determines that the base rate for the following calendar year must be raised by more than One Dollar ($1.00) per ton of pollutant above the current year's base rate, or if the base rate shall be raised above Eight Dollars ($8.00) the Administrator shall provide for public notice, including the method by which a public hearing can be requested, and an opportunity for public comment. The applicable procedural requirements of §1104.19 shall be used for public notice, public comment periods, and public hearings.

Section 1104.23. Application Fees for Air Pollution Emission Sources. (a) Application fees shall be submitted with the air pollution control permit application and shall not be refunded or applied to any subsequent application. No air pollution control permit application shall be deemed complete unless the application fee is paid in full.

(b) If an air pollution emission source can be categorized under
two (2) or more types of sources listed in the fee schedule of Subsection (c), the owner or operator of that source shall pay the highest application fee that is applicable to the source.

(c) The fee schedule for filing an air pollution control permit application shall be as follows:

(1) Sources subject to the requirements of §1105:
   (A) Initial permit for an existing Major PSD source: $1,000
   (B) Initial permit for an existing Major NAA source: $1,000
   (C) Initial permit for a new PSD source: $3,000
   (D) Initial permit for a new NAA source: $3,750
   (E) Non-Significant Modification: $500
   (F) Significant Modification: $1,000
   (G) Administrative permit amendment: $1,000
   (H) Permit Renewal: $1,000

(2) Sources subject to the requirements of §1106, and are major sources:
   (A) Initial permit for an existing air pollution emission source: $1,000
   (B) Initial permit for a new air pollution emission source: $1,500
   (C) Permit Renewal: $1,000
   (D) Administrative permit

\(^1\) As defined in Section 5
amendment:

(5) Non-Significant Modification: $500
(6) Significant Modification: $1,000

(B) and are not major sources:

(i) Initial permit for an existing air pollution emission source: $500
(ii) Initial permit for a new air pollution emission source $750
(iii) Permit Renewal: $500
(iv) Administrative permit amendment $100
(v) Non-Significant Modification $250
(vi) Significant Modification $500

(3) Sources subject to the requirements of §1107,

(A) and are major sources of hazardous air pollutants,

(i) Initial permit for an existing air pollution emission source: $1,000
(ii) Initial permit for a new air pollution emission source $3,750
(iii) Permit Renewal: $1,000
(iv) Administrative permit amendment $100
(v) Non-Significant Modification $750
(vi) Significant Modification $3,750

(B) and are not major sources of hazardous air
pollutants,

(i) Initial permit for an existing air pollution emission source: $200

(ii) Initial permit for a new air pollution emission source $300

(iii) Permit Renewal: $200

(iv) Administrative permit amendment $25

(v) Non-Significant Modification $100

(vi) Significant Modification $300

(4) All other major sources:

(A) Initial permit for an existing air pollution emission source: $1,000

(B) Initial permit for a new air pollution emission source $1,500

(C) Permit Renewal: $1,000

(D) Administrative permit amendment $100

(E) Non-Significant Modification $750

(F) Significant Modification $1,000

(5) All other non-major sources:

(A) Initial permit for an existing air pollution emission source: $100

(B) Initial permit for a new air pollution emission source $150

(C) Permit Renewal: $100
(D) Administrative permit amendment $50

(E) Modification $100

(d) If a modification changes the classification of an air pollution emission source, the application fee shall equal the higher of the following:

(1) The fee for a modification of an air pollution emission source in the original category of the modified source (i.e. the category prior to the modification); and

(2) The fee for an initial permit for a new air pollution emission source in the category of the modified source after the modification.

(e) Application fees for an administrative permit amendment shall be assessed only if the administrative change is requested by the owner or operator of the air pollution emission source.

Section 1104.24. Annual Fees for Air Pollution Emission Sources.

(a) Annual fees shall be paid in full within sixty (60) days after the end of each calendar year and within thirty (30) days after the permanent discontinuance of the air pollution emission source.

(b) The Administrator, upon written request from the owner or operator of an air pollution emission source, may extend the annual fee submittal deadline if the Administrator determines that reasonable justification exists for the extension. The written request for an extension shall be submitted at least fifteen (15) days prior to the required submission due date, and include the following information:

(1) Justification for the extension, including a showing that reasonable effort and resources have been and are being utilized in
the calculation of annual emissions and the corresponding annual fee as calculated pursuant to this Section;

(2) Description of the problems being encountered and reasons for any delays in meeting the annual fee deadline;

(3) The current status of emission calculations; and

(4) The projected date of submitting the annual fee.

If the Administrator disapproves an extension for the annual fee submittal, the owner or operator shall pay the required annual fees within thirty (30) days of receipt of the disapproval notification or the original submittal deadline, whichever is later. If the Administrator approves an extension for the annual fee submittal, the owner or operator shall pay the required annual fees by the extended approved date. Any part of the annual fee that is not paid within the required time shall at once be assessed the late penalty fee pursuant to §1104.25.

(c) Except as provided in Subsection (m), annual fees due within sixty (60) days after the end of each calendar year shall be based upon the calculated tons of regulated air pollutants emitted during the prior calendar year in which the annual fees are due.

(d) Except as provided in Subsection (m), annual fees due within thirty (30) days after the permanent discontinuance of the air pollution emission source shall be based upon the calculated tons of regulated air pollutants emitted after the last calendar year for which annual fees were paid.

(e) Annual fees shall be assessed for each ton of regulated air pollutant emitted by an air pollution emission source except for:
1. Carbon monoxide emissions;
2. Fugitive emission if fugitive emission is not included in the applicable requirements or AP-42;
3. Emissions from insignificant sources - Type I and insignificant sources - Type II; and
4. The dollar per ton charge for each regulated air pollutant emitted by air pollution emission sources shall be as follows:
5. For hazardous air pollutants the rate per ton shall equal ten (10) times the base rate;
6. For the first four thousand (4,000) tons of non-hazardous air pollutants emitted per year the rate shall equal the base rate; and
7. For non-hazardous air pollutants emitted in excess of four thousand (4,000) tons per year the rate shall equal one half of the base rate.
8. For the calendar year 1999 the base rate shall be Six Dollars ($6.00) per ton. For federal oversight sources, the minimum annual fee shall be Five Hundred Dollars ($500.00) for each valid air pollution control permit held during the prior calendar year, or Forty Two Dollars ($42.00) per month for any fraction of the year the permit is valid after the last calendar year for which annual fees were paid. For non-federal oversight sources the minimum annual fee shall be One Hundred Dollars ($100.00) for each valid air pollution control permit held during the prior calendar year, or Eight Dollars ($8.00) per month for any fraction of the year the permit is valid after the last calendar year for which annual fees were paid. For years after calendar year 1999, the rate shall be determined by the
Administrator pursuant to §1104.22(c). The submittal of annual fees shall begin in calendar year 2000 for all regulated air pollutants emitted during calendar year 1999.

(h) The calculated emissions in tons per year shall be determined by using the following parameters:

(1) An emission factor derived from the allowable emission rate;

(2) The actual production, operating hours, amount of materials processed or stored, or fuel usage of the air pollution emission source during the prior calendar year the annual fees are due, as applicable; and

(3) If not already considered in the allowable emission rate, a percentage reduction factor based upon the efficiency of the air pollution control equipment. Other operating parameters of the air pollution emission source may be used in the fee calculation if approved by the Administrator.

(i) The allowable emission rate referenced in Subsection (h)(1) is based upon the emission rate specified in an air pollution control permit or applicable requirement. If the allowable emission rate is not specified in the air pollution control permit or applicable requirement, the appropriate AP-42 air pollutant emission factor shall be used to determine the calculated emissions in tons per year.

(j) The parameters referenced in Subsection (h)(2) shall be based upon verifiable documentation presented by the owner or operator of the air pollution emission source. If an owner or operator of an air pollution
emission source cannot provide verifiable documentation on the parameters referenced in Subsection (h)(2), the maximum allowable production, operating hours, amount of material processed or stored, or fuel usage shall be used in calculating the total annual tonnage of regulated air pollutants emitted from the air pollution emission source. Any fraction of a ton calculated shall be rounded up to the next whole ton to obtain the annual tonnage of each regulated air pollutant subject to annual fees.

(k) The percentage reduction factor referenced in Subsection (h)(3) shall be based upon the percentage reduction provided by AP-42 or an applicable requirement. The Administrator shall establish the appropriate percentage reduction factor, and may adjust the reduction factor based on actual performance of the air pollution control equipment.

(l) Annual fees shall be calculated on fee worksheets furnished by the Administrator. If a fee worksheet is not provided for a particular air pollution emission source, the owner or operator of an air pollution emission source shall provide the worksheet, showing the method, assumptions, emission factors, and calculations used to obtain the calculated emission in tons per year, for each regulated air pollutant emitted.

(m) The annual fee for air pollution emission sources required by USEPA to obtain a federal operating permit under the provisions of 40 CFR Part 71, as amended, shall be reduced by the annual fee amount owed to the federal government. If the annual amount owed to the federal government exceeds the annual fee calculated in Subsections (e) through (l), no annual fee shall be due to GEPA.
Section 1104.25. Penalties and Remedies. (a) Any person who violates any provision of these Standards and Regulations, or any term or condition of a permit shall be subject to the penalties and remedies provided for in §49116 of Chapter 49, Part 2, Division 2, Part 1 of Title 10 of the Guam Code Annotated.

(b) If any part of the annual fee is not paid within thirty (30) days after the due date, a late payment penalty of five per cent (5%) of the amount due shall at once accrue and be added thereto. Thereafter, on the first day of each calendar month during which any part of the annual fee or any prior accrued late payment penalty remains unpaid, an additional late payment penalty of five per cent (5%) of the then unpaid balance shall accrue and be added thereto.

(c) If any annual fee, including the late payment penalty required by these Standards and Regulations is not paid in full within thirty (30) days after the due date, the Administrator may terminate or suspend any or all of the owner or operator's air pollution control permits, after affording the opportunity for a hearing in accordance with §1104.19 or §1102.14.

(d) If any application for permit renewal is submitted after the due date, a late penalty of ten per cent (10%) of the permit application fee shall at once accrue and be added thereto. Thereafter, after every twenty (20) day period during which any part of the application fee or any prior accrued late payment penalty remains unpaid, an additional late payment penalty of ten per cent (10%) of the then unpaid balance shall accrue and be added thereto.
If an application for permit renewal is submitted more than thirty (30) days after the due date, the Administrator may delay issuance of the permit renewal beyond the expiration date of the existing permit, thereby suspending permission to the owner or operator of the air pollution emission source of any rights granted in the air pollution control permit to emit air pollution.

Section 1105 - Special Preconstruction Requirements.

Section 1105.1. Definitions. For purposes of this Section, the following definitions apply, unless clearly designated otherwise:

(a) "Actual emissions" means the actual rate of emissions of a pollutant from an emissions unit. In general, actual emissions as of a particular date shall equal the average rate, in tons per year, at which the unit actually emitted the pollutant during a two-year period which precedes the particular date and which is representative of normal source operation. The Administrator shall allow the use of a different time period upon a determination that it is more representative of normal source operation. Actual emissions shall be calculated using the unit's actual operating hours, production rates, and types of materials processed, stored, or combusted during the selected time period. The Administrator may presume that source specific allowable emissions for the unit are equivalent to the actual emissions of the unit. For any emissions unit which has not begun normal operations on the particular date, actual emissions shall equal the potential to emit of the unit on that date.

(b) "Baseline" means the total of all emissions from air pollution emission sources and mobile sources in a non-attainment area, including
all proposed sources which have obtained air pollution control permits. The baseline is the regulatory emissions limit in effect when a completed air pollution control permit application subject to this Section is submitted.

The emission rate for each source (used to calculate the baseline) shall be the potential emission rate taking into account all applicable emissions limitations. When emission limitations for a NAA pollutant allow greater emission than the potential emission rate of the source, the emission rate for a source shall be the potential emission rate. When actual emissions for a NAA pollutant are less than allowable emissions under the Guam implementation plan or any federally enforceable permit conditions, the emission rate shall be the actual emission rate.

(c) "Begin actual construction" means, in general, initiation of physical on-site construction activities on an emissions unit which are of a permanent nature. Such activities include installation of building supports and foundations, laying underground pipework, and construction of permanent storage structures. With respect to a change in method of operations, this term refers to those on-site activities other than preparatory activities which mark the initiation of the change.

(d) "Lowest achievable emission rate" means, for any source, the more stringent rate of emissions based on the following:

(1) The most stringent emissions limitation which is contained in the implementation plan of any State for such class or category of the air pollution emission source, unless the owner or operator of the proposed air pollution emission source demonstrates that such limitations are not achievable; or
(2) The most stringent emission limitation which is achieved in practice by such class or category of air pollution emission sources. This limitation, when applied to a modification, means the lowest achievable emission rate for the new or modified emissions units within an air pollution emission source. In no event shall the application of the term permit a proposed new or modified air pollution emission source to emit any pollutant in excess of the amount allowable under an applicable standard of performance pursuant to §1106.

(e) "Major NAA modification" means any physical change in or change in the method of operation of a major NAA source that would result in a significant net emissions increase of any pollutant subject to regulations approved pursuant to the Clean Air Act or these Standards and Regulations. Any net emissions increase that is significant for volatile organic compounds shall be considered significant for ozone. A physical change or change in the method of operation shall not include:

1. Routine maintenance, repair, and replacement;
2. Use of an alternative fuel or raw material by reason of an order pursuant to §§2(a) and 2(b) of the federal Energy Supply And Environmental Coordination Act of 1974 or any superseding legislation or by reason of a natural gas curtailment plan pursuant to the Federal Power Act;
3. Use of an alternative fuel by reason of an order or regulation pursuant to §125 of the Clean Air Act;
4. Use of an alternative fuel at a steam generating unit to
the extent that the fuel is generated from municipal solid waste;

(5) Use of an alternative fuel or raw material by an air
pollution emission source which:

(A) The source was capable of accommodating before
July 1, 1979, unless such change would be prohibited pursuant
to any federally enforceable permit condition which was
established after January 1, 1979, pursuant to 40 CFR §52.21, as
amended, or under regulations approved pursuant to 40 CFR
Part 51 Subpart I, as amended, or 40 CFR §51.166, as amended; or

(B) The source is approved to use under any permit
issued under regulations approved pursuant to 40 CFR Part 51
Subpart I, as amended;

(6) An increase in the hours of operation or in the production
rate, unless such change would be prohibited under any federally
enforceable permit condition which was established after July 1, 1979,
pursuant to 40 CFR §52.21, as amended, or under regulations
approved pursuant to 40 CFR Part 51 Subpart I, as amended, or 40
CFR §51.166, as amended; or

(7) Any change in ownership of an air pollution emission
source.

(f) "Major NAA source" means, with respect to air pollution
emission sources located in nonattainment areas:

(1) Any air pollution emission sources which emits, or has
the potential to emit, one hundred (100) tons per year or more of any
pollutant subject to regulation approved pursuant to the Clean Air Act or these Standards and Regulations;

(2) Any physical change that would occur at an air pollution emission source not otherwise qualifying under this definition as a major NAA source, if the changes would constitute a major NAA source by itself. A major NAA source that is major for volatile organic compounds shall be considered major for ozone. The fugitive emissions of an air pollution emission source shall not be included in determining whether the source is a major NAA source, unless the source belongs to one of the following categories of air pollution emission sources:

(A) Coal cleaning plants (with thermal dryers);
(B) Kraft pulp mills;
(C) Portland cement plants;
(D) Primary zinc smelters;
(E) Iron and steel mills;
(F) Primary aluminum ore reduction plants;
(G) Primary copper smelters;
(H) Municipal incinerators capable of charging more than 250 tons of refuse per day;
(I) Hydrofluoric, sulfuric, or nitric acid plants;
(J) Petroleum refineries;
(K) Lime plants;
(L) Phosphate rock processing plants;
(M) Coke oven batteries;
(N) Sulfur recovery plants;

(O) Carbon black plants (furnace process);

(P) Primary lead smelters;

(Q) Fuel conversion plants;

(R) Sintering plants;

(S) Secondary metal production plants;

(T) Chemical process plants;

(U) Fossil fuel boilers (or combination thereof) totaling more than 250 million BTU per hour heat input;

(V) Petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels;

(W) Taconite ore processing plants;

(X) Glass fiber processing plants;

(Y) Charcoal production plants;

(Z) Fossil fuel fired steam electric plants of more than 250 million BTU per hour heat input; or

(AA) Any other air pollution emission source category which, as of August 7, 1980, is being regulated pursuant to §§111 or 112 of the Clean Air Act.

(g) "Major PSD modification" means any physical change in or change in the method of operation of a major PSD source that would result in a significant net emissions increase of any pollutant subject to regulations approved pursuant to the Clean Air Act or these Standards and Regulations. Any net emissions increase that is significant for volatile organic compounds shall be considered significant for ozone. A physical
change or change in the method of operation shall not include:

(1) Routine maintenance, repair, and replacement;

(2) Use of an alternative fuel or raw material by reason of an order pursuant to §§2(a) and 2(b) of the Federal Energy Supply And Environmental Coordination Act of 1974 or any superseding legislation or by reason of a natural gas curtailment plan pursuant to the Federal Power Act;

(3) Use of an alternative fuel by reason of an order or regulation pursuant to §125 of the Clean Air Act;

(4) Use of an alternative fuel at a steam generating unit to the extent that the fuel is generated from municipal solid waste;

(5) Use of an alternative fuel or raw material by an air pollution emission source which:
   (A) The source was capable of accommodating before January 6, 1975, unless such change would be prohibited pursuant to any federally enforceable permit condition which was established after January 6, 1975, pursuant to 40 CFR §52.21, as amended, or to regulations approved pursuant to 40 CFR Part 51 Subpart I, as amended, or 40 CFR §51.166, as amended; or
   (B) The source is approved to use under any permit issued pursuant to 40 CFR §52.21, as amended, or regulations approved pursuant to 40 CFR §51.166, as amended;

(6) An increase in the hours of operation or in the production rate, unless such change would be prohibited under any federally
enforceable permit condition which was established after January 6, 1975, pursuant to 40 CFR §52.21, as amended, or regulations approved pursuant to 40 CFR Part 51 Subpart I, as amended, or 40 CFR §51.166, as amended; or

(7) Any change in ownership of an air pollution emission source.

(h) "Major PSD source" means, (a) with respect to air pollution emission sources which are not located in nonattainment areas:

(1) Any of the following air pollution emission sources which emits, or has the potential to emit, one hundred tons per year or more of any pollutant subject to regulation approved pursuant to the Clean Air Act or these Standards and Regulations:

   (A) Fossil fuel fired steam electric plants of more than 250 million BTU per hour heat input;
   (B) Coal Cleaning plants (with thermal dryers);
   (C) Kraft pulp mills;
   (D) Portland cement plants;
   (E) Primary zinc smelters;
   (F) Iron and steel mills;
   (G) Primary aluminum ore reduction plants;
   (H) Primary copper smelters;
   (I) Municipal incinerators capable of charging more than 250 tons of refuse per day;
   (J) Hydrofluoric, sulfuric, and nitric acid plants;
   (K) Petroleum refineries;
(L) Lime plants;
(M) Phosphate rock processing plants;
(N) Coke oven batteries;
(O) Sulfur recovery plants;
(P) Carbon black plants (furnace process);
(Q) Primary lead smelters;
(R) Fuel conversion plants;
(S) Sintering plants;
(T) Secondary metal production plants;
(U) Chemical process plants;
(V) Fossil fuel boilers (or combinations thereof) totaling more than 250 million BTU per hour heat input;
(W) Petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels;
(X) Taconite ore processing plants;
(Y) Glass fiber processing plants; and
(Z) Charcoal production plants;

(2) Notwithstanding the air pollution emission source size specified in (1) of this definition, any air pollution emission source which emits, or has the potential to emit 250 tons per year or more of any air pollutant subject to regulation approved pursuant to the Clean Air Act or these Standards and Regulations; or

(3) Any physical change that would occur at an air pollution emission source not otherwise qualifying under this definition as a major PSD source, if the changes would constitute a major PSD
source by itself.

(b) A major PSD source that is major for volatile organic compounds shall be considered major for ozone.

(c) The fugitive emissions of an air pollution emission source shall not be included in determining whether the source is a major PSD source, unless the source belongs to one of the following categories of air pollution emission sources:

(1) Coal cleaning plants (with thermal dryers);
(2) Kraft pulp mills;
(3) Portland cement plants;
(4) Primary zinc smelters;
(5) Iron and steel mills;
(6) Primary aluminum ore reduction plants;
(7) Primary copper smelters;
(8) Municipal incinerators capable of charging more than 250 tons of refuse per day;
(9) Hydrofluoric, sulfuric, or nitric acid plants;
(10) Petroleum refineries;
(11) Lime plants;
(12) Phosphate rock processing plants;
(13) Coke oven batteries;
(14) Sulfur recovery plants;
(15) Carbon black plants (furnace process);
(16) Primary lead smelters;
(17) Fuel conversion plants;
(18) Sintering plants;
(19) Secondary metal production plants;
(20) Chemical process plants;
(21) Fossil fuel boilers (or combination thereof) totaling more than 250 BTU per hour heat input;
(22) Petroleum storage and transfer units with a total storage capacity exceeding three hundred thousand (300,000) barrels;
(23) Taconite ore processing plants;
(24) Glass fiber processing plants;
(25) Charcoal production plants;
(26) Fossil fuel fired steam electric plants of more than 250 million BTU per hour heat input; and
(27) Any other air pollution emission source category which, as of August 7, 1980, is being regulated pursuant to §§111 or 112 of the Clean Air Act.

(i) "NAA" means nonattainment area.
(j) "NAA pollutant" means the pollutant for which a national ambient air quality standard or a Guam ambient air quality standard is exceeded.
(k) "NAA source" means any major NAA source or major NAA modification.
(l) "Net emissions increase" means (a) the amount by which the sum of the following exceeds zero:
(1) Any increase in actual emissions from a particular physical change or change in method of operation at an air pollution
emission source; and

(2) Any other increases and decreases in actual emissions at the source that are contemporaneous with the particular change and are otherwise creditable.

(b) An increase or decrease in actual emissions is contemporaneous with the increase from the particular change only if it occurs between:

(1) The date five (5) years before construction of the particular change commences; and

(2) The date that the increase from the particular change occurs.

(c) An increase or decrease in actual emissions is creditable only if the Administrator has not relied on it in issuing a permit for the source pursuant to these Standards and Regulations, which permit is in effect when the increase in actual emissions from the particular change occurs.

(d) An increase in actual emissions is creditable only to the extent that the new level of actual emissions exceeds the old level.

A decrease in actual emissions is creditable only to the extent that:

(1) The old level of actual emissions or the old level of allowable emissions, whichever is lower, exceeds the new level of actual emissions;

(2) It is federally enforceable at and after the time that actual construction on the particular change begins; and

(3) It has approximately the same qualitative significance for public health and welfare as that attributed to the increase from the particular change.
(e) An increase that results from a physical change at a source occurs when the emissions unit on which construction occurred becomes operational and begins to emit a particular pollutant. Any replacement unit that requires shakedown becomes operational only after a reasonable shakedown period, not to exceed one hundred eighty (180) days.

(m) "Nonattainment Area" means an area designated in 40 CFR Part 81, as amended, as exceeding a NAAQS, or an area in which the Guam ambient air quality standards are exceeded.

(n) "PSD Source" means any major PSD source or major PSD modification.

(o) "Reasonable further Progress" shall mean the annual emission increment reduction of the applicable air pollutant which is sufficient in the judgment of the Administrator for attainment of the applicable air quality standards by the date required under §172 of the Clean Air Act. Reasonable further progress is based upon the actual emissions of sources located within the designated non-attainment area and shall be deemed to have occurred when the construction of a NAA source together with the offset will result in a net air quality benefit.

Section 1105.2. Source Applicability. (a) The preconstruction review requirements of this Section are additional requirements for considering an application for an air pollution control permit required by §1104.

(b) No air pollution emission source or modification to which the requirements of this Section apply shall begin actual construction without an air pollution control permit which states that the air pollution emission
source or modification would meet the requirements of this Section.

(c) The requirements of §1105.3 shall apply to any PSD source with respect to each pollutant that it would emit that is subject to regulation pursuant to the Clean Air Act.

(d) The requirements of §§1105.4 and 1105.5 shall apply to any NAA source with respect to each pollutant that it would emit that is subject to regulation pursuant to the Clean Air Act.

(e) The requirements of §1105.6 shall apply to any air pollution emission source that emits an NAA pollutant in a nonattainment area and is not a NAA source.

Section 1105.3. PSD review. (a) The provisions of 40 CFR Part §52.21 (b) through (w), as amended, are hereby incorporated into these Standards and Regulations, unless designated otherwise in this Section, to ensure the prevention of significant deterioration of air quality in areas not designated as non-attainment areas.

(b) At such times that GEPA is delegated the authority to conduct source reviews pursuant to 40 CFR §52.21 (u), as amended, all applicable PSD sources will apply to GEPA to ensure compliance with the source review requirements of 40 CFR §52.21 (i) through (r), as amended.

(c) At such times that GEPA is not delegated the authority to conduct source reviews pursuant to 40 CFR §52.21 (u), as amended, all applicable PSD sources shall apply to USEPA in accordance with the provisions of 40 CFR §52.21 (i) through (r), as amended. A copy of the application shall be sent concurrently to GEPA. In addition, sources are also required to obtain a permit in accordance to §1104.
Section 1105.4. NAA Review.  (a) Except as provided in Subsections (c) through (e), no air pollution control permit shall be issued to an owner or operator proposing to construct a NAA source unless:

(1) The NAA source will meet an emission limitation which is the lowest achievable emission rate for that source and that NAA pollutant;

(2) The owner or operator of the NAA source certifies that all existing major sources owned or operated by that person in Guam are in compliance with all terms and conditions contained in air pollution control permits of each of the sources;

(3) The owner or operator demonstrates that emission reductions for the NAA pollutant from the existing sources in the allowable offset area of the NAA source (whether or not under the same ownership) meet the requirements in §1105.5;

(4) The owner or operator demonstrates that emissions will not cause concentrations of the NAA pollutant to exceed the applicable increase over the baseline concentration as defined and established for any attainment area;

(5) There are no federal or GEPA rules that would otherwise prohibit construction of the NAA source in nonattainment area.

(b) Except as provided in Subsection (e), no air pollution control permit shall be issued to an owner or operator proposing to construct a NAA source when the NAA pollutant is a volatile organic compound or carbon monoxide (or both) unless:

(1) The owner or operator performs an analysis of alternative
sites, sizes, production processes and environmental control techniques for such NAA source; and

(2) The Administrator determines that the analysis demonstrates that the benefits of the NAA source outweigh the environmental and social costs imposed as a result of its location, construction or modification.

(c) The requirements of Subsection (a)(3) shall not apply to emissions of a NAA pollutant if the owner or operator can demonstrate that the emissions from the NAA source are temporary in nature, including but not limited to, those from a pilot plant, a portable facility, or construction, and notice is given to the Administrator at least ten (10) working days prior to relocation of such NAA source identifying the proposed new location and the probable duration of such operation at such location.

(d) New resource recovery projects burning municipal solid waste and sources compelled to undergo a major NAA modification by Federal law shall be exempt from the requirements of Subsection (a)(3), if such source demonstrates that:

(1) The owner or operator made the best efforts to meet the requirements of Subsection (a)(3), and such efforts were unsuccessful;

(2) All available emission offsets have been or will be secured; and

(3) The owner or operator will continue to seek offsets and apply them when they become available.

(e) The Administrator, at his sole discretion, may exempt an NAA
source from some or all of the requirements of Subsections (a) and (b), if there are no federal prohibitions from such action or USEPA has issued a waiver from all federal requirements that would otherwise prohibit such action. In such cases the Administrator may determine if the requirements of §1105.3 should be used in place of the requirements of this Section.

**Section 1105.5. NAA Offset Standards.** (a) Increased emissions from a NAA source subject to this Section must be offset by the reductions in the emissions of each NAA pollutant for which the air pollution emission source is classified as a major NAA source. Such offset may be obtained by reductions in emissions from the NAA source or from any other air pollution emission source or mobile source in the allowable offset area. The offsets must be in effect and legally enforceable by the time the NAA source commences operation.

(b) An offset will not be sufficient unless total emissions for the NAA pollutant in the allowable offset area after the NAA source commences operation will be less than the baseline of the total emission for the NAA pollutant and such reductions are sufficient to satisfy the Administrator that emissions from the NAA source together with the offset will result in reasonable further progress for the NAA pollutant in the allowable offset area.

(c) Only emission offsets for the same NAA pollutant will be allowed.

(d) The emission offsets must be effective for the useful life of the NAA source.

(e) For the purposes of this Section, "net air quality benefit" shall
mean that during similar time periods:

(1) A reduction in the number of violations of the applicable ambient air standard within the allowable offset areas has occurred, or

(2) The average of ambient concentrations within the allowable offset area following implementation of the offsets will be less than the average of the ambient concentration within the allowable offset area without the offsets.

(f) For an existing fuel combustion source, offset credit shall be based on the allowable emissions in accordance with these Standards and Regulations for the type of fuel being burned at the time the air pollution control permit is filed. Reduced emissions from an existing source caused by a change to a cleaner fuel may be used to offset emissions from the NAA source provided the fuel change will occur prior to commencement of operation of the NAA source. The air pollution control permit shall require the installation and use of an alternative control measure which will achieve the same degree of emission reduction should the source switch back to a less clean fuel at some later date. In the event a source can demonstrate that it has secured an adequate long-term supply of the new cleaner fuel, an air pollution control permit pursuant to §1104 shall not require the installation and use of an alternative control measure.

(g) Offsets shall be made on either a pounds per hour, pounds per day, or tons per year basis, whichever is applicable, when all facilities involved in the emission offset calculations are operating at maximum expected or allowed production rate, except as otherwise provided in
Section (f), utilizing the type of fuel burned at the time the air pollution control permit application is filed.

(h) Offsets that exceed the requirements for reasonable further progress toward attainment may be "banked" (saved to provide offsets for a source seeking a permit in the future). An existing source that reduces its own emissions may bank resulting reductions beyond those required by this Section, even if more of the offsets are applied immediately to an air pollution control permit. Written verification is necessary for the existing source to claim credit for the banked reductions.

(i) A NAA source may be credited with an emission offset (which may include banked emissions) by shutting down an existing source or permanently curtailing production or operating hours below actual baseline levels provided that the work force to be affected has been notified of the proposed shutdown or curtailment. Source shutdowns and curtailments in production or operating hours occurring prior to the date the air pollution control permit application is filed may generally not be used for offset credit unless the shutdown or curtailed production occurred after August 7, 1977, or less than one year prior to the date of application, whichever is earlier, and the proposed air pollution emission source is a replacement for the shutdown or curtailment.

(j) The allowable offset area shall refer to the geographical area where sources are located in which emissions are sought for purposes of offsetting emission from NAA sources. For the pollutants sulfur dioxide, particulate, and carbon monoxide, the allowable offset area shall be any area where national or Guam ambient air quality standards for these
pollutants are violated and in which significant levels are exceeded due to emissions from such new major source or major modification. The allowable offset area shall be determined by atmospheric simulation modeling. If emission offsets are obtained from a source on the same premises or in the immediate vicinity of the new major source or major modification, and the pollutants are emitted from substantially the same effective stack height, atmospheric simulation modeling shall not be required. The allowable offset area for all other pollutants shall be non-attainment areas for those pollutants.

(k) An emissions reduction may only be used to offset emissions if the reduced level of emissions is federally enforceable and legally enforceable by the Administrator. It will be considered legally enforceable by the Administrator if it is included as a condition in the air pollution control permit issued to the air pollution control permit where emission reductions are used to offset emissions from the proposed NAA source, or in the case of reductions from sources controlled by the applicant, is included as a condition of the air pollution control permit, or is adopted as part of these Standards and Regulations.

(l) Credit for an emissions reduction can be claimed to the extent that it has not already been included as a condition in an air pollution control permit or in demonstrating attainment or reasonable further progress under this Section.

(m) An offset required by this Section may include reductions that result from Territorial or federal measures to reduce emissions from a source in existence in amount sufficient to offset emissions from a NAA
Section 1105.6. Other Nonattainment Area Air Pollution Emission Sources. No air pollution control permit shall be issued to an owner or operator proposing to construct an air pollution emission source other than a NAA source that would emit a NAA pollutant in a nonattainment area unless:

(1) There are no federal or GEPA rules that would otherwise prohibit construction of the air pollution emission source in a nonattainment area, and

(2) The Administrator is satisfied that emissions from the air pollution emission source will not impede reasonable further progress toward attainment of the applicable air quality standards by the date required under §172 of the Clean Air Act.

Section 1106 - Standards of Performance for Air Pollution Emission Sources.

Section 1106.1. Source Applicability. (a) The standards of performance requirements of this Section are additional requirements for considering an application for an air pollution control permit required by §1104.

(b) No air pollution emission source or modification to which the requirements of this Section apply shall begin or continue construction, reconstruction, modification, relocation, or operation without an air pollution control permit which states that the air pollution emission source or modification would meet the requirements of this Section.

Section 1106.2. New Source Performance Standards. (a) Each
owner or operator of an air pollution emission source shall comply with all applicable requirements of 40 CFR Part 60, as amended, entitled "Standards of Performance for New Stationary Sources", and is incorporated herein by reference, unless clearly designated otherwise.

(b) At such times that USEPA requires owners and operators of solid waste incinerators subject to the permitting requirements of §129(e) of the Clean Air Act to apply for and obtain federal operating permits under the provisions of 40 CFR Part 71, as amended, a copy of the federal permit application shall be sent concurrently to GEPA. In addition, sources are also required to obtain an air pollution control permit in accordance to §1104.

Section 1107 - Hazardous Air Pollutant Sources.

Section 1107.1. Definitions. As used in this Section:

(a) "Area source" means any air pollution emission source of hazardous air pollutants that is not a major source but shall not include motor vehicles or nonroad vehicles subject to regulation approved pursuant to Title II of the Clean Air Act.

(b) "CAS" means Chemical Abstract Service.

(c) "Category" means any category of major sources and area sources of hazardous air pollutants listed pursuant to §112(c) of the Clean Air Act.

(d) "Major source" means an air pollution emission source, or a group of air pollution emission sources that are located on one or more contiguous properties or adjacent properties, and are under common control of the same person or command or persons under common control,
belonging to a single major industrial grouping (i.e., all have the same two-digit Standard Industrial Classification Code) and that emits or has the potential to emit, considering controls any hazardous air pollutant, except radionuclides, in the aggregate of ten (10) tons per year or more including fugitive emissions, or twenty-five (25) tons per year or more of any combination including fugitive emissions. For radionuclides, major source shall have the meaning specified by the USEPA Administrator by rule.

(e) "Modification" means any physical change in, or change in the method of operation of, a major source of hazardous air pollutants, which results in an increase of actual emissions of any hazardous air pollutant, or the emission of any hazardous air pollutant not previously emitted; except that upon promulgation of any standard or other requirements pursuant to §112(g) of the Clean Air Act that establishes a de minimis amount, "modification" applies only to:

(1) An increase of actual emissions of any hazardous air pollutant by more than the de minimis amount; or

(2) The emission of any hazardous air pollutant not previously emitted by more than the de minimis amount.

Section 1107.2 List of Hazardous Air Pollutants. The following are hazardous air pollutants:

**NOTE:** For all listings above which contain the word "compounds" and for glycol ethers, the following applies: Unless otherwise specified, these listings are defined as including any unique chemical substance that contains the named chemical (i.e., Antimony, arsenic, etc.) as part of that chemical's infrastructure.

¹ X'CN where X = H' or any other group where a formal dissociation may occur. For example, KCN or Ca(CN)₂.

² Includes moni- and di- ethers of ethylene glycol, diethylene glycol, and triethylene glycol R-(OCH₂CH₂)ₙ-OR' where: or

³ n = 1, 2, or 3

⁴ R = alkyl or aryl groups
\[ R' = R, \text{H}, \text{or groups which, when removed, yield glycol ethers with} \]
\[ \text{the structure:} \]
\[ R-(\text{OCH}_2\text{CH})_n\text{OH}. \text{Polymers are excluded from the glycol category.} \]

3 Includes mineral fiber emissions from facilities manufacturing or processing glass, rock, or slag fibers (or other mineral derived fibers) of average diameter one micrometer or less.

4 Includes organic compounds with more than one benzene ring, and which have a boiling point greater than or equal to 100°C.

5 A type of atom which spontaneously undergoes radioactive decay.

Section 1107.3. Applicability. (a) The provisions of this Section are applicable to any air pollution emission source which emits or has the potential to emit any hazardous air pollutant. No air pollution emission source or modification to which the requirements of this Section apply shall begin or continue construction, reconstruction, modification, relocation, or operation without an air pollution control permit which states that the air pollution emission source or modification would meet the requirements of this Section.

(b) Except as provided in Subsection (e), each owner or operator of an air pollution emission source shall comply with all applicable requirements of 40 CFR Part 61, as amended, entitled "National Emission Standards for Hazardous Air Pollutants," and is hereby incorporated by reference except as amended in Subsection (d).

(c) Each owner or operator of an air pollution emission source shall comply with all applicable requirements of 40 CFR Part 63, as amended, entitled "National Emission Standards for Hazardous Air
Pollutants for Source Categories.” and is incorporated herein by reference.

(d) Word and phrase substitutions for 40 CFR Part 61, as amended:

"Administrator" means the Administrator of GEPA or an authorized agent, officer, or inspector, except in 40 CFR Part 61 §§ 150(a)(4), 152(b)(3), and 154(d), as amended.

"U.S. Environmental Protection Agency" means USEPA.

(e) The national emission standard for asbestos, 40 CFR Part 61 Subpart M, as amended, is not included in the requirements of this Section. Asbestos requirements are specified in §1103.13.

(f) At such times that USEPA requires owners and operators of major sources of hazardous air pollutants to apply for and obtain federal operating permits under the provisions of 40 CFR Part 71, as amended, a copy of the federal permit application shall be sent concurrently to GEPA. In addition, sources are also required to obtain an air pollution control permit in accordance to §1104.

Appendix A to Section 1104.10. Transition Period and Deadlines to Submit First Applications.

Speaker Antonio R. Unpingco
Twenty-Fourth Guam Legislature
155 Hesler Street
Agana, Guam 96910

Dear Speaker Unpingco:

The Committee on Natural Resources, to which Bill 784 - AN ACT TO ESTABLISH RULES AND REGULATIONS FOR THE GUAM ENVIRONMENTAL PROTECTION AGENCY ("GEPA") AIR POLLUTION CONTROL STANDARDS AND REGULATIONS was referred, wishes to report back to the Legislature its recommendation TO DO PASS.

The voting sheet is as follows:

<table>
<thead>
<tr>
<th>TO PASS</th>
<th>7</th>
</tr>
</thead>
<tbody>
<tr>
<td>NOT TO PASS</td>
<td>0</td>
</tr>
<tr>
<td>ABSTAIN</td>
<td>0</td>
</tr>
<tr>
<td>TO PLACE IN INACTIVE FILE</td>
<td>0</td>
</tr>
</tbody>
</table>

Copies of the Committee Report and other pertinent documents are enclosed.

Thank you for your attention to this matter.

Sincerely,

[Signature]

JOANNE M.S. BROWN
Senator

MEMORANDUM

To: Committee Members

From: Chairperson, Committee on Natural Resources

Subject: Committee Report on Bill 784: An Act to Establish Rules and Regulations for the Guam Environmental Protection Agency ("GEPA") Air Pollution Control Standards and Regulations

Transmitted herewith for your consideration and action is our Committee Report on the above subject matter.

Please indicate your choice on the attached Voting Sheet and return the documents to my office for transmittal to the other members.

Your attention and cooperation in this matter is greatly appreciated.

[Signature]
JOANNE M.S. BROWN

Proposed Positions
The Committee on Natural Resources held a Public Hearing on Friday, November 27, 1998, at 9:00 a.m., in the Legislative Public Hearing Room.

In attendance were:

Senator Joanne M. S. Brown, Chairperson
Senator Alberto "Tony" Lamorena, Vice Chairman
COMMITTEE ON NATURAL RESOURCES
PUBLIC HEARING
November 27, 1998

COMMITTEE REPORT

Bill 784

Senator Brown continued the Public Hearing with Bill 784 (COR) AN ACT TO ESTABLISH RULES AND REGULATIONS FOR THE GUAM ENVIRONMENTAL PROTECTION AGENCY (“GEPA”) AIR POLLUTION CONTROL STANDARDS AND REGULATIONS.

She invited Mr. David Longa, Deputy Administrator of GEPA to introduce his key staff personnel to make presentation on the purpose of Bill 784.

Mr. David Longa, on behalf of Mr. Jesus Salas, GEPA Administrator and the GEPA Board, thanked Senator Brown and the Committee for making this hearing possible to enable GEPA to meet their dateline in January, 1999, with regards to Air Pollution Control Standards and Regulations. He then introduced key personnel who will be making the presentation on Bill 784.

Ms. Conchita Taitano of GEPA Air & Land Division, thanked Senator Brown and Chief of Staff and the Committee for the opportunity, at such short notice, to hear Bill 784 and introduced the individuals responsible for putting the Air Rules together.

Ms. Barbara Torres began the presentation by stating that there is a need to revise the permitting program on Guam as required under Title 5 Alternate Permit Program. Title 5 Alternate Permit Program is what is encoded in 40 CFR Part 69.13. This is a federal regulation that Guam must comply with in instituting an operating permit program for the Island of Guam. Therefore, GEPA has a January, 1999, deadline to submit such a program to USEPA for their review. If deadline is not met, sources on Guam will have to pay federal fees of about $32 per ton of emission on an annual basis and that will impact the Island of Guam. Another reason for changes in the revision is the Cabras/Piti Redesignation Area. Currently Cabras/Piti area is on non-attainment designation. With revision, designation will change to attainment which would require compliance with federal regulations as well. She then presented Bill 784, Section by Section.

Under Section 1101 - Definitions - changes made are only to support proposed rules and regulations.
Section 1102 - General Requirements - substantially based on existing regulations.

Section 1103 - General Prohibitions and Standards - There are different types of sources with different sets of standards and Guam's regulations need to be updated to meet federal requirements and would basically mirror federal requirements.

Senator Brown asked Ms. Torres to quickly summarize as to what degree the amendments have been changed to, for example, dealing with the dust emissions and open burning, which are both very common problems. She also asked what degree of enforcement is actually going to be exerted to enforce the changes.

Ms. Torres responded that with regards to visible emissions - the change here is with the timing of emission from 20% opacity to 60% for a period of not more than three (3) minutes in any sixty (60) minute period.

For Fugitive Dust Emission - Conditions are now specifically outlined as to how to control dust from becoming airborne.

Senator Brown suggested that the best enforcement would be to do informational outreach to the community so that they know what changes are being made and what resources they have to report violations without identifying themselves.

Open Burning - GEPA has MOU with Guam Fire Department and permits are now issued by Guam Fire Department. Enforcement is jointly done in the event a violation is reported. Senator Brown requested for a copy of MOU with GEPA.

Control of odors in air - Violation is determined by both GEPA and Public Health Environmental Division. Both agencies must be in agreement that odor emitted is indeed in violation of the Clean Air Act. This change came about as a result of many recommendations from Mr. & Mrs. Honofre and Fe Oliva, residents, who have been plagued by odor resulting from a piggery farm next door to them.
Senator Brown inquired as to how GEPA enforces this regulation referring to the Oliva situation with the pig farm. GEPA Legal Counsel, Ms. Liz Cruz, replied that unfortunately, these rules will not really help the Olivas. The farm is properly permitted as required by GEPA, Public Health, DPW. It will be very difficult to enforce the law in this instance even under the nuisance criminal law. Ms. Cruz indicated that by jointly (GEPA & Public Health) being responsible, the clean air requirement is more strengthen.

Mr. Honofre Oliva - a concerned resident and an advocate of clean air act, testified that his main issue is not to shut down the piggery, rather he and his family are more concerned on the waste management control and performance standards that they would like to see initiated into the control of odor and ambient air. They would like to work closely with GEPA and where ever their input can be used, they would like to help in that regard, thus, reason for his and his wife's presence at the hearing today.

Senator Tony Lamorena asked Mr. Oliva if these rules and regulations, as presented, suffice his concern.

Mr. Oliva stated that at the public hearing held about two weeks ago at the Governor's Complex, GEPA really did not know what they needed to look at. What he and his family would like to see implemented into the control of ambient air are the waste management performance standards. They feel that without these types of controls, it will be really hard to regulate odors.

Senator Brown commended Mr. Oliva and his wife for being very strong advocates of not only the Clean Air Act issue but others as well. She noted that a lot of people complain but a very few are willing to work to improve the problems they are faced with as well as the community.

Ms. Liz Cruz reiterated that Mr. & Mrs. Oliva provided quite a lot of very good comments and suggestions and although they are not in bill format to be incorporated into the clean air regs, she will definitely work on getting these ideas in bill form for the feed lot regulations.
Senator Lamorena asked if an odor control standard can be incorporated in the permitting process similar to the fugitive dust emission where certain precautions must be taken to minimize the odor. Ms. Liz Cruz stated that she will look into this matter further.

Senator Brown stated that from discussions this morning, although these regs should be addressed now because of the time line, GEPA should acknowledge that there is a definite need to go back and address odor regulations and probably check nationally with USEPA what standards do exist that Guam can look at. In addition, noise pollution regulations should also be addressed.

Senator Brown inquired how would these issues deal with the residents at the quarry in Yigo? Have changes been made by the company on their cement mixing plant, asphalt batching plant, etc., as she remembers the many residents who had complained with regards to air emissions and dust emissions.

Mr. Kin Cruz of GEPA Air Pollution Control testified that they made a close follow-up with the operations of Hawaiian Rocks and most of the equipments are no longer at the site and the crusher that is there is pretty much controlled. Tests have been conducted and dust emission is quite controlled.

Senator Tony Lamorena asked about animal waste on a smaller scale, for example dog waste. Do the regulations include control of odor in a residential area where the homes are close by. GEPA says they have control over commercial businesses. Public Health has jurisdiction over residential areas in this instance.

Mr. Ben Machol, Senior Project Engineer with USEPA and was on Guam for a couple of years as Special Assistant to Guam EPA Administrator stated that these air regulations would set the stage of what would be an odor violation and what isn’t, and it wouldn’t be just agricultural operations but it could be anything that someone would complain about.

Ms. Bobbie Torres continued with the presentation.
Next section deals with the SO2 fuel content. This section basically deals with areas that are nonattainment areas - areas that do not meet clean air quality standards. Cabras/Piti were at one time designated nonattainment areas, however, they have done a lot of mitigation on their sites and a lot of monitoring is also done in order to assure that they do not violate the clean air standards. The new plants are in compliance with the requirements. What this section does is basically incorporate the federal regulations so that enforcement can be made should there be a violation.

Senator Brown inquired how much more capacity is left at Cabras/Piti in the event there is a need to build a couple more baseload generators in the area.

Mr. Bal Wong, representative from Enron, stated that the generation in the area is limited to 322 megawatts. That is the maximum to meet the SO2. Right now there is less then 322. This section, therefore, basically addresses the redesignation of the Cabras/Piti Area.

Another issue that this chapter addresses is motor vehicle emissions. The change to this regulation is the increase in violation penalty from $50.00 per day to $1,000.00 per day per violation.

Senator Brown asked what has been the response from tour bus operations once they are reported in violation of this section. Have they been fairly cooperative and do they immediately repair the situation or are they laxed about it.

Ms. Torres responded that they have been fairly cooperative.

"Why then is the need to raise the violation penalty to $1,000.00," asked Senator Brown.

Ms. Torres and Mr. Ben Machol responded that there is now a Snap Test in place which strengthens GEPA’s enforcement capabilities.

Senator Brown asked if these regulations will allow GEPA the opportunity to pursue joint metering with Rev/Tax under an MOU.
Mr. Pete Cruz responded that it will.

Next section deals with Asbestos. This section will require anyone doing any asbestos renovation or demolition project to notify GEPA.

Section 1104 is the Permit Program Regulation. This section requires GEPA to put a program in place to comply with the Title 5 Alternate Permit Program. GEPA must set fees to be able to implement and maintain the program. GEPA permits federal oversight sources. This regulation increases the permit application requirement. (See attachment for the various schedules).

Chapter Five - Section 1105 - Special Preconstruction Requirements - This section contain federal standards which GEPA incorporated into their regulations for PUC sources as well as nonattainment sources. This is a more stricter permitting requirements.

Section 1106 - This section adopts federal regulations for new source performance standards.

There were no other testimonies presented on Bill 784.
MEMORANDUM

TO:        Chairperson
            Committee on Natural Resources

FROM:      Chairman
            Committee on Rules, Government Reform and Federal Affairs

SUBJECT:  Referral- Bill No. 784

The above Bill is referred to your Committee as the principal committee. It is recommended you schedule a public hearing at your earliest convenience.

Thank you for your attention to this matter.

PUBLIC HEARING
Friday, November 27, 1998
9:00 a.m.

AGENDA

1. Introduction of Committee Members

2. Commencement of Public Hearing

1. BILL 784 (COR) - AN ACT TO ESTABLISH RULES AND REGULATIONS FOR THE GUAM ENVIRONMENTAL PROTECTION AGENCY ("GEPA") AIR POLLUTION CONTROL STANDARDS AND REGULATIONS

2. BILL 785 (COR) - AN ACT TO AMEND CHAPTER 51 OF 10 GUAM CODE ANNOTATED RELATIVE TO SOLID AND HAZARDOUS WASTE MANAGEMENT

3. CONFIRMATION OF JOSE L.G. TECHAIRA MEMBER, BOARD OF DIRECTORS GUAM ENVIRONMENTAL PROTECTION AGENCY

At 11:00 a.m., Mark-Up Session for

4. BILL 655 (LS) - AN ACT TO MANDATE THE GOVERNMENT OF GUAM ON THE REDUCTION OF SOLID WASTE BY PROVIDING INCENTIVES FOR RECYCLING, SOURCE REDUCTION, AND COMPOSTING FOR ALL DEPARTMENTS, AGENCIES, AND INDIVIDUAL SCHOOLS AND ASSIST THE COMMUNITY IN GETTING INVOLVED IN MUNICIPAL SOLID WASTE REDUCTION AND CALL THIS "THE SOLID WASTE REDUCTION ACT."

3. Public Comment

4. Adjournment
The Department of Labor is currently seeking for individuals w/2 years exp. to fill the following positions:

15-CARPENTER.................................................$11.25/hr.
Construction, repair, finish, install fixtures and furniture of wood, plywood and
wallboard using carpentry hand tools and power tools, conforming to local building
codes. Studies plans, reading blueprints and locating specific materials. Must
be able to cut, hammer, and use various types of power tools.

85-CEMENT MASON..........................................$7.55/hr.
Required: Good hand eye coordination, strong hands, and must have previous
experience in cement masonry work. Must have a valid driver's license and
able to lift 50 lbs.

69-PHYSICAL LABORER.................................$5.30/hr.
Required duties include: bagging, cleaning and putting away materials, history of
deliveries and receiving calls. Must be身体健康 and able to lift 50 lbs.

Petty Cash Fund: 50/50

ON TO BID

DESCRIPTION

1. Trash Removal Services
2. Pad Mounted Transformers
3. Removal and Disposal of Waste, Contaminated Fuel, Oil and Oil
Rags at various GPA Locations
4. 80-Ton Crane Rental Svs.
5. Tree-Trimming Services
6. Vacuum Truck Rental
7. Power Plant Chemicals
8. 115/34.5KV Power Transformer
9. Miscellaneous Electrical Material
10. Substation Structures and Equipment
11. Wires

This is a notice of public hearing will be held on Monday, November 23, 1998 at 9:00 a.m. at the Legislative Public Hearing Room, 155 Hesler Street, Hagatna, on

BILL 784 (COR) - AN ACT TO ESTABLISH RULES AND REGULATIONS FOR THE GUAM ENVIRONMENTAL PROTECTION AGENCY ("GEPA") AIR POLLUTION CONTROL STANDARDS AND REGULATIONS;

BILL 785 (COR) - AN ACT TO AMEND CHAPTER 51 OF 10 GUAM CODE ANNOTATED RELATIVE TO SOLID AND HAZARDOUS WASTE MANAGEMENT;

CONFIRMATION OF JOSE L.G. TECAIRA
MEMBER, BOARD OF DIRECTORS GUAM ENVIRONMENTAL PROTECTION AGENCY;

At 11:00 a.m., Mark-Up Session for

BILL 655 (LS) - AN ACT TO MANDATE THE GOVERNMENT OF GUAM ON THE REDUCTION OF SOLID WASTE BY PROVIDING INCENTIVES FOR RECYCLING, SOURCE REDUCTION, AND COMPOSTING FOR ALL DEPARTMENTS, AGENCIES, AND INDIVIDUAL SCHOOLS AND ASSIST THE COMMUNITY IN GETTING INVOLVED IN MUNICIPAL SOLID WASTE REDUCTION AND CALL ALL "THE SOLID WASTE REDUCTION ACT."

ADA Coordinator:
Mrs. Toni Gumataotao at 472-3450/51
The public is invited to attend.
